Power Solution Group

Power Solution Group consists - International Power Div., Utility Retail Div., Power Business Development Div., and Domestic Power Business Office. Our group is responsible for producing (generating) renewable energy, adjusting electricity that fluctuates by the weather (supply-demand adjustment), and delivering adjusted electricity along with high value-added services. We are engaged in a variety of initiatives to meet customer demands through these businesses in the value chain.

Our aim is to contribute to the society's sustainability and realization of decarbonization through renewable energy business that significantly contributes to decarbonization, power trading business in particular spot and futures trading in the power market for supply-demand management to compensate for the intermittency of renewable energy, and the development of green hydrogen business which is expected to be the next-generation energy resource enabling decarbonization of the non-electrified areas, our counterparties who benefits from our value added services.
