MC, in partnership with Encana, is actively engaged in shale gas development at a premier unconventional resource play in Montney, an area well recognized for its massive remaining resources and cost competitiveness. MC will export the gas produced at Montney to markets in East Asia including Japan, through the LNG Canada project which MC also participates in, in addition to marketing the gas locally in North America.

Basrah Gas Company refines and sells natural gas in Iraq. Three enterprises have invested in the company, namely MC, South Gas Company, and Shell. Since 2013, Basrah Gas Company has been collecting and refining associated gas, as well as selling gas for power generation, LPG, and condensates. Basrah Gas Company is providing the country with a stable supply of energy, helping the protection of the global environment by collecting associated gas, which was conventionally flared on-site, and sharing up the local economy and post-war reconstruction efforts by creating jobs.

Cameron LNG is a project to liquefy and export natural gas produced in the U.S., where gas supply has grown as a result of shale gas production. The project, which has a capacity to commercially produce 12 million tons of LNG per year, a third of which will be handled by MC, has started commercial operations in August 2019. Supply from Cameron LNG will supplement LNG sources in the Middle East and Southeast Asia and contribute towards stable energy supplies.
The Natural Gas Group engages in the business of liquefied natural gas (LNG), which demand is expected to grow due to various factors including the transition to low-carbon societies.

MC has been involved in the production, transport, trade, and import agent business of LNG since it took part in importing the first LNG cargo to Japan in 1969.

We value our relationship of trust with producing countries and our customers, and have extended our LNG value chain in areas such as Southeast Asia, Australia, and Russia. In recent years, we have further expanded our footprint by taking part in a shale gas development project in Canada, an LNG export project in the U.S., and various new challenges including LNG marketing activities through our subsidiary in Singapore.

Our goal is to achieve economical, societal, and environmental value through the stable supply of energy, which is essential for our everyday lives.
