I. Basic Stance on Corporate Governance, Shareholder Composition, Corporate Data and Other Basic Information

I. Basic Stance on Corporate Governance

Mitsubishi Corporation strives to continuously raise corporate value through corporate activities rooted in the principles of fairness and integrity with the Three Corporate Principles for a corporate philosophy. Mitsubishi Corporation believes that by helping to enrich society, both materially and spiritually, it will also meet the expectations of shareholders, customers, and all other stakeholders.

In order to achieve these goals, Mitsubishi Corporation recognizes strengthening corporate governance on an ongoing basis as an important subject concerning management since it is foundation for ensuring sound, transparent and efficient management. Therefore, Mitsubishi Corporation is working to put in place a corporate governance system that is even more effective based on the Audit & Supervisory Board System.

This includes strengthening management supervision through such measures as (i) appointing Independent Members of the Board who satisfy Mitsubishi Corporation’s Selection Criteria for Outside Directors and Outside Audit & Supervisory Board Members, and (ii) establishing advisory bodies to the Board of Directors where the majority are Independent Members of the Board and other experts from outside Mitsubishi Corporation. At the same time, this also includes implementation of Mitsubishi Corporation’s prompt and efficient decision-making and business execution through enhancing the monitoring functions of Board of Directors.

In accordance with the above basic stance, Mitsubishi Corporation has set forth the Selection Criteria for Outside Directors and Outside Audit & Supervisory Board Members, which clarify the functions and independence of Outside Directors and Outside Audit & Supervisory Board Members, and also require that the number of Outside Directors who satisfy the criteria for independence be a third or more of the number of all Directors.

The Governance, Nomination and Compensation Committee with Independent Directors in the majority, deliberates and reviews the composition of the Board of Directors and the Audit & Supervisory Board, the policy on appointment of and proposals for appointment of Directors and Audit & Supervisory Board Members, the requirements of President and CEO and basic policy on the appointment and dismissal, personnel proposals of President and CEO, the remuneration system including the policy for setting remuneration and appropriateness of remuneration levels and composition, and evaluation of the
effectiveness of the Board of Directors. Furthermore, the President’s Performance Evaluation Committee has been established as a subcommittee to the Governance, Nomination and Compensation Committee, comprising the same Chairman and Independent Directors as the parent committee to deliberate the assessment of the President’s performance. In this way, Mitsubishi Corporation develops systems and mechanisms that ensure the effectiveness of management supervision by Independent Directors and Independent Audit & Supervisory Board Members.

As part of its policy to communicate with shareholders, Mitsubishi Corporation is committed to fulfill accountability as a corporate enterprise that gains credibility and reputation from stakeholders, including shareholders and investors, by proactively engaging in dialogue with them and by appropriately and timely communicating the Company’s management and business strategies to the stakeholders while simultaneously communicating those stakeholders’ expectations to the management. Namely Mitsubishi Corporation is leading mutual feedback with stakeholders and the Company’s management.

For specific policies and approaches of above basic stance and basic policy, see the corresponding items in this report.

【Reason for Not Implementing Principles of Corporate Governance Code】
Based on the above basic stance, Mitsubishi Corporation is working to strengthen corporate governance on an ongoing basis, thus it is implementing all the principles of the Corporate Governance Code.

【Disclosure Based on Principles of Corporate Governance Code】
Mitsubishi Corporation’s approaches to corporate governance are described in this report, the Notice of Ordinary General Meeting of Shareholders, Annual Securities Report, Integrated Reports, Mitsubishi Corporation’s website, and others. See these documents for more information.
The following are the details of the disclosure items based on the principles of the Corporate Governance Code.

a. Principle 1-4
■ Stance on Acquisition, Holding and Reduction in Listed Stocks
Mitsubishi Corporation may acquire and hold shares acquired for other than pure investment as a means of creating business opportunities and building, maintaining and strengthening business and partner relationships. When acquiring these shares, Mitsubishi Corporation confirms necessity of its acquisition based on the significance and economic rationale of the purchase. Also, Mitsubishi Corporation periodically reviews the rationality of continuing to hold the shares and promotes reducing holdings of stocks with decreased significance. In the Fiscal Year ended March 31, 2023, Mitsubishi Corporation sold approximately 39.6 billion yen of its shareholdings (including 13.8 billion yen in deemed holding shares), a decrease of approximately 10% from the previous fiscal year.

<Verification policy for holding individual shares>
The Board of Directors verifies all of the listed shares held by Mitsubishi Corporation from the perspectives of both economic rationale and qualitative significance of holding them every year.
The economic rationale is confirmed by whether or not the related earnings from each stock, such as dividends and related business profits on transactions, exceed Mitsubishi Corporation’s target capital cost (Weighted Average Cost of Capital) for the market price of each individual share. The qualitative significance is confirmed by the achievement or status of progress of the expected purpose for holding the stock, etc.

<Matters verified by the Board of Directors>
Verification was conducted by the Board of Directors for all listed shares held by Mitsubishi Corporation as of March 31, 2023 (market price was approximately 0.4 trillion yen). As a result of verification from the perspectives of both economic rationale and qualitative significance of holding them, numerous shares were identified as candidates for reduction due to a decreased importance of the expected purpose and significance for holding them, etc.

■ Stance on Exercising Voting Rights Relating to Listed Stocks
Mitsubishi Corporation attaches great importance to dialogue and communication with its investment destinations through various channels, aiming to create business opportunities and build, maintain and strengthen business and partner relationships, and from the perspective of raising the mid- and long-term corporate value of Mitsubishi Corporation and these companies. Mitsubishi Corporation considers exercising voting rights to be an important approach. For this reason, when exercising voting rights relating to an investment destination including the listed shares acquired for purposes other than for pure investment purposes, the department responsible for the oversight of the company reviews its business conditions (earnings, capital efficiency, etc.) from both quantitative and qualitative standpoints in accordance with internal regulations. These regulations stipulate matters to be considered, etc., when determining whether to vote for or against proposals such as appropriation of surplus, election of Directors and Audit & Supervisory Board Members, and revision of executive remuneration. Then Mitsubishi Corporation exercises its voting rights appropriately for individual matters for resolution. Furthermore, with regard to the proposals for the election and dismissal of Outside Directors and Outside Audit & Supervisory Board Members of listed subsidiaries, Mitsubishi Corporation’s internal regulations also stipulate that their independence from Mitsubishi Corporation is to be examined before exercising voting rights.

b. Principle 1-7
■ Transactions between Related Parties
By formulating the Board of Directors Regulations and the criteria for matters to be deliberated, Mitsubishi Corporation requires a resolution of the Board of Directors concerning, transactions between Director and Mitsubishi Corporation (self-dealing, indirect transactions), transactions between Executive Officer and Mitsubishi Corporation (self-dealing, indirect transactions) and transactions between major shareholders and Mitsubishi Corporation.

b. Internal Audits

Regarding internal audits, the Internal Audit Department (which had 80 members as of April 1, 2023) conducts audits of Mitsubishi Corporation, overseas regional subsidiaries and affiliated companies from a Company-wide perspective. In addition, each Business Group has established its own internal audit organization, which audits the operations that fall under its group organization on a consolidated basis. These internal audits are based on annual audit plans and are conducted after selecting audit targets. Under a dual reporting system, the audit results are reported each time to the President and CEO, Audit & Supervisory Board Members and other concerned parties. They are also reported regularly to the Board of Directors and the Executive Committee.

Mitsubishi Corporation conducts regular audits throughout the year of the Company and its Group companies in accordance with the International Standards for Internal Auditing every three to five years, taking into account factors such as business risks and scale. In addition to legal compliance, Mitsubishi

Furthermore, if the Audit & Supervisory Board decides it is appropriate to dismiss or not to reappoint the independent auditors after comprehensively taking into consideration and evaluating the independent auditors’ execution of duties and other circumstances, the Audit & Supervisory Board will submit a proposal to the Ordinary General Meeting of Shareholders to dismiss or not to reappoint the independent auditors concerned and to appoint new independent auditors concerned and to appoint new independent auditors.

Mitsubishi Corporation’s Audit & Supervisory Board Members and Audit & Supervisory Board followed the above process again in the Fiscal Year ended March 31, 2023 to evaluate the independent auditors. The result confirmed that the current independent auditors have established a system for executing their duties correctly, and they were considered to be conducting appropriate audits as professional experts while maintaining an independent position, and Audit & Supervisory Board determined the reappointment of the independent auditors. The continuous audit period by Deloitte Touche Tohmatsu LLC is 70 years.

d. Mutual cooperation among Audit & Supervisory Board Member Audits, Internal Audits and Accounting Audits, and their Relationship with Internal Control Departments

The Audit & Supervisory Board Members, Corporate Accounting Department, and Independent Auditors hold regular meetings at the time of quarterly financial results and monthly for exchanging opinions as necessary. In addition, the Internal Audit Department makes regular audit reports to the Audit & Supervisory Board, the Audit & Supervisory Board Members have monthly meetings with the Internal Audit Department, and the Audit & Supervisory Board Member and the Internal Audit Department hold liaison meetings with company auditors and internal audit departments of subsidiaries and affiliates, and so forth. Details of Policy for Setting Remuneration Amounts and Calculation Method

■ Policy for Setting Directors’ and Audit & Supervisory Board Members’ Remuneration

In line with the Basic Policy on Corporate Governance, Mitsubishi Corporation has established a remuneration package for Directors and Audit & Supervisory Board Members to ensure a sustainable increase in corporate value, and to ensure that their respective roles are fulfilled properly according to business execution and management supervision functions.

Mitsubishi Corporation’s basic approach to its remuneration package for Directors and Audit & Supervisory Board Members is as follows.

- Remuneration levels

Levels of remuneration are set based on the functions and roles of the Directors and the Audit & Supervisory Board Members, the company’s performance level and others. Furthermore, based on performance targets, Mitsubishi Corporation makes the level of remuneration globally competitive as management remuneration to foster a desire for growth among human resources bearing the next generation of management and to improve organizational vitality.

- Remuneration composition

With regard to remuneration for Executive Directors, to strengthen the performance-linked component, remuneration shall not only be based on the relevant single-year’s business results, but also be in line with medium-to-long-term corporate value. Remuneration composition shall be commensurate with the enhancement of medium-to-long-term corporate value based on a new stock-based component (with market conditions) that strengthens the link with shareholder value in addition to the cash component. From this perspective, consolidated net income (single year and medium to long term), sustainability factors (medium to long term), the share price and share growth rates (medium to long term) are adopted as key performance indicators.

For the Chairman of the Board and Outside Directors, who are performing a supervisory function for management, and for Audit & Supervisory Board Members, who undertake audits, there is a need to ensure their independence so that they can properly assume their respective roles. For this reason, they are paid only fixed base salary and are not paid variable remuneration.

- Governance of remuneration

The Governance, Nomination and Compensation Committee (*1), which comprises a majority of Outside Directors, continuously deliberates upon and monitors the policy for setting Directors and Audit & Supervisory Board Members’ remuneration, the appropriateness of remuneration levels and composition including remuneration items (*2) which are subject to the clawback policy, the operating status of the remuneration package, and other matters.

*1 See “Details of Establishment, Members, and Attribute of Chairperson” and “Notes” under II 1. [Directors] in this report for details.

*2 To enhance the management from the longer-term perspective, Mitsubishi Corporation has adopted a clawback policy, applicable to the individual performance-linked remuneration, performance-linked bonuses (short term) and performance-linked bonuses (medium to long term) of Executive Directors.
In addition, non-payment or reduction of the amount is possible by resolution of the Board of Directors in the event of serious violation of a delegation agreement etc., regarding annual deferral for retirement remuneration.

(1) Remuneration package for Directors and Audit & Supervisory Board Members (Fiscal Year ended March 31, 2024 onward)

i) Executive Directors (who also serve as Executive Officers)

The remuneration for Executive Directors (who also serve as Executive Officers) is as follows.

- **Base Salary**
  An amount determined by board of directors according to position, paid monthly.

- **Annual Deferral for Retirement Remuneration**
  Annual deferral for retirement remuneration is set aside from the base salary in a certain amount every year as consideration for the performance of duties, and the accumulated amount is calculated and paid in full upon retirement of a Director by resolution of the Board of Directors. If a Director makes a serious violation of the appointment contract between the Company and the Director with regard to the Directors’ duties during the term of office, the Board of Directors may resolve to reduce or not to pay the accumulated amount.

- **Individual Performance-Linked Remuneration**
  For Executive Directors, individual performance-linked remuneration is determined and paid on an individual basis after the President’s yearly performance assessment of each Director for the relevant fiscal year in both financial and non-financial terms (The Board of Directors delegated authority to the Presidents for decision of individual payment amounts). The annual assessment on the President’s performance is decided by the President’s Performance Evaluation Committee, a subcommittee to the Governance, Nomination and Compensation Committee. The subcommittee comprises the Chairman, who also serves as the Chairman of the Governance, Nomination and Compensation Committee, and Independent Directors sitting on the committee. The main evaluation points for the President’s performance evaluation include the status of progress on management strategy, the status of achievement of forecast earnings, and the status of other business management. Results of performance assessments are reported to the Board of Directors and the Governance, Nomination and Compensation Committee.

- **Performance-linked Bonus (Short term)**
  Performance-linked bonuses (short term) are paid in amount determined in line with profit in the relevant fiscal year based on a formula resolved by the Board of Directors after deliberation by the Governance, Nomination and Compensation Committee. If profit (attributable to owners of Mitsubishi Corporation) for the relevant fiscal year exceeds the profit threshold resolved ahead of time by the Board of Directors based on the consolidated capital cost, the amount to be paid will be adjusted in line with business performance. Meanwhile, if profit is below the relevant threshold, no bonuses will be paid. Moreover, the total amount to be paid is capped.

- **Performance-linked Bonus (Medium to long term)**
  Performance-linked bonuses (medium to long term) are paid in amounts calculated in line with profit over the medium to long term based on a formula resolved by the Board of Directors after deliberation by the Governance, Nomination and Compensation Committee. If the average of profit (attributable to
owners of Mitsubishi Corporation) over the relevant three fiscal years exceeds the average of profit
treshold resolved ahead of time by the Board of Directors based on the consolidated capital cost over
that same period, the amount to be paid will be adjusted in line with business performance over the
medium to long term. Meanwhile, if the average profit is below the average profit threshold resolved
ahead of time by the Board of Directors based on the consolidated capital cost, no bonuses will be paid.
Moreover, the total amount to be paid is capped. Furthermore, since the Fiscal Year ended March 31,
2024, in order to promote a stronger awareness of enhancing corporate value through initiatives related
to medium- to long-term sustainability including ESG factors, new sustainability factors was added to
the key performance indicators used to calculate performance-linked bonuses (medium to long term).
The remuneration will vary in accordance with the results of evaluations of initiatives related to
optimizing the value of human capital and contributing to decarbonized societies. In the evaluation
process, the subcommittee of the Governance, Nomination & Compensation Committee
comprehensively evaluates initiatives related to abovementioned sustainability factors over the three
fiscal years of the performance period in both quantitative and qualitative terms, taking into account
longer term impacts. The members of the subcommittee are the Chairman of the Board and Independent
Directors, to whom this form of remuneration does not apply, and the committee is chaired by an
Independent Director. The evaluation results are reported to the Board of Directors and are disclosed to
the public.

· Stock-based Remuneration Linked to Medium- and Long-term Share Performances
Stock-based remuneration is paid to Executive Directors and Executive Officers from the perspective of
aligning Directors’ and Officers’ interests with those of shareholders and providing incentives to enhance
corporate value and to increase the Company’s share price over the medium to long term. The board of
directors determines the number of shares allocated to each person.
All stock options allocated cannot be exercised for a three-year performance period. The number of stock
options that can be exercised at the end of the performance period varies depending on the share growth
rate (calculated as TSR divided by the TOPIX benchmark growth rate over the same period).
The basic policy is that Directors are obliged to hold any shares including those acquired through the
exercise of stock options while in office. Sales of such shares are restricted until their aggregate market
value exceeds approximately 300% of the base salary of each position.

ii) Chairman of the Board, Outside Directors, and Audit & Supervisory Board Members
The Chairman of the Board and the Outside Directors, who do not also serve as Executive Officers, must
fulfill a supervisory function for management in an appropriate manner, while the Audit & Supervisory
Board Members must perform audits appropriately. Accordingly, there is a need to ensure their
independence. For this reason, they are paid only fixed monthly remuneration, which does not have a
component linked with business results.

(2) The Method for setting remuneration for Directors and Audit & Supervisory Board Members
i) Directors
The Governance, Nomination and Compensation Committee deliberates and the Board of Directors decides
the policy for setting Directors’ remuneration and the remuneration amount (actual payment amount).
The total remuneration amount (actual payment amount) and individual payment amounts for Directors, excluding individual performance-linked remuneration, are determined by a resolution of the Board of Directors within the upper limits for each type of remuneration decided by resolution of the 2019 Ordinary General Meeting of Shareholders held on June 21, 2019. Base salary and annual deferral for retirement remuneration, forms of fixed remuneration, are paid in amounts determined by the Board of Directors. As for variable remuneration, payments of performance-linked bonuses (short term), performance-linked bonuses (medium to long term) and stock-based remuneration linked to medium- to long-term share performance are determined, while reflecting key performance indicators, based on a formula set by the Board of Directors following deliberation by the Governance, Nomination and Compensation Committee.

Mitsubishi Corporation has adopted a clawback policy,* applicable to the individual performance-linked remuneration, performance-linked bonuses (short term) and performance-linked bonuses (medium to long term) of Executive Directors, revising the regulations for executive officers by resolution at the Board of Directors’ Meeting held on February 18, 2022.

* In the event that an Executive Officer causes any loss or damage to the Company from willful misconduct or negligence, a serious violation of a delegation agreement, or a serious accounting error or act of misconduct resulting in an ex-post revision of a financial report by resolution of the Board of Directors, non-payment or reduction of the amount/reclaiming of the paid amount is possible by resolution of the Board of Directors. The Governance, Nomination and Compensation Committee continuously deliberates and monitors the appropriateness of remuneration composition, including remuneration items which are subject to the clawback policy.

The payment amounts of individual performance-linked remuneration paid to Directors based on their individual performance assessment, including qualitative assessment, are determined and paid on an individual basis, reflecting the President’s yearly performance assessment in both financial and non-financial terms of each Director for the relevant fiscal year (the Board of Directors delegates authority to the President for deciding the individual payment amounts). Performance evaluations of Executive Directors comprehensively take into account their contributions to the organizations and businesses they oversee; their contributions to management of the entire Company, Corporate Staff Section, Business Groups and offices; and the state of sustainability initiatives that leads to sustainability.

The annual assessment on the President’s performance is decided by the President’s Performance Evaluation Committee, which is delegated this authority by the Board of Directors (and is a subcommittee of the Governance, Nomination and Compensation Committee). The subcommittee is comprised of the Chairman of the Board, who also serves as the chair of the Governance, Nomination and Compensation Committee, and Independent Directors sitting on the committee (see page 26). Results of the performance assessment are reported to the Board of Directors and the Governance, Nomination and Compensation Committee to ensure objectivity, fairness and transparency.

Based on the policy for determining remuneration packages (including methods for calculating performance-linked bonuses) that was approved at the ordinary meeting of the Board of Directors held on May 17, 2019, and the extraordinary meeting of the Board of Directors held on June 21, 2019, each year, the Governance, Nomination and Compensation Committee deliberates and the Board of Directors makes a resolution determining that the total amount of director remuneration packages and methods for deciding payments to individual directors are consistent with said policy for determining remuneration packages.
Each year, the Governance, Nomination and Compensation Committee deliberates and monitors the fairness of remuneration levels and compositions (including remuneration items subject to the clawback policy) as well as the operational status of remuneration systems. This is done with reference to data on remuneration levels and composition rations provided by the external consulting firm Willis Towers Watson (WTW). The assurance of independence is necessary for the Chairman of the Board and Outside Directors, who undertake functions of management oversight, in order for them to appropriately perform their respective roles. For this reason, Mitsubishi Corporation will pay them only fixed monthly remuneration, and not remuneration that is linked with business results.

ii) Audit & Supervisory Board Members

The total amount of remuneration and individual payment amounts for Audit & Supervisory Board Members are determined by discussions by the Audit & Supervisory Board Members within the upper limits for Audit & Supervisory Board Member remuneration decided by resolution of the 2019 Ordinary General Meeting of Shareholders, held on June 21, 2019.

The assurance of independence is necessary for Audit & Supervisory Board Members, who undertake audits, in order for them to appropriately perform their respective roles. For this reason, Mitsubishi Corporation will pay them only fixed monthly remuneration, and not remuneration that is linked with business results.

【Support System for Independent Directors (Independent Audit & Supervisory Board Members)】

To ensure that the Directors and Audit & Supervisory Board Members are able to perform their management supervision and audit functions adequately, the Board of Directors’ Office and the Audit & Supervisory Board Members’ Office have been established, and have been providing necessary information and support appropriately and in a timely manner for the Directors and Audit & Supervisory Board Members to perform their duties.

Prior to each Board of Directors meeting, opportunities are created for the management executives of the Corporate Staff Section and Business Groups to provide explanatory summaries of the agenda items for which they are responsible to Independent Directors and Independent Audit & Supervisory Board Members in order to facilitate substantive deliberations at the meetings (totaling 39 hours in the Fiscal Year ended March 31, 2023). The sessions are also utilized to appropriately share timely information that helps enhance deliberations. The Company also provides an orientation to newly appointed Independent Directors and Independent Audit & Supervisory Board Members, as well as ongoing opportunities to deepen their understanding of the businesses and strategies of Mitsubishi Corporation including site visits of business subsidiaries and affiliates, opportunities for dialogue with the executive officers, for dialogue with Business Group CEOs, department heads and General Managers, small group discussions with Executive Vice Presidents, and dialogues with mid-level and young employees. Furthermore, to enhance the effectiveness of the Board of Directors, Mitsubishi Corporation holds meetings of the Governance, Nomination and Compensation Committee and the President’s Performance Evaluation Committee which comprise a majority of Independent Directors in their memberships. Also, Mitsubishi Corporation holds regular meetings of Independent Outside Directors and Outside Audit & Supervisory Board Members to provide a forum for free discussion amongst themselves on a wide range of topics.

The composition and size of the Board of Directors and the policy and process for appointing nominated Directors are deliberated at the Governance, Nomination and Compensation Committee with Independent Directors in the majority, and then decided by the Board of Directors as follows:

a. Composition and Size of the Board of Directors and Policy for Appointing Nominated Directors

To ensure decision-making and management oversight are appropriate for Mitsubishi Corporation which is involved in diverse businesses and industries in a wide range of fields, and from the perspective of ensuring diverse standpoints, several Directors are appointed from both within and outside Mitsubishi Corporation with the depth of experience and high levels of knowledge and expertise needed for fulfilling their duties. More specifically, in addition to Chairman of the Board and the President and Chief Executive Officer, Mitsubishi Corporation’s In-house Directors are elected from Executive Officers (Senior Executive Vice Presidents & Executive Vice Presidents) responsible for companywide management so that they can fully leverage their abundant business experience to ensure appropriate decision making and robust management supervision by the Board of Directors. Independent Directors are appointed from those who possess a practical perspective of highly experienced company officers and those who possess an objective and professional perspective with a deep insight on global dynamics and socio-economic trends. These individuals thus contribute to appropriate decision making and robust management supervision by the Board of Directors as they bring diverse perspectives into its deliberations.

The composition and size of the Board of Directors is appropriately determined to help it maintain transparent, fair, timely and decisive decision-making and carry out effective oversight, with one third or more being made up of Independent Directors.

b. Process for Appointing Nominated Directors

c. Matters Deliberated by the Board of Directors

The Board of Directors deliberates on important management issues, and supervises business execution through reports on primary matters in Midterm Corporate Strategy 2024, the business strategy of Business Groups, and so on. Mitsubishi Corporation has also constructed appropriate internal control systems, and checks their operational status every year in order to work toward their continuous improvement and strengthening. Business execution other than these matters for resolution by the Board of Directors is entrusted to Executive Officers by appointing the President as the Chief Executive Officer responsible for business execution, and the Executive Committee (meets twice monthly) as a management decision-making body.

the Audit & Supervisory Board System. This includes strengthening management supervision through such
measures as (i) appointing Independent Members of the Board who satisfy MC’s Selection Criteria for

the Board of Directors where the majority are Independent Members of the Board and other experts from
outside MC. At the same time, this also includes implementation of MC’s prompt and efficient decision-
