To meet the needs of society, the Mitsubishi Corporation (MC) Group seeks to achieve growth together with society through a business management model that relies on three core strengths: the collective capabilities to adopt a holistic view across numerous industries, the foresight to identify New Seeds of Growth, and the execution skills to achieve growth.
### Business Management Model

Through its more than 130 Business Units and a global network of around 1,700 companies in 90 countries and regions, the MC Group has access to virtually every industry worldwide. Capitalizing on its collective capabilities to adopt a holistic view across numerous industries, it is shifting away from a mindset that looks simply to invest in past sources of growth. By leveraging its strengths to become more deeply involved in business management, the MC Group seeks to create new value by transforming its businesses, as well as to raise corporate value by reforming its business structures through consolidation and other means.

### Management Professionals

The key to achieving this shift from a business investment model to a business management model will be in developing and producing an even larger number of highly skilled management professionals who are able to respond flexibly to the changing business environment and who proactively engage in managing businesses. MC will pursue companywide initiatives to develop its management professionals, and through the businesses they create, MC will in turn be contributing to both society and the growth of the company. We are working to enhance the corporate value of the MC Group by achieving this virtuous growth cycle.

### Approximate Number of Group Companies:

1,700

The MC Group aims to create sustainable corporate value while simultaneously generating economic value, societal value and environmental value through its businesses.

Forging a new path with business management.
Alongside shifts in the geopolitical landscape, advances in digital technology and the emergence of platform companies are ushering in a business model transformation known as the Fourth Industrial Revolution. Given these changes to the external environment, MC adopts a holistic view across numerous industries to pursue a business portfolio strategy that examines the next business fields to enter and the fields for asset replacement companywide, deliberately rotating businesses through a series of project cycles inherent to the Company as part of a Value-Added Cyclical Growth Model. Furthermore, in order to adapt quickly to changes in the environment, MC is implementing a number of HR system reforms. These include ensuring that employees gain the right experience to become management professionals earlier in their careers, being more meritocratic to ensure that the right people are assigned to the right positions and utilizing management talent more widely and effectively throughout the MC Group.
**Value Creation Beyond Business Group Walls**

The MC Group takes a holistic view across numerous industries based on a framework that focuses on the main themes of Midterm Corporate Strategy 2021: portfolio management, HR development and digital strategies. Aiming to identify New Seeds of Growth that may have been previously overlooked through a traditional mindset, including industrial restructuring and technological innovation, MC and each of its Business Groups are working to jointly identify projects and respond to the rapid progression of industrial digitalization (DX). Currently, various ideas are under discussion that transcend the walls between Business Groups, and these have already produced numerous candidates for investment projects. We will carefully examine these candidates and then seize the opportunity at the appropriate time to execute them.

**Reciprocal Growth Between the Company and Employees**

The MC Group has continued to adapt its business model to respond to the needs of society. The driving force behind our success is our highly ethical management professionals who have the foresight to identify New Seeds of Growth and the execution skills to achieve that growth. The MC Group will continue to accelerate the development of its management professionals by actively providing opportunities for personal growth, aiming to further strengthen the link between professional growth and company development.

In Midterm Corporate Strategy 2018—Evolving Our Business Model from Investing to Managing, formulated in May 2016, Mitsubishi Corporation (MC) described a policy of simultaneously generating triple-value growth through our businesses: economic value, societal value, and environmental value.

The systems introduced during this period are already making steady progress and delivering results. To accelerate our initiatives for further growth, we formulated a new management direction for the three years starting from the fiscal year ended March 31, 2020 called Midterm Corporate Strategy 2021—Achieving Growth Through Business Management Model.

In this integrated report, we present our specific initiatives aimed at maximizing corporate value by focusing on the MC Group’s strengths and transcending Business Group boundaries to steadily develop new pillars of future growth.

Looking ahead, we will continue to do our utmost to ensure that our integrated report serves as an effective communication tool that positively contributes to constructive stakeholder dialogue. To do so, we will strive to improve the clarity of our reporting based on the valued feedback we receive from our stakeholders.

In the course of preparing this report, we have worked closely with each of our internal departments to provide a summary of our holistic perspective on the MC Group as a whole. In the process, we have referred to the reporting framework propounded by the International Integrated Reporting Council (IIRC) and other guidelines. We hereby affirm the legitimacy of the preparation process and the accuracy of the content of disclosure with respect to this integrated report.

September 2020

Kazuyuki Masu
Member of the Board, Executive Vice President, Corporate Functional Officer, Chief Financial Officer

Publication of Mitsubishi Corporation Integrated Report 2020

Forward-Looking Statements

This integrated report contains forward-looking statements about Mitsubishi Corporation’s future plans, strategies, beliefs and performance that are not historical facts. They are based on current expectations, estimates, forecasts and projections about the industries in which Mitsubishi Corporation operates and beliefs and assumptions made by management. As the expectations, estimates, forecasts and projections are subject to a number of risks, uncertainties and assumptions, they may cause actual results to differ materially from those projected. Mitsubishi Corporation, therefore, wishes to caution readers not to place undue reliance on forward-looking statements. Furthermore, Mitsubishi Corporation undertakes no obligation to update any forward-looking statements as a result of new information, future events or other developments.

Risks, uncertainties and assumptions mentioned above include, but are not limited to, commodity prices; exchange rates and economic conditions; the outcome of pending and future litigation; and the continued availability of financing, financial instruments and financial resources.

Our Direction

MC’s Vision
Corporate Philosophy and Vision

Corporate Philosophy

Since its founding years, Mitsubishi Corporation has embraced the spirit of the Three Corporate Principles as its corporate philosophy.

The Three Corporate Principles were formulated in 1934, as the action guidelines of Mitsubishi Trading Company (Mitsubishi Shoji Kaisha), based on the teachings of Koyata Iwasaki, the fourth president of Mitsubishi. We look to the Three Corporate Principles as the source of inspiration for our business activities and also for our initiatives to fulfill our responsibilities towards the global environment and society.

Corporate Responsibility to Society
“Shoki Hoko”
Strive to enrich society, both materially and spiritually, while contributing towards the preservation of the global environment.

Integrity and Fairness
“Shoji Komei”
Maintain principles of transparency and openness, conducting business with integrity and fairness.

Global Understanding Through Business
“Ritsugyo Boeki”
Expand business, based on an all-encompassing global perspective.

MC Group Corporate Vision

Mission
By pooling its collective capabilities, the MC Group strives to fulfill societal needs and meet stakeholder expectations by simultaneously generating economic, societal and environmental value.

Adaptability
The MC Group prides itself on adapting to our ever-evolving world by anticipating and responding to changes including geopolitical shifts, economic transformation, technology-driven industrial developments and changes in societal values.

Consolidated Growth Strategy
The MC Group includes approximately 1,700 companies, and as it works to raise its consolidated earnings for the group as a whole, it remains equally committed to growing each enterprise’s own corporate value, while simultaneously generating economic, societal and environmental value. By leveraging the collective capabilities found throughout its network of Group companies and over 130 Business Units, MC shall continue to innovate and inspire global industries.

MC optimizes its portfolio by dynamically allocating management resources based on its level of engagement in each business. Sizeable growth investments are companywide commitments to develop next-generation earnings drivers. The Group is also dedicated to training highly ethical management professionals who have the foresight to identify new seeds of growth and the execution skills to achieve that growth.

Regardless of how our world evolves, there will always be opportunities to deliver goods and services that meet societal needs and improve quality of life. The realization of these opportunities forms the very foundation of MC’s consolidated growth strategy.
Achieving Sustainable Growth for the MC Group and Society

The MC Group aims to deliver sustainable growth by adapting to changes in the business environment and fulfilling societal needs with due consideration for the United Nations’ Sustainable Development Goals (SDGs). To achieve this aim, the MC Group shall rely on its three core strengths: the collective capabilities to adopt a holistic view across numerous industries, the foresight to identify new seeds of growth and the execution skills to achieve growth.

Simultaneously generating economic value, societal value and environmental value through our businesses
Path of Value Creation

MC has pursued value creation by flexibly transforming its business models in accordance with changes in the external business environment.

**Transition of external environment and corporate value**

- Consolidated net income
- Market capitalization

**Changes in business model**

**1870**

**Trading Phase**

From its founding until the 1980s, MC was primarily involved in the trading and distribution business. The Company supported a wide range of industries by serving as an intermediary, connecting suppliers and buyers across international borders in order to respond to market changes and customer needs. Given the underlying expansion of trading volumes for numerous industries throughout Japan's period of rapid economic growth up to the 1980s, MC, with trading commissions as its primary revenue source, saw its financial performance steadily improve.

**Major Events**

- 1870: Original Mitsubishi organization founded
- 1894: New MC founded (historic re-merger)
- 1957: MC becomes Japan’s first trading company to take part in petroleum wholesale
- 1969: MC founds Brunei LNG
- 1974: MC signs construction contract for the international airport at Mombasa, Kenya

**1980s**

**Trading Evolution Phase**

In the mid-1980s, a strong yen pushed Japan into a recession, which was followed by the economic bubble and its subsequent collapse. During this period, the business environment surrounding sogo shosha became increasingly severe, as the notion was that such intermediaries were unnecessary. Under these circumstances, MC decided to step out from its role as an intermediary by striving to maintain and, where possible, expand its trading volumes by executing minority investments in upstream and downstream fields as well as by enhancing its existing functions in order to provide added value as a trader and distributor.

**Major Events**

- 1981: MC signs joint venture contract with Saudi Petrochemical
- 1985: MC partners with Mitsui & Co., Ltd. in Northwest Australian LNG development project
- 1989: MC acquires Princes Limited, a UK-based food and drink company
- 1992: MC establishes Metanol de Oriente, METOR, S.A. (METOR), a methanol manufacturing and sales company in Venezuela
- 1992: MC joins the Sakhalin offshore oil and LNG development project
Entering into the new millennium, value chain dynamics for industry as a whole began to change, and it became necessary to transform the trading business model completely. MC sought a new way forward by pursuing business models that transcended the bounds of the traditional trading business. By accelerating business investments, MC embarked upon a new course of more proactively managing businesses.

Due to a shift in the market environment for natural resources, MC recorded its first ever net loss for the fiscal year ended March 3 2016. Since then, MC has worked to rebalance its resources and non-resources businesses and has emphasized cash flow in management. Under Midterm Corporate Strategy 2021, MC is currently endeavoring to shift its business model from one that looks to investment as a source of growth to a model of “managing” businesses by becoming more deeply involved in operations and leveraging MC’s unique management capabilities to actively generate value and drive growth.
Achieving Growth
Through Business Management Model

While business models across a wide range of industries are changing due to digitization, geopolitical uncertainty continues, and the social and economic outlook is becoming increasingly unclear due to the spread of COVID-19.

Even in this difficult external environment, I believe that steadily implementing Midterm Corporate Strategy 2021 will lead to medium- and long-term growth for the MC Group.

Here, I would mainly like to discuss our response to the external environment and my thoughts on human resources in terms of the progress made towards this strategy.

Takehiko Kakiuchi
Member of the Board, President and CEO
Message from the President and CEO

What are your thoughts in view of the difficult external environment, including the impact of COVID-19 and the global economic downturn?

Heightening geopolitical risk, notably US-China tensions and changes to the external environment stemming from digitization, have been further accelerated by the COVID-19 pandemic. MC will weather this crisis by demonstrating our unique adaptability.

COVID-19 has brought serious stagnation in social and economic activity, and the rapid decrease in demand and plummeting crude oil prices are inflicting damage on the world economy exceeding that caused by the global financial crisis of 2008 and the Great East Japan Earthquake of 2011. At the same time, a geopolitical issue, namely the struggle for supremacy between two global superpowers, the United States and China, and a societal issue, namely the transition to a digital society, have also come to the forefront. In energy-related sectors, growing social and environmental awareness surrounding the transition to a low-carbon/decarbonized society has become an irreversible tide, and companies are expected to pursue future-fit businesses as responsible corporate citizens.

The external environment facing the MC Group is fraught with grave uncertainties.

In August 2020, MC disclosed its full-year earnings forecast for the fiscal year ending March 31, 2021. It is a matter of urgent importance for all officers and employees to confront the current harsh reality and to fortify our existing businesses with a sense of crisis as our business management is put to the test.

Introduction
Firstly, I would like to convey my deepest sympathy to all those affected by COVID-19 and express my heartfelt respect and gratitude to the medical practitioners and other key workers who are serving society across various settings. The MC Group will come together to combat this crisis, aiming to meet the expectations of our stakeholders and to achieve sustainable growth.

For unprofitable or low-profit businesses to which MC can no longer add value through its involvement, we will consider options including mergers with other companies or divestment. Meanwhile, as a result of the decisive strategic asset replacement that was carried out following the posting of a consolidated loss for the fiscal year ended March 31, 2016, our business portfolio has become more resilient to external impacts. Even in the current situation, the foundation of our business portfolio strategy and financial soundness will remain unshaken. Looking ahead to the medium- to long-term growth of MC, we will buckle down to implement the initiatives set out in Midterm Corporate Strategy 2021 without deviation.

Assuming the availability of a COVID-19 vaccine, the world economy is expected to head toward genuine recovery in 2021 at the earliest, and our basic scenario envisions the global economy following a U-shaped recovery. With the outlook so uncertain, we will combine the insights of MC’s management professionals on the front lines of our business to consider countermeasures based on a variety of scenarios, including worst-case conditions. Even amid the current unprecedented turmoil, we will keep our eyes squarely on the future and weather this crisis by demonstrating our unique adaptability.
Looking ahead to the future in your role as President, what measures do you think must be taken in these circumstances?

Industrial structure reform through digital transformation and energy sector reform through energy transformation.

I am convinced that the challenges that MC should tackle head-on are, first, industrial structure reform through digital transformation (DX) and, second, energy sector reform through energy transformation (EX), working towards the transition to a low-carbon/decarbonized society.

I should note that we have begun using the term EX internally to refer to how we will take on the challenge of transforming the energy sector in line with the transition to a low-carbon/decarbonized society, placing it at the same level of priority as DX.

Since before the COVID-19 pandemic began, Japan has lagged behind other advanced countries in digitization of both society and industry. We need to recognize that the industrial structure reform through DX, whether we welcome it or not, is now unavoidable across every industry. Businesses that cannot keep pace with this inevitable reform will undoubtedly be eliminated. This is precisely why I think the role expected of MC is not to resist the changes brought on by technological innovation, but instead to move quickly to lead the way in our industry and, in some cases, adapt our industrial structures. To that end, in April of this year we launched the Industrial DX Task Force as a companywide initiative to envision and promote what can be accomplished by looking across a wide range of business sectors, as opposed to an extension of our existing businesses.

Although at first we will proceed with DX on a B-to-B basis, eventually we will take a B-to-B-to-C approach to link DX to consumers. Ultimately, people consume electricity, resources and food, and people’s sensitivities, behaviors and desires are intertwined with consumption. By analyzing these factors and connecting them with consumption data digitally, we will likely be able to use algorithms to quantify consumer needs all the way to the most upstream businesses. I think that we will be fully able to demonstrate our strengths as a company with a holistic view across numerous industries by integrating people’s consumption with industrial activities.

On the subject of EX, the greatest issue for MC is how to develop our energy-related business portfolio, which holds substantial weight in our overall portfolio, as we usher in a low-carbon/decarbonized society. Eneco, which we acquired at the end of the previous fiscal year, is a European integrated energy company that has been actively engaged in renewable energy projects. A joint venture between Eneco and a major resources company was awarded the tender for an offshore wind-power project in the Netherlands this July as the first project under this new organizational structure, and Eneco is accelerating its forward-looking initiatives.

MC is deeply involved in the energy and power generation sector, engaging in businesses ranging from the stable supply of LNG to power generation particularly in Japan, which lacks certain natural resources. In light of the reality Japan currently faces, and assuming technological innovation in preparation for the realization of a low-carbon/decarbonized society over the next three decades, we would like to propose an optimal solution through our unique business activities during the fiscal year ending March 31, 2022. I am convinced that this will enable MC to lead the way in world-class EX.

MC’s greatest strength is its involvement in virtually every industry worldwide through its more than 1,700 Group companies. This leads to business intelligence built on mutual trust, based on our strong connections with influential partners, both internal and external. With this intelligence as the focal point, we will formulate new businesses and seek to realize industrial structure reform through DX and energy sector reform through EX. In this way, MC’s role should be to proactively seek solutions to problems that industries are facing.

We will formulate new businesses and carry out reforms through DX and EX, while responding to geopolitical risks based on our business intelligence.
Q In these changing times, could you explain what the MC Group’s vision and mission are?

A The MC Group has held the Three Corporate Principles as its corporate philosophy since the beginning, and aims to respond to the changing business environment and meet societal needs in order to achieve sustainable growth together with society through the simultaneous generation of economic, societal and environmental value.

Although the MC Group has faced various crises since its founding, under our corporate philosophy, the Three Corporate Principles (Corporate Responsibility to Society, Integrity and Fairness, and Global Understanding Through Business), we have continued to grow together with society by identifying changes in the world and endeavoring to provide solutions accordingly.

Different times call for different actions, and what it is most important is how we read the present situation and what challenges we undertake as we keep a close eye on future developments.

In particular, with regard to environmental issues, the transition to a low-carbon/decarbonized society has been accelerating in recent years. I believe that by pursuing energy sector reform through EX, we will promote the spirit of Corporate Responsibility to Society set out in the Three Corporate Principles by striving to create a physically and spiritually fulfilling society and helping to conserve our irreplaceable global environment.

The MC Group has articulated a corporate vision of pursuing sustainable growth by simultaneously generating economic value, societal value and environmental value. Since its founding years, MC has been a company that has passed down and embodied the spirit of contributing to the sustainable development of society. Under Midterm Corporate Strategy 2021 as well, we aim to create sustainable corporate value through the generation of triple-value growth.

Q As MC pursues the simultaneous generation of triple-value growth, what are your thoughts on the Group’s employees and management professionals?

A Employees are our most important asset. Employee growth and company development will progress hand in hand.

Employees are MC’s greatest asset, and there can be no sustainable development for the company without employee growth. For that reason, we have proceeded with HR system reforms as set out in Midterm Corporate Strategy 2021. I want our employees to become professionals in specific fields over a period of five to ten years, and after that to accumulate management skills through participating in a variety of fields. To that end, I think it is the responsibility of the company and the role of management to provide continuous opportunities for employees to engage in business management and actively participate as management personnel. In the second year since the introduction of the new HR system, the promotion of young employees is progressing and the number of employees in their thirties with management responsibilities is increasing.

MC has more than 130 Business Units, and the seeds for next-generation businesses lie dormant in each of them. Discovering these New Seeds of Growth and cultivating them into Growth Drivers and Core Businesses is a growth mechanism unique to MC. The traits required to accomplish this are the foresight to consider the optimal structure of an industry as a whole and the execution skills to achieve that growth by obtaining the understanding and support of others. While applying this type of personal magnetism and industry knowledge grounded in an understanding of the business, I would like every employee to continue pursuing initiatives to improve frontline operations and, eventually, to reform industrial structures with new perspectives unconstrained by existing frameworks.
Q What is your current assessment of Midterm Corporate Strategy 2021, and what future direction will MC take?

A We are steadily advancing strategies such as expanding downstream and service sector businesses in our portfolio, transitioning to the implementation stage of DX and introducing a new HR system, and we will accelerate these initiatives going forward.

Since I became President and CEO in 2016, we have reviewed the asset weight of the businesses in our portfolio that are most susceptible to fluctuations in resource prices, such as mineral resources and shale gas, and we have implemented asset reshuffling and optimization aimed at achieving an optimal balance of market-related segments and business-related segments. In addition, we have extensively considered new initiatives, such as strengthening our downstream and services sector businesses.

As part of this effort, we acquired the integrated energy company Eneco in March of this year after obtaining preferential negotiating rights last November. Eneco is a business operator on the cutting edge of renewable energy that will become a strategic base for MC's renewable energy businesses in Europe. We are formulating a growth plan to apply Eneco’s knowledge, which will become increasingly in demand going forward, not only in the European region, but also globally.

In December of last year, we agreed to form a business partnership with NTT Corporation to establish an Industrial DX Platform. Furthermore, in May of this year, the two companies acquired an equity stake in HERE Technologies, based in the Netherlands. In this way, we have been making strategic moves to promote DX.

In any given business, there are producers and distributors, and the value they add in the process is ultimately passed on to consumers. Together with NTT, we will endeavor to generate added value through data utilization, starting with the food distribution industry. For instance, food companies devote themselves to making delicious products, and this should be their field of competition with other companies. However, in reality, they are involved in a wide range of business processes, including distribution and other incidental operations. To boost the international competitiveness of an industry, we believe it is important to create an environment that enables focused input of corporate management resources in the competitive arena. Conversely, in other non-competitive areas, we should build a platform through digital innovation to improve efficiency and optimize processes.

MC plays the role of intermediary in the food distribution industry, and we have established and nurtured relationships with numerous manufacturers and wholesalers. We feel that one of the roles expected of us is to utilize the data we have accumulated, as well as our networks, to carry out structural reform by leveraging efficiency improvements in transportation, warehousing and other aspects of food distribution. Improving logistics efficiency and warehouse operations is mainly carried out on a conventional scale, and this is where the benefits of developing a common platform could be enormous. Now is the time to find optimal solutions by collecting and analyzing data across numerous businesses and by utilizing AI. We will start by implementing this plan within the MC Group to confirm the merits. Ultimately, involving companies from within and outside the food distribution industry with similar needs will increase efficiencies and promote benefits of scale. Moreover, improving these types of cross-industry operations through DX will also lead to solutions for social and environmental problems, such as reductions in food loss and carbon emissions.

Besides food distribution, MC is involved in virtually every industry in Japan. By identifying and solving issues, we will work tirelessly to accomplish industrial structure reforms that can boost our competitiveness.

Once again, I would like to request the understanding of our stakeholders that, despite the difficult business environment amid the global economic downturn, the MC Group will pool its strengths to contribute to structural reform in each industry, aiming to realize sustainable growth in the medium and long term by addressing social and environmental issues through our business.
# Midterm Corporate Strategy Progress and Highlights

## Achieving Growth Through Business Management Model

In the fiscal year ended March 31, 2020, MC steadily continued to carry out asset replacement as well as to further initiatives in downstream businesses connected to the customer base and IT, logistics and other service fields amid a severe environment facing a deceleration of the world economy and the impacts of the COVID-19 pandemic.

### 01 Business Portfolio
- Continued portfolio asset replacement to remain resilient in a harsher business environment
- Advanced initiatives in downstream businesses and the service sector
  - Enhanced downstream businesses, such as by acquiring Eneco, a comprehensive European energy business
  - Advanced initiatives in the service sector, such as the conclusion of an investment agreement with the world’s leading location-based service company HERE Technologies

### 02 Growth Mechanisms
- Value-Added Cyclical Growth Model & improved ROE
  - Steadily replaced assets after enhancing business value, such as divesting from power generation investments overseas
- Enhancement of new business concepts & digital strategies
  - Transitioned digital transformation (DX) initiatives from the concept to execution stage
  - Pursued industrial digital transformation by forming a companywide Industrial DX Task Force and through a business partnership with NTT Corporation

### 03 HR System Reforms
- Started a new HR system aiming for the continuous development of highly skilled management professionals
- Fully introduced evaluation and compensation systems to ensure reciprocal growth between the company and its employees

### 04 Financial Targets & Capital Policy
- Consolidated net income for the fiscal year ended March 31, 2020: ¥535.4 billion; financial forecast for the fiscal year ending March 31, 2021: ¥200 billion
- Continued progressive dividends under a capital policy based on financial discipline
  - Dividends in the fiscal year ended March 31, 2020: ¥132; dividends forecast for the fiscal year ending March 31, 2021: ¥134

## Changes in the External Environment

- Global economic downturn amid the spread of the COVID-19 pandemic. Double shock impacting both supply and demand caused a sudden drop in oil prices and contraction of economic activities.
- Potential for the ideals of globalization to shift from the conventional pursuit of higher efficiency amid increased geopolitical uncertainty, with the US and China competing for global dominance and the rise in nationalism in various countries.
- Digital transformation (DX) is expected to expand beyond borders and industries, as well as to become an essential element of infrastructure supporting flexible and mutual cooperation, due to factors including technological advances and shifts in people’s values.
01 Business Portfolio

- Continued replacing portfolio assets (approx. ¥2 trillion over four years) to remain resilient in a harsher business environment
- Advanced initiatives in downstream and service fields, such as the acquisition of Eneco and investment in HERE Technologies

### Overview of Eneco

A major European clean energy company with the mission to be “Everyone’s Sustainable Energy”

- Date established: 1995
- Located: Netherlands (Rotterdam)
- Business Field: Comprehensive energy business supplying power, gas and heat
- Employees: Approx. 3,000

### Eneco’s Business Portfolio

- **Power Generation Division**
  - 10 TWh*1

- **Trading Division**
  - 30 TWh

- **Retail Division**
  - Customers (B2C/B2B)

*1 Eneco power generation
*2 Power procurement from third-parties and markets in addition to Eneco power generation

---

TOPICS

Joint investment with Chubu Electric Power in Eneco, a company developing a comprehensive European energy business (approx. ¥500 billion)

- Eneco joined the MC Group as a company that provides new services with functions to adjust supply and demand via renewable power generation and digital technologies as well as a customer network of six million contracts
- Eneco promotes cross-industry initiatives that leverage MC’s customer network
- Eneco strengthens MC’s business portfolio in downstream businesses and contributes to resolving social challenges related to the realization of a low-carbon society through the supply of clean energy
In the food distribution field, retail businesses aim to leverage sales data and other information to dramatically reduce waste from inventory and retail shops by incorporating demand forecasts using AI. These businesses are also taking advantage of the latest technologies to encourage the integration of product codes that differ between companies, as well as to vastly reduce labor costs resulting from conversion work and other tasks. These innovations will contribute to the optimization of the entire value chain.

The industrial material logistics field is suffering from an extreme shortage of labor. Distribution warehouses will strive toward labor savings and full automation.

Leveraging HERE’s location-based technologies and solutions, MC will convert real infrastructure into digital data to further new business creation such as efficient shipping and the optimization of urban transport.

MC will accelerate the promotion of DX across industries through the organic integration of ICT technologies from NTT Corporation with its industrial expertise and foresight. MC will also engage in broad collaboration with other corporations and startups worldwide.
03 HR System Reforms

- Ongoing execution of measures that contribute to the continuous development of highly skilled management professionals
- Fully introduced evaluation and compensation systems to ensure reciprocal growth between the company and its employees
  > Started operation of a new HR system based on the four key policies below.

(1) Support employees’ self-growth and company growth
(2) Ensure employees gain the right experience earlier
(3) Ensure meritocratic systems so that the right people are assigned to the right positions
(4) Utilize highly-skilled management talent throughout the MC Group and realize more appropriate benefits

Improve Level of Skill and Career Development Through Growth Dialogues

- Growth dialogues were adopted as a system to encourage employees’ self-growth and the support for that growth from superiors and colleagues. Separate from performance evaluations, employees focus on reviewing their skills and career development with superiors to effectively heighten their growth as employees.
- Employees receive feedback from their colleagues about their strengths and weaknesses before talking with managers, and also undergo a 360-degree management review. Observations from many different people stimulate change and encourage each employee to develop their skills.

04 Financial Targets & Capital Policy

- Consolidated net income for the fiscal year ended March 31, 2020: ¥535.4 billion; financial forecast for the fiscal year ending March 31, 2021: ¥200 billion due to the effects of COVID-19
- Continued progressive dividends under a capital policy based on financial discipline
  > Dividends in the fiscal ended March 31, 2020: ¥132; dividends forecast for the fiscal year ending March 31, 2021: ¥134

Midterm Corporate Strategy 2021 Period

Progressive Dividends

MITSUBISHI CORPORATION
Message from the CFO

Enhancing shareholder returns by transforming our business portfolio while maintaining financial discipline and a progressive dividend scheme

Over a year has passed since the publication of Midterm Corporate Strategy 2021, and we have made steady progress toward replacing assets while executing new investments in line with the original plan. This has enabled us to make headway on transforming our business portfolio to preserve our financial discipline. However, due to the unprecedented threat of the COVID-19 pandemic, also known as the “Corona Shock,” the fiscal year ending March 31, 2021 got off to an unusually severe start with the first quarter financial results showing losses in three Business Groups. The outlook remains unclear as to when the COVID-19 pandemic will subside, and the business environment is far from normal. Under these circumstances, all MC Group employees must work together with a sense of crisis to steadily implement the management policies laid out in Midterm Corporate Strategy 2021 in order to overcome this difficult situation.

Kazuyuki Masu
Member of the Board, Executive Vice President
Corporate Functional Officer, Chief Financial Officer
A look back at the fiscal year ended March 31, 2020, the first year of Midterm Corporate Strategy 2021, and a look ahead to the fiscal year ending March 31, 2021.

Financial Performance in the Fiscal Year Ended March 31, 2020—Offsetting Lower Profits with Asset Replacement

The MC Group’s consolidated net income for the fiscal year ended March 31, 2020 was 535.4 billion yen, a decrease of 55.3 billion yen from the previous fiscal year. Profits fell in reflection of depressed market conditions and a severe business environment influenced by US-China trade frictions and the global economic downturn. However, in addition to a bounce back from the large losses reported in the previous fiscal year, the decline in profits was partially offset by divestment gains in conjunction with a restructuring of our Chilean copper business as well as accelerated asset replacement. Amid this difficult business environment, we took several impairment charges, which were reflected in our financial results along with the steady implementation of asset replacements outlined in Midterm Corporate Strategy 2021. However, despite the current background of weakening resource prices, impairment losses in the resource segment have not been relatively large. The major factors behind this have been provisions to allowances taken in the fiscal year ended March 31, 2016, a deficit year, and the fact that MC has mostly withdrawn from upstream crude oil development projects. We believe this is a result of initiatives to increase our resilience against a deteriorating business environment driven by the replenishment of our business portfolio.

Portfolio Transformation through Large-Scale Investments in Fields in the L-Shaped Portion Presented in Midterm Corporate Strategy 2021

Regarding cash flow, cash flow from operations was 672.1 billion yen as a result of operating revenues and dividend income. Cash flow for investment was 500.7 billion yen due to large-scale new investments such as the acquisition of Eneco, while cash flows were generated by divestments from asset replacement. As a result, free cash flow after adjustment was 171.4 billion yen. While cash flow from operations is down due to the impact of COVID-19, we must face this tough business environment with tenacity by maintaining our financial discipline and by keeping a strong grip on MC’s financial soundness.

Trends in Consolidated Net Income and Outlook for Fiscal Year Ending March 31, 2021

(Unit: billions of yen)
The investment leverage ratio, which we have established as a reference indicator for financial discipline, was 56% at the end of the fiscal year ended March 31, 2020—above our target range of 40–50%. However, we believe this is a temporary effect from moving up large-scale investments and share buybacks (each accounting for around seven percentage points of the financial leverage ratio). Accordingly, we will manage the ratio so that it remains within the target range for the remaining two years of Midterm Corporate Strategy 2021.

Moreover, despite the severe outlook for our earnings forecast for the fiscal year ending March 31, 2021, this policy expresses management’s unwavering commitment to keep with its progressive dividend scheme.

### Expecting a Dividend Increase Following the Completion of Share Buybacks

The dividend outlook for the fiscal year ending March 31, 2021 is to continue the progressive dividend scheme outlined in Midterm Corporate Strategy 2021 through a two yen per share increase over the previous fiscal year to 134 yen per share. This will lead to higher cash dividends per share. On one hand, the number of shares covered by a dividend payment is lower due to the completion of 300 billion yen in share buybacks as decided upon in May 2019, while on the other hand, the total amount of dividends paid will be maintained at the same level as last year.

Moreover, despite the severe outlook for our earnings forecast for the fiscal year ending March 31, 2021, this policy expresses management’s unwavering commitment to keep with its progressive dividend scheme.

### The MC Group Coming Together to Overcome Global Challenges

After considering the impacts of a large drop-off in automotive demand together with falling resource prices as a result of the COVID-19 pandemic, our earnings forecast for the fiscal year ending March 31, 2021 is for a profit of 200 billion yen. Due to COVID-19, it is essential that MC maintains the financial health of its core businesses while formulating changes to its business structure. We must also manage cash flow and relieve the downward pressure on our financial rating by encouraging divestment and strict scrutiny over investments.

One concrete example is to quickly exit businesses where deficits have continued for a certain period, as well as businesses with low-profitability, and in doing so, improve MC’s foundational strength.

Despite the severe business environment, MC Group employees will work together to overcome these current global challenges.

### Cash Flow Trends

*1 Operating cash flows after deducting change in working capital (consolidated net income (including non-controlling interests) – DD&A – profits and losses related to investing activities — equity in earnings of affiliated companies not recovered through dividends – allowance for bad debt, etc. – deferred tax).

*2 As a result of the adoption of IFRS 16 “Leases,” the payment of lease obligations (276.2 billion yen) in the fiscal year ended March 31, 2020 is not included.

*3 Underlying operating cash flows: Operating cash flows after deducting the effect of changes in working capital (after payment of lease obligations).

Reflects the payment of lease obligations in (consolidated net income (including non-controlling interests) – DD&A – profits and losses related to investing activities — equity in earnings of affiliated companies not recovered through dividends – allowance for bad debt, etc. – deferred tax).
The first year of Midterm Corporate Strategy 2021 is now over. What are your thoughts on the significant changes in the external environment since the strategy was drafted?

A. Our basic policy has not changed. While MC continues to both maintain positive free cash flow after dividends and preserve its financial soundness without increasing its interest-bearing liabilities, it also strives for improved ROE under a business management model by achieving growth in its existing businesses and by executing new investments for future growth. As a result of the worsening business environment centered around COVID-19, things have not gone as we had initially assumed. However, we are quickening the pace of asset replacement based on our Value-Added Cyclical Growth Model, which will be able to make up for some of the decline in underlying operating cash flows.

By carrying out large-scale investments including the Eneco acquisition, we had large cash outflows in the fiscal year ended March 31, 2020, but these had already been incorporated into our plans. Since our current management system went into effect in the fiscal year ended March 31, 2017, we have consistently shown positive free cash flow after dividends are paid (after deducting for working capital effects). We have a basic policy of not increasing interest-bearing liabilities and will also preserve our financial discipline in the future because of this policy.

The dividend payout ratio is on an upward trend. How do you view your shareholder returns policy in the future?

A. We will continue our progressive dividend scheme. As stated in Midterm Corporate Strategy 2021, MC expects to continue paying progressively higher dividends, and in this way will enhance its shareholder returns. Profits have fallen due to the impact of the global economic downturn amid the COVID-19 pandemic, but this only includes non-cash flow items. Underlying operating cash flow has not declined as much as profits, so we do not foresee any barriers to continuing our progressive dividend scheme.

For share buybacks on the other hand, we aim to continue our capital controls and position them as a capital policy to be implemented dynamically. Specifically, we have adopted an approach based on providing capital coverage for risk assets using the investment leverage ratio as a management indicator. However, in a situation where investment is constrained for a long period and excess capital is generated, capital compression through share buybacks could become an option.

There is no change in what needs to be done. While preserving a strong balance sheet, we will proceed with returning capital to shareholders and making investments for future growth.
Given the impacts of COVID-19, the soundness of MC's financial foundation will likely take on more importance than before. What on your thoughts on MC's financial foundation and financial discipline?

A. Due to our strict scrutiny of investments and divestment of assets, we are exercising rigorous control over cash flow and are maintaining our financial discipline.

Even before COVID-19, the business environment was becoming more severe, and ever since Midterm Corporate Strategy 2021 was drafted, the idea was not to put the full amount of underlying operating cash flows to use. Rather, we envisioned that the projected underlying cash flows would not be sufficient for executing all of the investment projects we had planned. Consequently, when investment projects are carried out, we incorporate a mechanism for requiring divestment of other assets. In fact, we are seeing not only withdrawal proposals but also forward-looking projects that are producing capital gains, so the mechanism is functioning effectively throughout the Company.

We intend to preserve a stable balance sheet thanks to MC's rigorous cash flow management. The result is a stricter investment policy to select projects with the highest potential to contribute to growth, while at the same time responding effectively to downward pressure from rating agencies amid the severe business environment.

What do you take into account when making an investment? In the current investment environment, buying opportunities are showing up and contrarian investments are also an option. How do you perceive the current conditions?

A. For both market follower and contrarian investments, high-quality projects will be examined and considered for execution.

On the topic of market follower investing or contrarian investing—that is investing in line with rising or falling trends in stock prices—it is a common belief in our industry that MC only deals with market follower investments. That said, simply setting contrarian investing as the companywide management policy invites the risk of making decisions on price alone and buying what is cheap regardless of the field of business. What we are thinking about most is reflecting on the past and changing our culture of favoring market follower investments. Assuming there are investment opportunities for high-quality projects that fit within our optimal business portfolio, we should scrutinize them carefully and then consider making the investment.

Please tell us about your future growth strategy and your investment strategy to raise corporate value.

A. We aim to improve ROE through our Value-Added Cyclical Growth Model.

As our growth strategy, we intend to focus investment in the fields in the L-shaped portion of the business portfolio matrix presented in Midterm Corporate Strategy 2021. By expanding into downstream fields with our upstream-heavy portfolio, I believe we can build a well-balanced portfolio that covers the full range from upstream to downstream. For this reason, we have undertaken large-scale investments to transform our business portfolio, including the acquisition of Eneco and our involvement in HERE Technologies.

Our goal of increasing ROE has not changed from when Midterm Corporate Strategy 2021 was first laid out, so we will move ahead with the Value-Added Cyclical Growth Model to achieve this goal. We have also set the investment leverage ratio as a management indicator, and we plan to exercise control over our capital by flexibly making stock repurchases with any excess capital.

Looking at individual businesses, we see that there may be some very low-risk businesses as well as some very high-risk ones, such as those in the resource area. As a result, instead of asking that all businesses provide the same ROE and yield, we demand a high yield and a high internal rate of return (IRR) for high-risk businesses, whereas a lower IRR would be acceptable in a low-risk business. With regard to how to aggregate this, we have considered moving to become a highly stable, low-risk entity, but should resource prices recover, we would not be able to enjoy the benefits. In the past, profits skyrocketed when resource prices went up, and this has certainly been the source of funds for further investments. MC is not biased in one direction or another, and even if these measures are sometimes seen as being done by halves, the appeal is that we can enjoy the benefits of both.

Finally, regarding the falling cost of capital, I believe it will be essential to improve the confidence placed in us by those in the capital markets. To that end, through measures such as investor engagement and enhanced disclosures, we will strive to gain the understanding and support for our businesses and management policies.
Risk Management

The MC Group’s Risk Management Framework

As the MC Group expands its diverse range of businesses globally, it faces a variety of risks. To maintain our financial soundness and improve our sustainable corporate value, it is crucial that we appropriately manage and respond to various risks. This section explains the MC Group’s Risk Management Framework and related response measures.

Risk Management Framework and Organization Model

Business Groups and dedicated corporate departments that deal with specific risks collaborate on the development of operations and management frameworks that enable appropriate response to risk.

### The Diverse Risks Surrounding the Company

1. **Market Risk**
2. **Credit Risk**
3. **Business Investment Risk**
4. **Country Risk**
5. **Compliance Risk**
6. **Risk of Natural Disasters, etc.**
7. **Climate Risk**

### Supervising organization and Matters for supervision

Note: The above list excludes those items that are related to major risks and those that are explained separately.
1. Responding to Market Risk

MC broadly divides market risk into four types: commodity market risk, foreign exchange risk, stock price risk and interest rate risk. This section explains the impact of these risks on our business as well as our status in managing these risks.

### Financial Impacts of Commodity Market Conditions/Exchange Rates/Interest Rates/Stock Price Risks

- The impacts on MC from specific market fluctuations are shown in the table below.
- Commodity market risks are also present in metallurgic coal, affecting the profit and loss of Mitsubishi Development Pty Ltd (MDP), an MC subsidiary.
- With regard to stock price risk, MC holds marketable stocks with a market value of approximately 850 billion yen and bears stock price fluctuation risk accordingly. The above amount includes a valuation gain of approximately 50 billion yen, and there is a risk that this valuation gain could decrease depending on stock price movements.

<table>
<thead>
<tr>
<th>Fiscal year ending March 31, 2021</th>
<th>Profit and loss impact on the fiscal year ending March 31, 2021 results forecast (For oil prices and copper ore, reference values are given based on current estimates)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exchange rate (yen/US dollar)</td>
<td>108.00</td>
</tr>
<tr>
<td>Oil price (Dubai) (US$/BBL)</td>

<td>0.10</td>
</tr>
<tr>
<td>US dollar interest rate (%) LIBOR 3M</td>
<td>0.50</td>
</tr>
</tbody>
</table>

- The one-year profit impact from the weakening or strengthening of one yen against the US dollar is an increase or decrease, respectively, of 1.5 billion yen.
- The one-year profit impact from a US$1/BBL increase or decrease is an increase or decrease, respectively, of 2.5 billion yen.
- Taking into account effects on MC’s performance from factors including differences in accounting periods of consolidated companies and the time lag before oil prices are reflected in LNG selling prices, the oil price shown is from 6 months earlier. However, as there are impacts not only from oil price fluctuations but also from factors such as dividend payout ratios, foreign exchange rates and production/sales volumes, the profit impact is not determined by oil prices alone.
- The one-year profit impact from an increase or decrease of US$100/MT is an increase or decrease, respectively, of 1.3 billion yen (or an increase or decrease of 2.8 billion yen from a US¢10/lb increase or decrease, respectively). However, as there are impacts not only from copper price fluctuations but also from factors such as ore grade, production/operational status and reinvestment plans, the profit impact is not determined by copper prices alone.
- The impact of rising interest rates is largely offset by profits on transactions and investments. If interest rates rise sharply, however, profit and loss will be temporarily affected.
- The impact of rising interest rates is largely offset by profits on transactions and investments. If interest rates rise sharply, however, profit and loss will be temporarily affected.

### Response to Foreign Exchange Risk

- MC conducts foreign currency-denominated settlements in import/export and trade transactions with foreign countries, resulting in exposure to the risk of exchange rate fluctuations. In response, we employ hedging measures such as forward exchange contracts.
- With regard to foreign currency-denominated investments in consolidated companies, we address foreign exchange risk through hedging operations to control the risk of impairment to equity capital.

### Response to Interest Rate Risk

- As of the end of the fiscal year ended March 31, 2020, total interest-bearing liabilities (excluding lease obligations) were 5.7601 trillion yen, which, with partial exception, is subject to floating interest rates. Accordingly, there is a risk of the interest burden increasing during periods of higher interest rates.
- To manage interest rate risk, MC has established the ALM (Asset Liability Management) Committee to monitor interest rates and other market trends closely, and to respond to market risks quickly. The ALM Committee formulates financing measures and manages risks from interest rate fluctuations.
- In addition to interest rate movements, MC also performs macro analyses of investment projects and examinations of capital policies, as well as discussion and verification of foreign exchange markets. MC makes use of these in examining parameters for companywide business management.
2. Responding to Credit Risk

- MC sets upper limits on credit extended to third parties in order to manage the contract and credit risk involved in transaction credit, loans/guarantees, and investments in unlisted companies. In addition, each business partner is assigned a business partner rating based on an in-house rating system.
- We designate business partners that have a significant impact on the Company as targets for priority management, and regularly monitor our guidelines on risk money (framework), returns, credit protection, etc.

**Individual Project Approval Authority**

- Approval authority is categorized according to amount limits and ratings.

**Approach to Credit Risk Management**

- Estimating appropriate credit costs and promoting improvements in the quality of loans through a reserve system that uses ratings.
- This is used as an evaluation metric for designated business partners that require priority management.

3. Responding to Business Investment Risk

To manage business investment risk properly, MC has established a screening process to review and make decisions on new, existing, re-profiling and each other type of projects.

**New projects**

- Application for policy/Application for implementation
- Narrow down new investment and finance proposals by comprehensively evaluating quantitative aspects in terms of the invested capital and its return determined on the basis of the characteristics of each business, in addition to evaluation of qualitative aspects, including consistency with the business strategy of each Business Group, as well as risk locations and countermeasures.

**Existing projects**

- Business plan formulation
- Once a year, review subsidiaries and affiliates’ management issues and initiatives as well as MC’s functions and business life cycle; select subsidiaries and affiliates for companywide review to follow-up on the business management of each Business Group and report results to the Executive Committee.

**Replacement projects**

- Review regarding continuation of investments
- Conduct qualitative and quantitative evaluations of new investment and finance proposals based on the priority order of Business Group strategies and promote a healthy business metabolism.

**Perspectives on management of individual projects**

- Analysis results on the risk/return of business investments, companywide risks and risk tolerance are reported to the managers, and the risk report is utilized to ascertain the overall status of the businesses and determine policies for capital allocation.

- Business investment performance assessment
- Risk analysis and report

**Companywide management perspective**

- Envisioned portfolio
- Financial soundness
- Positioning of business fields
- Concentrated risk

**Companywide monitoring**

- Companiwide projects
- Group projects

**Management status**

- Prioritize projects

**Application for policy/Application for implementation**

- Sort projects at the entry stage
4. Responding to Country Risk

MC has established a Country Risk Committee and a country risk countermeasure structure to properly ascertain and manage country risk. We also enact appropriate risk hedging measures, such as insuring projects.

Country Risk Committee

- The Country Risk Committee is chaired by the Corporate Functional Officer (Regional Strategy). It is responsible for ascertaining the risk situation in various countries, establishing and managing country risk countermeasure systems, evaluating individual projects, etc.

<table>
<thead>
<tr>
<th>Chairperson</th>
<th>Corporate Functional Officer (Regional Strategy)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vice-Chairperson</td>
<td>General Manager, Global Risk &amp; Insurance Management Department</td>
</tr>
<tr>
<td>Members</td>
<td>Country Risk Committee Members (composed of Full-time Audit &amp; Supervisory Board Members, related corporate general managers, Business Group CEO Office heads, etc.)</td>
</tr>
</tbody>
</table>

Country Risk Countermeasure System

- Under the country risk countermeasure system, MC controls the accumulation of risk through methods such as setting parameters for specific categories based on the credit ratings of each country.
- In addition to risk management through the country risk countermeasure system, MC closely monitors the impact of global economic trends and shifts in international affairs on the political and economic situation of each country in order to flexibly respond to risks based on the current international situation.

5. Responding to Compliance Risks

MC broadly divides compliance risks into three types: risks related to litigation/government investigations, risks related to laws and regulations, and risks related to scandals/compliance issues.

Based on internal rules and regulations related to compliance, MC has established a Compliance Framework and provides support for a Compliance Risk Management Framework on a consolidated basis. Compliance-related measures are enacted through discussions by the Compliance Committee, and these measures are reported to the Board of Directors annually in June.

MC has also set up various whistleblowing helplines and is working to detect and prevent compliance issues at an early stage.
6. Responding to Risks from Natural Disasters and Other Types of Disasters

Crisis Management on a Consolidated Basis/Business Continuity Management (BCM)

Crisis Management Structure on a Consolidated Basis

MC has built up a structure for securing the lives and safety of employees and their families as we respond on a consolidated basis to all crises that impact our profit and business continuity (all-hazard approach) by linking together each Business Group and Regional and National Crisis Management Offices under the management and supervision of the Emergency Crisis Management Officer.

All-Hazard Approach

Based on the all-hazard approach, MC has built up an internal structure that anticipates all kinds of risks, such as major natural disasters, acts of terrorism, riots, emerging infectious diseases, supply chain disruptions, legal transgressions, and cyber incidents, etc. Under usual conditions, we build up and establish various crisis management measures and structures needed in the event that a crisis does occur, so that we can ensure the safety and ascertain the status of all concerned as part of our initial response, and then act promptly to maintain and recover the infrastructure necessary for business continuity.

In particular, in the event of a serious incident impacting the lives and safety of our employees, as well as continuity of critical business operations, we will respond under the companywide direction of the Emergency Crisis Management Officer, while moving forward with our consolidated Business Continuity Management (BCM) process established for major crises.

---

**Note:** While companywide action to deal with serious incidents shall be taken under the direction of the Emergency Crisis Management Officer, compliance-related incidents shall be dealt with under the direction of the Chief Compliance Officer.
Business Continuity Management (BCM) on a Consolidated Basis

In 2018, MC adopted “Business Continuity Management (BCM)” for its core business companies (selected from among MC Group companies) to establish and strengthen our consolidated framework designed to equip us with the business continuity capabilities needed to respond appropriately to major crisis situations.

BCM refers to the comprehensive management and implementation of a continuous PDCA cycle, including the formulation of a first response and Business Continuity Plan (BCP) based on risk/impact analysis of each crisis, the establishment of appropriate systems, and education/training. It takes into account the specific local conditions, operational circumstances and business characteristics of operational companies.

**Business impact analysis framework**

We conduct analyses of the “cause incidents” that disrupt core operations and trigger “result incidents,” while taking into consideration the characteristics of operations at each company.

- **Cause incidents:** Natural disasters, infectious diseases, technology-related, external incidents, internal faults, legal issues, third-party related
- **Result incidents:** Human resources (death/unconfirmed safety, inability to report/commute to work), physical resources (damage of manufacturing/distribution or other facilities), supply chains (disruption of distribution channels, disruption of material/fuel supply), information (breakdown of IT systems or damage to electronic data, data manipulation/alteration, information leakage), reputation (product or service quality issues, environmental problems, administrative penalties), money (suspension of cash withdrawals, suspension of remittance or payments)

**The COVID-19 Response and Awareness of Issues Regarding Future Crisis Management/BCM**

**Q: Tell us about your response to COVID-19 up to this point.**

From the early stages in January 2020, our Emergency Crisis Management Headquarters, with the help of occupational physicians, was closely scrutinizing the situation both domestically and overseas. We promptly took necessary measures that focused on preventing employee infections and halting the spread of infection, in tandem with maintaining appropriate business continuity.

In Japan, we led other companies by shifting to a system in late February of working from home in principle. In addition, under the official emergency declaration in April and May, we adopted a general approach that placed the priority on the safety of employees, encouraging self-restraint in business travel and group dining while thoroughly implementing working from home for all operations except those essential to maintenance of the corporation.

These efforts exceeded those required by government and local administrative authorities (reduction of opportunities for physical contact by 80%, and reduction in number of workplace attendees by 70%), so I think that we responded well to this emergency.

Following the lifting of the emergency declaration, we began a phased easing of restrictions. Starting in July, we adopted a provisional policy for coping with COVID-19, taking ample countermeasures against infection while increasing productivity. We promoted creative business activities and operations by shifting to this new phase aimed at establishing a work structure that optimally combines workplace attendance and working from home for each organization.

Of course, if the situation with infections worsens drastically in the future, we will take measures as necessary in light of the policies of government and local administrative authorities.

**Q: Tell us about the responses at your overseas locations and Group companies.**

Overseas as well, we have scrutinized the circumstances in each country concerning the spread of infection and healthcare, promptly taking such measures as removing employees and their families from a given country, or shifting office operations to work-from-home arrangements. Depending on the country, there are cases in which infections are on the way to being controlled, and the various restrictions have begun to ease back. MC will, however, continue to sufficiently confirm the safety of the situation in each country as we work on appropriate business continuity.

**Q: What future crisis management and BCM issues are you aware of?**

Regarding the MC Group BCM policy that we adopted in 2018, we are further strengthening and enhancing our capabilities for business continuity on a consolidated basis, while reconfirming the status of our critical business companies’ structures—both domestic and overseas—in light of the impact of the recent COVID-19 pandemic and our response to it.
7. Responding to Climate Risk

Policy

Climate change is one of the key issues for management to address as MC strives to achieve sustainable growth. MC aims to fulfill its mandate to meet the demand for energy while contributing toward the achievement of international goals such as those expressed through the SDGs and the Paris Agreement. Working closely together with each company in the MC Group, MC strives to achieve this goal through collaboration with a wide range of stakeholders including governments, companies and industry associations.

Furthermore, as we recognize the importance of climate-related financial disclosures, we support the TCFD*, which has proposed disclosure guidelines, and we are working to enhance the disclosure of information in accordance with those guidelines.

Governance

As an important management issue, the Executive Committee determines the basic policies and other important matters regarding climate change, and reports these to the Board of Directors on an annual basis. In addition to seeking advice and recommendations from the external experts of the Sustainability Advisory Committee, the Sustainability & CSR Committee discusses matters thoroughly before they are brought to the Executive Committee.

Discussions focus on policies regarding climate change, such as climate-related initiatives through business and policies for addressing the TCFD. Other important matters such as methods to evaluate climate risks and opportunities (including scenario analysis) and greenhouse gas reduction targets (including the status of reductions) are also discussed.

Reference: Please refer to pages 48-49 for information on MC’s Sustainability Promotion Framework.

Risk Management

Key climate risks and opportunities are assessed through internal and external surveys which are then evaluated and identified by the Sustainability & CSR Committee, in which all Business Group CEOs participate in discussions. These risks and opportunities are managed under the above Governance Framework.
Strategies

Transition Risks and Opportunities

**Scenario Analysis**

**STEP 1** Selecting climate scenarios

**STEP 2** Identification of businesses most affected by climate change

**STEP 3** Identification of risks and opportunities

**STEP 4** Determining businesses to be monitored

**Results of the 2ºC Scenario Analysis**

**Power Generation (Fossil Fuels)**
Business opportunities for fossil fuel power generation are expected to decline. Based on this outlook, MC will aim to reduce its coal-fired power generation capacity on a net equity basis. In addition, MC has adopted a policy not to enter into any new coal-fired power generation businesses.

**Metallurgical Coal**
While the expansion of the electric furnace method and the proliferation of new technologies are predicted to affect the demand for metallurgical coal, from a cost-competitiveness and quality standpoint, MC expects to maintain its advantage in the metallurgical coal business to a certain extent.

**Natural Gas**
Although global gas demand is projected to maintain the same level after 2030, MC expects to be able to keep its businesses highly competitive through such means as selecting and launching new competitive projects to meet demand increases.

**Automobiles (Passenger cars/Trucks)**
Although the shift from internal combustion engine vehicles to electric vehicles is expected to progress, MC anticipates that internal combustion engine vehicles will be the primary demand in its key market of ASEAN. MC will monitor trends in each country and contribute towards the proliferation of plug-in hybrid and electric vehicles.

MC has set the following climate-related targets to capitalize on opportunities and mitigate risks on a consolidated basis.

| Aim to reduce emissions per total assets*2 by 25% by 2030. | By 2030, aim to achieve at least 20% renewable energy in MC’s power generation business (based on generation amount). |

*2: The total assets used for this target represent the numerical values within the emissions reporting range, which differ from the total assets reported in MC’s financial reports.

*3: Compared to fiscal year ended March 2017 levels. Greenhouse gas emissions on a consolidated basis (MC on a non-consolidated basis plus subsidiaries).

Our Sustainability

MC’s Value Creation
The External Environment surrounding MC’s Sustainable Growth

In 2020, the global outbreak of COVID-19 created unprecedented disruption, and the uncertain outlook for the external environment persists. Even before the pandemic, global shifts such as heightened US-China tensions and a wave of digitalization were already ushering in a new era. As economies and societies worldwide continue this transformation, MC and its Group companies must utilize their collective capabilities to respond.

In recent years in particular, we have seen developments such as the Sustainable Development Goals (SDGs), the Paris Agreement and the Task Force on Climate-related Financial Disclosures (TCFD). In addition, movements toward low-carbon and decarbonized societies, the expansion of ESG investing, stricter laws and regulations, and the need for a sustainable recovery from COVID-19 are leading to a wider recognition that sustainable corporate growth is tied to the simultaneous generation of not only economic value, but also societal value and environmental value.

Amid these circumstances, we will act in accordance with the Three Corporate Principles, which have served as MC’s guiding philosophy since its founding, to stay on top of global trends and to offer solutions to societal issues and needs by uncovering new business opportunities.
Toward Value Creation through the Simultaneous Generation of Triple-Value Growth

Based on the Three Corporate Principles, which have served as MC’s guiding philosophy since its founding, MC has continued to pass down the ideals of promoting integrity and fairness through its global business and contributing to the sustainable development of society.

We will continue to work to simultaneously generate triple-value growth, to contribute to the achievement of the SDGs and to raise corporate value by addressing our Key Sustainability Issues, which are issues for management to address to promote sustainable growth. To accomplish these goals, we will leverage the diverse and capable management capital of the entire MC Group by applying the three core strengths of collective capabilities to adopt a holistic view across numerous industries, the foresight to identify New Seeds of Growth, and the execution skills to achieve that growth.
Global Partnerships that Facilitate Business Development in Diverse Industries

Global Network
MC has been developing a network to drive its next phase of major growth by continually enhancing its ability to respond to change, as well as by encouraging collaboration through the efficient and effective division of labor among the Head Office, MC offices and subsidiaries and Group companies.

**Head Office**
- Fully utilize information obtained from the global network
- Execute decision-making aimed at maximizing corporate value

**MC Offices and Subsidiaries**
- Provide intelligence that contributes to new business opportunities and management by integrating local knowledge
- Laterally support the growth of Group companies

**Group Companies**
- Achieve growth through business management
- Acquire intelligence closely tied to frontline business activities

Customers and Partners in a Wide Range of Industries
MC has long contributed to the development of societies and economies by working with its customers and partners all over the world to develop various businesses that it could not have realized on its own. These good relationships are built up day by day as our irreplaceable assets that span the past, present and future.
In May 2020, MC and Nippon Telegraph and Telephone Corporation (NTT) completed joint investment in HERE Technologies (HERE).

By combining MC’s knowledge and network built from a wide range of industries, NTT’s strengths in technology, and HERE’s cutting-edge location data services, the companies aim for transformation via a business model that functions across industries, and to achieve solutions to societal issues.

For more than 30 years, HERE has provided the automotive industry with location data and services for car navigation. It has become the global leader in location data services, with 4 out of 5 vehicles sold with embedded navigation systems in North America and Western Europe coming equipped with HERE maps.

Established: 1985 in Silicon Valley
Shareholders: A mix of auto manufacturers, suppliers and technology companies, comprised of Audi, BMW, Bosch, Continental, Daimler, Intel and Pioneer
Core business: Provision of location data to manufacturers of automobiles and car navigation systems
Scope of operations: 200 countries/regions worldwide
Workforce: Approximately 9,000 employees, mainly based in the US, Germany, the Netherlands and India

Aided by connectivity, location data plays an important role in today’s world, helping to save resources, times and lives as well as improve asset management. We’ve gone beyond navigating from point A to point B. Location intelligence today is about shaping better real-world outcomes. Positioning ourselves as an open and accessible location platform, we’re reinventing the concept of maps by unlocking the power of location intelligence to develop solutions for the challenges of tomorrow, such as urban congestion, last-mile delivery and 5G network planning.

Through this alliance with the MC Group, with its ties spanning diverse industries and regions, we look forward to having the chance to expand our activities, especially in Japan and throughout the Asia Pacific. We are on track to deliver the first solutions for fleet management and last-mile delivery in Japan using the HERE platform. We will continue to pioneer innovative use-cases to solve real-world issues.

“Single arrow is easily broken, but not ten in a bundle.”

As this Japanese proverb suggests, there is much to be gained by working together. We are eager to pursue far-reaching collaborations with MC Group companies around the globe. Because it’s only together that we move the world forward.

Message from Edzard Overbeek, CEO of HERE Technologies

Established record as a supplier of location information

Edzard Overbeek
CEO
HERE Technologies
MC has worked to create value by adapting its business model in response to changes in the external environment. Currently, we are confronting a number of significant shifts in our business environment, including industry-spanning business model transformations and changes to the geopolitical landscape, at a level that can truly be described as the Fourth Industrial Revolution. As the speed of external change accelerates and societal demands upon our Company continue to evolve significantly, our employees possessing the following capabilities and attributes will be responsible for ensuring our sustained growth.

### The Three Core Strengths Required of Our Employees

**Foresight**
- Determine the true nature of one’s own business and function, anticipate changes in the internal and external environments, and develop forward-looking strategies

**Execution skills**
- With teamwork as a prerequisite, demonstrate leadership and the ability to develop talent, drive the organization forward and see efforts through to the end

**High moral and ethical standards**
- Maintain highly ethical standards and earn the respect of all stakeholders

### HR Development Policies at Mitsubishi Corporation

With the aim of continuously developing management professionals, MC engages in the following stepwise HR development programs based on career stage.

- **Frontline Professional Development**
  - Within a certain amount of time after joining the Company, MC gives employees the chance to accumulate a variety of in-depth experience in Group companies and other frontline locations, while interacting with internal and external stakeholders directly, for early development into frontline professionals.

- **Practical Application of Management Experience**
  - Through the management of people, organizations and projects, MC further develops employees into management professionals who can deliver results.

- **Application as Management Professionals**
  - MC develops professionals who are capable of transcending fields and taking the lead of larger organizations and projects to deliver results.
People are MC’s greatest asset. This has always been the case and it will surely continue to be so. Furthermore, our business is undergoing significant changes. No longer limited to trading, our corporate structure has shifted from investment to a business management model where growth is achieved by having employees take on assignments in Group companies and proactively generate value from the front lines of the business. Midterm Corporate Strategy 2021 aims to accelerate this trend in order to seek further growth. I believe that the driving force behind this growth will be the professionals who are equipped with the capabilities and attributes shown on the opposite page, who have a passion for increasing corporate value with a management-focused mindset—in other words, management professionals. In April 2019, we revised our HR system with the aim of continuously developing these types of management professionals in order to foster reciprocal growth between the Company and its employees.

Even under this new system, our fundamental philosophy of empowering highly capable and motivated employees to be able to make active contributions regardless of gender, age, nationality or other attributes, and of appropriately rewarding such efforts is maintained. We also share this philosophy on a global, consolidated basis. With the aim of establishing vibrant workplaces, we continue our efforts to pursue new working styles that can encourage the engagement of our diverse pool of talent, support women’s careers, and advance productivity and efficiency.

**Message from Corporate Functional Officer (CDO, Human Resources, Global Strategy)**

MC’s off-the-job training (OFF-JT) is designed to equip employees with the necessary knowledge and competencies to sharpen the abovementioned traits at each of their Job Grades and at the right stages of their careers. Furthermore, to promote employees’ self-growth, MC is providing them with more opportunities for proactive learning and self-improvement. MC’s HR training programs support the career development of all employees throughout the MC Group, including those at MC’s parent company, its overseas offices and its Group companies in Japan and around the world.

Specific Examples of Training Programs

**Global Trainee Program**

In principle, this program’s purpose is to provide all employees with overseas experience within their first eight years with MC to keep pace with the advancing globalization of MC’s business. Focusing on international on-the-job training (OJT), this program includes assignments to overseas business schools and assignments for culture and language training. Approximately 100 employees take part in the program every year.

- **Europe/Africa**: 14 trainees
- **Middle East/Central Asia**: 3 trainees
- **East Asia**: 8 trainees
- **Asia/Oceania**: 45 trainees
- **North America**: 14 trainees
- **Latin America & The Caribbean**: 2 trainees
- **Total**: 86 trainees (from 23 countries)

**Notes**

1. The numbers of trainees per region are shown proportionally because some trainees’ assignments are divided between more than one country or region.
2. In the fiscal year ending March 21, 2021, the measures the Company is taking due to the impact of COVID-19 include the suspension of new assignments.

**Innovators’ Program**

Run by MC with the support of professors from Stanford University, this program is held in Silicon Valley and aims to nurture the conception skills necessary to grow business value. It is a good platform for learning about design thinking and other thought processes that inspire innovation, as well as the background and mechanisms behind the rapid growth of Silicon Valley enterprises.
Diversity Management

MC believes it is important to create vibrant workplaces where each and every employee can embrace diversity and make meaningful use of his or her respective talents, as well as to promote the development of and utilization of employees on a global, consolidated basis. Led by the Diversity Office within the Global Human Resource Department, MC is implementing a system that encourages diverse human resources to play an active role, and is also pursuing various initiatives that focus on nurturing a corporate culture that embraces diversity.

Building a Corporate Culture that Embraces Diversity

We hold training sessions and seminars as an initiative to nurture a culture that embraces diversity. In the fiscal year ended March 31, 2020, we held a virtual reality (VR) seminar on the theme of unconscious biases, and seminars for leaders on work styles and management.

Supporting Women’s Careers

MC has in place a support system for balancing work and childcare, such as setting up a childcare concierge in-house, providing a daycare center to support a smooth return from maternity leave, and implementing a childcare service to coincide with long school holidays. We are also working on career support measures, such as the introduction of a re-employment system for those who had previously left the Company due to their spouses’ job transfers, the setting up of career support through representatives appointed from each division and group, and support when assigned overseas accompanied only by children.
Overview and Identification Process of Key Sustainability Issues (Materiality)

Simultaneous generation of economic, societal, and environmental value is essential for the MC Group’s growth. From this perspective, in 2016 MC identified a set of Key Sustainability Issues (Materiality) as mileposts for proactively realizing the simultaneous generation of triple-value growth, and as management issues for achieving sustainable (including financial) growth for the MC Group. Moreover, these initiatives also contribute to the achievement of the Sustainable Development Goals (SDGs)* that correspond to each Key Sustainability Issue. MC recognizes the role that companies are expected to play in order to achieve the SDGs, and will make every effort to help make progress on them.

* The SDGs are 17 international development goals that make up the main pillars of the Agenda for Sustainable Development, adopted as global-scale issues at the United Nations Sustainable Development Summit held in September 2015.

### Past Initiatives to Address the Key Sustainability Issues

- **1st Period: 2016 onward**
  - **Identification of Management Issues**
    - Deliberations held by the Board of Directors
    - MC identified the Key Sustainability Issues and positioned them as management issues.

- **2nd Period: 2017 to 2018**
  - **Incorporation into Business Strategy**
    - Holding of Sustainability Dialogues and meetings of the Sustainability & CSR Committee
    - MC held dialogues and exchanged ideas on how each Business Group can tackle the Key Sustainability Issues.

- **3rd Period: 2019 onward**
  - **Strengthening of Initiatives Through Goal Setting**
    - Setting goals for 2030
    - MC further strengthened its initiatives by setting goals rooted in the business of each Business Group and by continually monitoring and reviewing these goals.

- Since 2016, we have been strengthening our initiatives, and in 2019, we set goals around the Key Sustainability Issues.
- While monitoring the status of our initiatives in relation to these goals, we will further ensure the generation of triple-value growth.
1st Period: Identification of Management Issues

**STEP 1 Creating a list of potential issues**
In keeping with commonly used materiality setting procedures*, MC compiled a list of around 80 potential issues that should be taken into account in order to achieve sustainable growth for the MC Group, which were based on international standards and goals such as ISO 26000 and the SDGs.

**STEP 2 Gauging the importance of each issue based on internal and external perspectives**
MC gauged the importance of each theme, in terms of both opportunities and risks, and selected priority issues based on the perspectives of MC's Business Group as well as those of external stakeholders.

**STEP 3 Identifying the Key Sustainability Issues**
MC reexamined the selected priority issues while incorporating the views of the Sustainability Advisory Committee. Following deliberations by the Executive Committee and the Board of Directors, the Key Sustainability Issues were determined.

2nd Period: Incorporation into Business Strategy

**Holding of Sustainability Dialogues and Sustainability & CSR Committee Meetings**
In the fiscal year ended March 31, 2018, MC held Sustainability Dialogues followed by regular meetings of the Sustainability & CSR Committee, with the purpose of incorporating the seven Key Sustainability Issues (formulated in the fiscal year ended March 31, 2017) into its business strategy. Participants discuss changes in the external environment surrounding each issue and examine how value creation by each business contributes to the growth of the MC Group overall. Additionally, ideas are exchanged on how to drive initiatives at the front lines of our business.

3rd Period: Strengthening Initiatives Through Goal Setting

**Setting Goals for 2030**
In the fiscal year ended March 31, 2020, MC formulated individual business goals so that each Business Group could autonomously promote initiatives for the Key Sustainability Issues. Specifically, MC has set targets related to fields including renewable energy, plug-in hybrid and electric vehicles, carbon capture and storage technologies, food waste reduction and waste reuse, issues involving plastics, convenient transportation services and high value-added multipurpose urban development, and is advancing initiatives in line with these targets which contribute to our long-term sustainable growth.

---

* Referencing reporting guidelines such as those of the Global Reporting Initiative (GRI), an international NGO.
Sustainability Initiatives

The Three Corporate Principles, which have served as MC’s corporate philosophy since its inception, exhort us to “strive to enrich society, both materially and spiritually through business, while contributing towards the preservation of the global environment.” Recognizing that social and environmental issues represent both risks that must be addressed and new business opportunities, we believe that creating not only economic value but also societal value and environmental value is essential for the sustainable growth of MC.

MC defines sustainability initiatives as the creation of societal value and environmental value through business activities. By distinguishing this from corporate philanthropy activities (CSR) such as charitable donations, we are further strengthening initiatives to achieve triple-value growth through our business.

Furthermore, to meet the ever-changing demands of society, we believe it is important to maintain a cycle of dialogue with stakeholders combined with the drafting and execution of related measures.

To incorporate outside perspectives into its sustainability measures, MC has established the Sustainability Advisory Committee consisting of outside experts from NGOs, international organizations, and the ESG investment sector, etc. In addition, we engage in dialogues with stakeholders including investors and NGOs. Moreover, to better understand global environmental and societal trends, MC has established sustainability departments in Europe, the Americas, Southeast Asia and other regions to share and coordinate information. We are also a signatory of the UN Global Compact and are a member of organizations such as the World Business Council for Sustainable Development (WBCSD).

Companywide Sustainability Measures

In MC’s management framework, sustainability initiatives are overseen by the Member of the Board/Corporate Functional Officer in charge of Corporate Sustainability and CSR. The Corporate Sustainability & CSR Department plans and drafts related policies and measures. Following deliberations by the Sustainability & CSR Committee, which convenes approximately twice a year, items are put forward or reported to the Executive Committee and the Board of Directors.

Initiatives Incorporating Outside Perspectives

To incorporate outside perspectives into its sustainability measures, MC has established the Sustainability Advisory Committee consisting of outside experts from NGOs, international organizations, and the ESG investment sector, etc. In addition, we engage in dialogues with stakeholders including investors and NGOs. Moreover, to better understand global environmental and societal trends, MC has established sustainability departments in Europe, the Americas, Southeast Asia and other regions to share and coordinate information. We are also a signatory of the UN Global Compact and are a member of organizations such as the World Business Council for Sustainable Development (WBCSD).
Promoting Sustainability Through Business

To continuously create societal value and environmental value through our business activities, we have established a framework through which not only Corporate Departments, but also Business Groups proactively promote sustainability.

Incorporation into Business Group Strategies

- We have established a framework that incorporates companywide sustainability perspectives into business strategy. The Sustainability & CSR Committee, chaired by the Corporate Functional Officer (Corporate Sustainability & CSR) and attended by all Group CEOs and Corporate Functional Officers, thoroughly discusses basic policies and key matters related to sustainability. In Business Strategy Meetings, in which the President and Group CEOs discuss the future strategies for each business, policy approaches based on 2°C scenario analyses are confirmed for certain business Groups.
- In addition, to further promote Business Group initiatives, management personnel responsible for promoting business strategy in each Business Group have been appointed as Chief Sustainability Officers.
- To promote collaboration, MC holds meetings for Group Sustainability Managers as needed to share information and explain measures related to sustainability.

Cycle for Integrating Sustainability into Business Strategy

November to December | January to February | March | From April
---|---|---|---
Sustainability & CSR Committee | Committee-based strategy formulation | Business Strategy Committee | Implementation

Risk Management for Individual Projects

- Within the Corporate Sustainability & CSR Department, individual staff are tasked with evaluating and supporting individual investment and finance proposals for each Business Group from environmental and social perspectives.
- By having the General Manager of the Corporate Sustainability & CSR Department serve as a member of the Investment Committee, MC has put in place a screening system that reflects potential environmental and social impacts in decision-making.
- For proposal applications such as management plans for subsidiaries and affiliates, by requiring details on aspects including the position of the business in relation to promoting Key Sustainability Issues as well as potential environmental and social risks (including 2°C scenario analyses), MC seeks to assess risks and create project proposals with an awareness of impacts on the environment and society.
## Supply Chain Management

### Basic Approach on Human Rights (Including Response to International Norms)

MC believes that respect for human rights is fundamental to doing business globally. The Universal Declaration of Human Rights is proclaimed as “a common standard of achievement for all peoples and all nations” to respect and ensure human rights and liberty. It was adopted at the third UN General Assembly on December 10, 1948. MC supports this declaration and makes its stance clear both internally and externally by stipulating its respect for human rights in its Corporate Standards of Conduct and Social Charter. Furthermore, MC’s Code of Conduct for all officers and employees states that the MC will “respect human rights; will not engage in discrimination based on race, ethnicity, creed, religion, or other grounds; will not tolerate harassment; will respect the cultures, customs, and languages of other countries and regions.” MC also supports international norms such as the UN Guiding Principles on Business and Human Rights, the core labor standards of the International Labour Organization (ILO), and the Voluntary Principles on Security and Human Rights. In the UK, the government established the UK Modern Slavery Act (MSA), which requires certain companies to disclose actions taken to mitigate modern slavery in their supply chains. In response to this legislation, MC publishes a statement annually. Furthermore, the Mitsubishi Corporation Policy for Sustainable Supply Chain Management includes clauses covering the prohibition of forced labor and child labor. MC expects its suppliers to understand, embrace and abide by this policy.

FY2019 Slavery and Human Trafficking Statement

### Policy and Management Framework for Supply Chain Management

#### Policy

As a company handling a diverse range of products and services across the globe, we recognize that ensuring our supply chains operate sustainably is crucial to our business. We have organized our approach into a supply chain policy. Separate guidelines are also formulated for products that require specific individualized initiatives.

#### Management Framework

Basic policies for supply chain management, and the related survey, are decided by the Executive Committee based on deliberations by the Sustainability Advisory Committee and the Sustainability & CSR Committee, and are also reported to the Board of Directors.

### Supply Chain Management Initiatives

#### Our Approach to Supply Chain Management

In order to ensure that the principles outlined in our Policy for Sustainable Supply Chain Management are being upheld in our supply chains, we conduct regular surveys to our suppliers that operate in higher risk industries where environmental and social considerations are particularly required, such as agriculture, marine products and apparel. We determine the target products and suppliers to be surveyed, and conduct post-survey follow-up in line with the approach outlined below.

#### 1. Select target products

Target products are selected based on the following aspects:

- External trends related to the product
- Situation in the country or region of origin of the product

#### 2. Determine target suppliers

Target suppliers are determined based on factors such as transaction history, etc.

#### 3. Distribute surveys

Distribute surveys which include questions related to the following items:

- Establishment of rules and compliance with laws and regulations
- Existence of forced or child labor
- Environmental conservation status
- Initiatives for information disclosure

#### 4. Determine initiatives in accordance with supplier status

Suppliers are categorized into three degrees of risk based on survey results, and additional surveys and site visits are conducted based on the status of each supplier.

#### Survey Results

MC received responses from about 400 suppliers in approximately 30 countries and regions including China, Vietnam and Thailand via its survey conducted in the fiscal year ended March 31, 2020 (survey based on transactions during the fiscal year ended March 31, 2019). Based on these results and other factors including the external environment, MC will conduct additional surveys and site visits for a number of the suppliers.
Communication with Stakeholders

Through dialogue with stakeholders, we exchange opinions on supply chain management and perform reviews as necessary to make improvements. The table to the right shows the type of reviews that we have conducted to date, drawing on comments from stakeholders.

In addition to questionnaire surveys, we regularly conduct site visits to our suppliers (including our subsidiaries and affiliates) worldwide. (Past visits have included shrimp hatcheries and processing companies, coffee milling plants and farms, tea producers, garment factories, pangasius aquaculture and processing plants, chicken processing plants, etc.) Through the site visits and interviews with management and employees, MC confirms that its suppliers understand, embrace and abide by its Policy for Sustainable Supply Chain Management. We also share best practice examples in relation to sustainability policies and initiatives to achieve two-way communication with our suppliers. We will continue communicating with our suppliers to ensure that our supply chains operate sustainably.

Examples of items revised based on comments from stakeholders:

- Began regularly obtaining suppliers’ agreement with the Mitsubishi Corporation Policy for Sustainable Supply Chain Management
- Added more target products to the survey
- Developed an online system aimed at improving convenience and accessibility for suppliers answering the survey

Collecting Sustainability Information on a Consolidated Basis

To fully grasp qualitative and quantitative information around corporate sustainability, MC annually conducts environmental and occupational health and safety surveys targeting all subsidiaries and affiliates on a global, consolidated basis. The aggregated results are reported to management and are used as basic materials when considering sustainability initiatives and other measures.

Selection of survey targets
(March)

The subsidiaries and affiliates subject to the survey are determined by the relevant Business Groups/Divisions. In principle, the survey covers all subsidiaries and affiliates including consolidated subsidiaries, affiliates (including affiliates of subsidiaries) under the equity method, and jointly managed projects and companies.

Start of survey
(March)

The survey items include greenhouse gas emissions (Scope 1, Scope 2), water, waste, occupational health and safety data, expenditures for philanthropic activities, environmental management measures and other management policies.

Completion of survey
(May)

Data on consolidated greenhouse gas emissions, energy usage, electricity consumption, non-consolidated occupational health and safety performance and other aspects has received independent practitioner’s assurance from Deloitte Tohmatsu Sustainability Co., Ltd. to improve data reliability.

Reporting/disclosure
(from June)

The survey results are reported to the Sustainability & CSR Committee, the Executive Committee and the Board of Directors. A portion of the data is disclosed in the ESG Data Book and our annual response to CDP.

* A sample of the survey results is shown on page 104.

Corporate Governance
Contents

54 Highlights for the Year Ended March 31, 2020
58 Overview of Corporate Governance
   58 MC’s Basic Policy on Corporate Governance
   59 Board of Directors
   60 Board of Directors’ Advisory Bodies
   62 Audit & Supervisory Board Members/Audit & Supervisory Board
   64 Outside Directors and Outside Audit & Supervisory Board Members
   67 Overview of Remuneration Package
The Chairman of the Board plans and leads various initiatives to help realize more effective corporate governance that contributes to MC’s sustained growth and the enhancement of medium- to long-term corporate value.

Ken Kobayashi
Chairman of the Board

Board of Directors
The Board of Directors is responsible for making decisions concerning important management issues and overseeing business execution. In-house Directors utilize their rich experience of working within MC and Outside Directors utilize their practical, objective, and professional perspectives to ensure appropriate decision-making and management oversight.

Governance, Nomination and Compensation Committee
The committee meets at least three times a year and a majority of its members are Outside Directors and Outside Audit & Supervisory Board Members. It deliberates on matters related to governance, nomination and compensation (page 60).

Record of Meetings Held in the Fiscal Year Ended March 31, 2020

2019

Briefing Sessions Before Board of Directors’ Meetings
Prior to each Board of Directors’ meeting, opportunities are created for the management executives of the Corporate Staff Section and Business Groups to provide explanatory summaries of the agenda items for which they are responsible to Outside Directors and Outside Audit & Supervisory Board Members in order to facilitate substantive deliberations at the meetings. The sessions are also utilized to appropriately share timely information that helps enhance deliberations. A total of 33 hours of briefing were held in the fiscal year ended March 31, 2020.

Meetings of Independent Outside Directors and Independent Outside Audit & Supervisory Board Members
Meetings are held at least once per quarter to provide a forum for free discussion among Outside Directors and Outside Audit & Supervisory Board Members on a wide range of themes (page 65).

Informal Meetings of the Board of Directors
Informal meetings of the Board of Directors are held as necessary with all Directors and Audit & Supervisory Board Members to provide a forum for free discussion outside of Board of Directors’ meetings.
Orientation upon Assumption of Office

To deepen understanding of MC, all Business Groups and the Corporate Staff Section conduct orientation sessions for newly appointed Outside Directors and Outside Audit & Supervisory Board Members when they assume office.

International Advisory Committee

An advisory body to the Board of Directors made up of overseas experts (→ page 61).

President’s Performance Evaluation Committee

Subcommittee to the Governance, Nomination and Compensation Committee (→ page 60).

Dialogues and Interactions with Officers and Employees

Opportunities are provided for Outside Directors and Outside Audit & Supervisory Board Members to engage in dialogue with Group CEOs, Division COOs, candidates for next-term management executives, mid-level employees and junior employees.

Results for the fiscal year ended March 31, 2020

- Dialogues with Group CEOs and Division COOs: 41 times
- Dinner Meetings with Executive Vice Presidents*: 5 times
- Lunch Meetings with In-house Directors: 5 times

* Two Executive Vice Presidents attended each time.

Site Visits to Business Subsidiaries and Affiliates

For further understanding of the MC Group’s wide range of businesses, every year Outside Directors and Outside Audit & Supervisory Board Members participate in site visits to Group companies and other sites, and hold dialogues with the management of Group companies and others.

In August 2019, site visits were made to the Montney shale gas production and development site in Canada and to the LNG Canada project* development site. Through meetings with the local state government, city mayors and tribal leaders, Outside Directors and Outside Audit & Supervisory Board Members confirmed the state of initiatives aimed at simultaneously generating economic, societal and environmental value while taking into account local stakeholders and the natural environment. They also visited a business development site where the Silicon Valley Branch of Mitsubishi Corporation (Americas) operates with a partner company.

For further information, please refer to the footnotes.

Note: Not held in fiscal year ending March 31, 2021 due to the COVID-19 pandemic.

* A joint-venture business owned by five companies: MC, Royal Dutch Shell plc, and state-operated energy enterprises from Malaysia, China, and South Korea. The business intends to export and sell LNG to East Asia countries, including Japan. Note: Not held in fiscal year ending March 31, 2021 due to the COVID-19 pandemic.
Evaluation of the Effectiveness of the Board of Directors

The Governance, Nomination and Compensation Committee held deliberations* in October 2019, and, in the fiscal year ended March 31, 2020, Mr. Akitaka Saiki and Mr. Tadashi Kunihiro who serve as Independent Outside Director and Independent Outside Audit & Supervisory Board Member, respectively, took the lead in formulating questions, conducting interviews, and analyzing and evaluating responses.

Specific Process

**STEP 1**
Questionnaires and interviews involving all Directors and Audit & Supervisory Board Members were conducted.

**STEP 2**
The results were analyzed and assessed by the Meetings of Independent Outside Directors and Independent Outside Audit & Supervisory Board Members and the Governance, Nomination and Compensation Committee.

**STEP 3**
Deliberations were held by the Board of Directors.

Questions

Responses to issues identified in the previous year’s evaluation; evaluation of measures undertaken in the fiscal year ended March 31, 2020; the size, composition, operation, agenda items, and the oversight and audit functions (provided by Audit & Supervisory Board Members), and support system of the Board of Directors; the status of individual Director involvement; the composition and operation of the Governance, Nomination and Compensation Committee; and dialogues with shareholders and investors, among other matters.

Comments from the Outside Director and Outside Audit & Supervisory Board Member Responsible for Leading the Evaluation of the Effectiveness of the Board of Directors

Through questionnaires and interviews targeting all members of the Board and Audit & Supervisory Board Members, we were able to fully assess the opinions of each member. Exchanges of ideas between Outside Directors and Outside Audit & Supervisory Board Members and the Chairman and the President were also meaningful, and we will continue to do so. In future meetings of the Board of Directors, we hope to engage in more active exchanges of opinions on the direction of the company, themes spanning the medium to long term, and companywide initiatives.

Based on the results of the evaluation, I felt that MC’s governance structure, particularly the role of Outside Directors and Outside Audit & Supervisory Board Members, has been strengthening and transitioning toward a monitoring model. As an Outside Audit & Supervisory Board Member, I place importance on the monitoring of the company’s major policies, corporate culture, and governance itself, and hope to establish an even more solid governance structure.

**Akitaka Saiki**
Independent Outside Director

*Resigned in June 2020

**Tadashi Kunihiro**
Independent Outside Audit & Supervisory Board Member

Issues in the Fiscal Year Ended March 31, 2019

Further expanding the monitoring of major business subsidiaries and affiliates, and expanding follow-up on important matters.

Enhancing feedback on deliberations in management meetings.

Initiatives in the Fiscal Year Ended March 31, 2020

Presentations on major business subsidiaries and affiliates as a part of reports by directors of the status of their duties (business execution reports), regular quarterly reporting on important matters, and site visits of important overseas projects.

Enhancement of summaries of deliberations at management meetings for the Board of Directors, and attendance at briefings by executives and employees with knowledge of deliberations at management meetings.

Evaluation for the Fiscal Year Ended March 31, 2020 and New Issues

Sufficient follow-up was conducted on important matters. In addition, site visits were further expanded by setting up multiple opportunities, including overseas.

Feedback on deliberations at management meetings was appropriately provided. It was confirmed that feedback on key points of debate would be provided in more detail going forward.

More opportunities were created for dialogue focused on succession planning between management executives and Outside Directors and Outside Audit & Supervisory Board Members, and further enhancements were made to meetings of Independent Outside Directors and Independent Outside Audit & Supervisory Board Members. Through these initiatives, communication among Directors and Audit & Supervisory Board Members was enhanced and relationships were further strengthened.

Deepen deliberations by the Board of Directors to further enhance monitoring (continue and enhance progress reports for important items in medium-term management strategy, systematic monitoring of companywide initiatives, etc.)

Further enhance management of major business subsidiaries and affiliates (conduct regular, comprehensive monitoring).

Optimize information provided to Outside Directors and Outside Audit & Supervisory Board Members (provide the appropriate and well-balanced amount of information for each measure).
Based on the opinions of the evaluation of the effectiveness of the Board of Directors and the principles of the Corporate Governance Code, the Board of Directors will further shift toward the monitoring of the company’s vision and structures supporting that vision. In order to further improve monitoring functions, the Board of Directors will expand its deliberations on the following matters.

**Enhance Deliberations by the Board of Directors to Further Strengthen Monitoring**

**FOCUS**

**Before (results from Jan. to Dec. 2019)**
- Conventional comprehensive business execution reports by Corporate Functional Officers and Business Group CEOs
- Work to enhance deliberations on the matters below using spare time

**After**
- Matters for reporting, excluding business execution reports
- Matters for decision-making by the Board of Directors (investments and loans proposals by Business Groups exceeding a certain scale*, proposals for measures by the Corporate Staff Section, etc.)
- Construct a new structure that adds the matters below to existing matters for reporting**, and work to further improve monitoring functions

**Matters for Expanded Deliberation in Future Meetings of the Board of Directors**

*1 Delegation of authority to the executive side through the raising monetary threshold standards related to investment and loan proposals was carried out in May 2018.

*2 These matters include, among others, quarterly consolidated financial statements, fund management and capital procurement, basic policies for sustainability-related measures, verification of policy for holding listed stocks, compliance reporting and evaluation of the effectiveness of the Board of Directors.

---

**Progress of Primary Items in Midterm Corporate Strategy (i.e. MC’s Vision)**
- Triple-value growth in the business management model
- Business portfolio
- Growth mechanisms
- HR policy

**Toward Ensuring Further Effectiveness (i.e. Structures supporting MC’s Vision)**
- Regional strategy and domestic development
- IR strategy
- Risk management (including monitoring of subsidiaries)
- Management of executed individual investment and loan projects
- Management decision processes and organizational culture that contribute to the sustainable growth of the company
MC's Basic Policy on Corporate Governance

MC's corporate philosophy is enshrined in the Three Corporate Principles. Through corporate activities rooted in the principles of fairness and integrity, MC strives to continuously raise corporate value. MC believes that by helping to enrich society, both materially and spiritually, it will also meet the expectations of shareholders, customers and all other stakeholders.

In order to achieve these goals, MC recognizes strengthening corporate governance on an ongoing basis as an important management issue as it is a foundation for ensuring sound, transparent and efficient management. MC, based on the Audit & Supervisory Board System, is thus working to put in place a corporate governance system that is even more effective. This includes strengthening management supervision through such measures as appointing Outside Directors and Outside Audit & Supervisory Board Members who satisfy the conditions for Independent Directors or Independent Audit & Supervisory Board Members, and establishing advisory bodies to the Board of Directors where the majority of members are Outside Directors, Outside Audit & Supervisory Board Members and Outside Members. At the same time, MC uses the executive officer system, etc., for prompt and efficient decision-making and business execution.
Board of Directors

Composition and Size of the Board of Directors and the Policy and Process for Appointing Nominated Directors

<table>
<thead>
<tr>
<th>Composition and size</th>
<th>In principle, the Board of Directors is an appropriate size for conducting deliberations, with one third or more being made up of Outside Directors.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Appointment policy</td>
<td>To ensure decision-making and management oversight are appropriate for MC, which is involved in diverse businesses and industries in a wide range of fields, and from the perspective of ensuring diverse standpoints, several Directors are appointed from both within and outside MC with the depth of experience and high levels of knowledge and expertise needed for fulfilling their duties.</td>
</tr>
<tr>
<td>In-house Directors</td>
<td>In addition to Chairman of the Board and President and CEO, MC’s In-house Directors are appointed from executive officers responsible for companywide management, Corporate Staff operations, and other areas.</td>
</tr>
<tr>
<td>Outside Directors</td>
<td>Outside Directors are appointed from those who possess a practical perspective of highly experienced company officers and those who possess an objective and professional perspective with a deep insight on global situation and socio-economic trends.</td>
</tr>
<tr>
<td>Appointment process</td>
<td>The President and CEO proposes a list of nominated Directors, which is then deliberated at the Governance, Nomination and Compensation Committee and resolved by the Board of Directors before being presented at the Ordinary General Meeting of Shareholders.</td>
</tr>
</tbody>
</table>

Matters Deliberated by the Board of Directors

The Board of Directors deliberates on important management issues, and supervises business execution through reports on priority matters in Midterm Corporate Strategy, the business strategy of Business Groups, and so on. In addition, matters requiring resolution in accordance with laws and regulations, and investment and finance proposals exceeding a monetary threshold standard set by MC are deliberated and resolved with an emphasis not only on the economic aspects, but also on ESG perspectives. MC has also constructed appropriate internal control systems, and checks their operational status every year in order to work toward their continuous improvement and strengthening.

Business execution other than these matters for resolution by the Board of Directors is entrusted to Executive Officers by appointing the President as the Chief Executive Officer responsible for business execution, and the Executive Committee (meets twice monthly) as a management decision-making body.

Chairman of IAC

Ken Kobayashi  President and CEO
Takehiko Kakuchi  Member of the Board, Executive Vice President
Akira Murakoshi  Outside Director
Akitaka Saiki  Outside Director
Tsuneyoshi Tatsuoka  Outside Director

IAC Agenda and Keynote Speakers for the Fiscal Year Ended March 31, 2020

- Opposing forces of populism and globalism  Professor Nye
- Geopolitical impact on the global economy  Ambassador Armitage
- Emerging markets in the digital age  Mr. FitzGerald

Committee members carried out robust discussions regarding the various topics introduced by keynote speakers, with Group executives actively participating in sessions relevant to their businesses.
The Audit & Supervisory Board comprises all of the Audit & Supervisory Board Members responsible for auditing the decision-making processes and management performances of Directors in compliance with the Companies Act, and other laws and regulations as well as Mitsubishi Corporation’s Articles of Incorporation and internal rules/regulations. Full-time Audit & Supervisory Board Members ensure the soundness of the management by executing audits from a perspective based on abundant working experience at the Company, while Outside Audit & Supervisory Board Members execute audits with a background of abundant working experience in their particular fields as well as neutral and objective perspectives. In addition to resolutions of matters required by law and other important issues, the Audit & Supervisory Board strives to enhance information-sharing among the members through briefings on key matters and reporting the status of auditing activities for each of the members.

Audit Plans

Prior to each fiscal year, the Audit & Supervisory Board formulates audit plans with key areas. In the fiscal year ended March 31, 2020, the following three key audit areas were selected for the monitoring of specific progress in management and execution.

1 Progress in the First Year of Midterm Corporate Strategy 2021:
   - Revitalization of the organization in conjunction with Business Group restructuring
   - Execution of the mission for each new Business Group
   - Increased understanding of the new HR system and implementation of initiatives toward its purpose

2 Enhancing MC Group Management:
   - Delegation of authority and development/implementations of governing structure for self-sustaining management
   - Demarcation of roles between MC representative offices and MC Group companies with consideration of regional characteristics

3 Initiatives to Strengthen Corporate Governance:
   - Sustainability awareness in business activities
   - Enhancement of crisis management response on a consolidated basis

Toward Sustainable Growth for MC

In the fiscal year ended March 31, 2020, the first year of Midterm Corporate Strategy 2021, the MC Group undertook major reforms including the reorganization of Business Groups, initiatives for creating new businesses in digital transformation and HR system restructuring. As Audit & Supervisory Board Members, we have actively visited MC offices and MC Group companies in Japan as well as overseas to understand their circumstances. We will continue striving to collect a wide range of information while strengthening cooperation with Outside Directors and Outside Audit & Supervisory Board Members.

Also, in light of the changes in our business environment accompanying the COVID-19 pandemic, we will pay close attention to the enhancement of MC Group management on a consolidated basis and the sustainable growth of the Company from the viewpoint of strengthening Group corporate governance.

Shuma Uchino
Full-time Audit & Supervisory Board Member

Hajime Hirano
Full-time Audit & Supervisory Board Member
Main Activities of the Audit & Supervisory Board and its Members

1. Dialogue with Executive Officers
   Opportunities are created for all Audit & Supervisory Board Members, including Outside Audit & Supervisory Board Members, to engage in dialogues with the Chairman of the Board, President and CEO, Corporate Functional Officers, Business Group CEOs, Business Division COOs, Administrative Department General Managers, and the General Managers of the Corporate Staff Section.

2. Attendance at Important Meetings
   Besides the Audit & Supervisory Board, the Full-time Audit & Supervisory Board Members attend meetings of major internal management bodies, including Board of Directors, Governance, Nomination and Compensation Committee, Executive Committee, Business Strategy Committee and Management Strategy Meeting, and provide necessary opinions. Besides the Audit & Supervisory Board, the Outside Audit & Supervisory Board Members attend meetings of the Board of Directors after being briefed of discussions in the Executive Committee and lower conference bodies, and provide necessary opinions.

3. On-Site Audits and Visits
   Through on-site audits and visits in the fiscal year ended March 31, 2020, the Audit & Supervisory Board Members met with the CEOs and executive officers of 49 companies in 12 countries overseas and 10 domestic MC Group companies, as well as the regional chiefs of 28 overseas and domestic offices. The Audit & Supervisory Board Members reported on the results of their on-site audits to the Chairman of the Board, the President and CEO, and relevant executive officers.

4. Strengthening of Group Corporate Governance
   In addition to dialogues with the CEOs and other executive officers of the MC Group companies, opportunities are arranged for the exchange of information every quarter with the Audit & Supervisory Board Members of 39 major Group companies in Japan. We also provide assistance in training for those who will be assigned to MC Group companies as full-time audit & supervisory board members. We will continue working to strengthen the Group corporate governance through regular monitoring.

5. Collaboration with Outside Directors
   Outside Directors are invited to dialogues between Audit & Supervisory Board Members and executive officers, and to briefing sessions on important matters to be discussed at the Board of Directors. We are maintaining close alignment with Outside Audit & Supervisory Board Members as well as Outside Directors through exchanging opinions at various occasions including meetings of Independent Outside Directors and Independent Outside Audit & Supervisory Board Members.

Enhancement of Tripartite Audits

Audit & Supervisory Board Members strive to further strengthen cooperation with accounting auditors and the Internal Audit Department in order to assess the Company’s situation with the aim of improving the effectiveness of audits.

Collaboration with Accounting Auditors and Evaluation of Accounting Auditors
   We work with accounting auditors through their outline briefings on accounting audit plans, audit reports for quarterly results and monthly meetings. During on-site audits and visits, we also exchange opinions with the accounting auditors of MC Group companies in Japan and overseas.

   With regard to performance evaluations of accounting auditors, we keep track of evaluation data during the fiscal year from regular audit reports and other sources, and hold an accounting auditor evaluation conference at the end of the fiscal year. As a result, we have concluded that the current accounting auditors performed appropriate audits in a professional manner, and accordingly, the Audit & Supervisory Board resolved to reappoint the accounting auditors.

Collaboration with the Internal Audit Department
   The Internal Audit Department and Full-time Audit & Supervisory Board Members hold monthly meetings where exchange of opinions are made concerning reports on internal audit results. Also at Audit & Supervisory Board meetings, the Internal Audit Department reports their quarterly audit results that are also reported to the President and CEO.

   In addition, Audit & Supervisory Board Members attend the internal auditor liaison meetings of 48 major MC Group companies in Japan held by the Internal Audit Department, while the General Manager of the Internal Audit Department attends liaison meetings held by MC’s Audit & Supervisory Board Members with the audit & supervisory board members of the MC Group companies mentioned above, and all parties collect audit information and exchange opinions.
Overview of Corporate Governance

4. Outside Directors and Outside Audit & Supervisory Board Members

Outside Directors and Outside Audit & Supervisory Board Members are as follows (as of July 1, 2020).

**Independent Outside Directors**

Akihiko Nishiyama

*Main career:* Professor, Ritsumeikan University  
*Number of years on Board of Directors:* 5 years

Mr. Nishiyama has profound knowledge of organizational change, human resource development, and business management based on his many years of practical work experience, entrepreneurship, management experience, and management survey at a think tank, as well as his research activities in business administration at universities.

Shunichi Miyanaga

*Main career:* Chairman of the Board, Mitsubishi Heavy Industries, Ltd.  
*Number of years on Board of Directors:* 1 year

Based on his deep knowledge of the technology sector, Mr. Miyanaga has many years of experience as Member of the Board, President and CEO of a conglomerate manufacturing listed company that conducts business around the world, and has global business management experience.

Akitaka Saiki

*Main career:* Former Vice-Minister of Foreign Affairs, Ministry of Foreign Affairs of Japan  
*Number of years on Board of Directors:* 3 years

Mr. Saiki has served in a succession of key posts at the Ministry of Foreign Affairs of Japan. He possesses profound knowledge of geopolitics developed through foreign diplomacy, as well as important insight into various foreign country risks and an extensive personal network for dealing with these.

Tsuneyoshi Tatsuoka

*Main career:* Former Vice-Minister of Economy, Trade and Industry, Ministry of Economy, Trade and Industry of Japan  
*Number of years on Board of Directors:* 2 years

Mr. Tatsuoka has served in a succession of key posts at the Ministry of Economy, Trade and Industry of Japan. He possesses profound knowledge of industrial policy in natural resources and energy, and manufacturing, and domestic and global economic policies and trends, as well as deep insight on sustainability gained through these experiences.

Sakie Akiyama

*Main career:* Founder and CEO, Saki Corporation  
*Appointed June 2020*

Ms. Akiyama worked as an international management consultant, and based on her deep knowledge in the digital and IT sectors, she started an industrial inspection robotics firm and gained deep insight in innovation that has helped the company grow into a global company.

**Ratio of Independent Outside Directors to Directors***

45%

5/11

* Based on the status as of July 1, 2020

[Member of the Governance, Nomination and Compensation Committee]  
[Member of the International Advisory Committee]
Independent Outside Audit & Supervisory Board Members

Yasuko Takayama
Main career: Former Audit & Supervisory Board Member, Shiseido Company, Limited
Number of years on Audit & Supervisory Board: 4 years

Meetings of Independent Outside Directors and Independent Outside Audit & Supervisory Board Members
MC endeavors to enhance cooperation among Independent Outside Directors and Independent Outside Audit & Supervisory Board Members by providing opportunities for free discussion about a wide range of themes related to the Company’s business management and corporate governance, and these discussions are reported to the Board of Directors as necessary.

Main Discussion Themes (Fiscal Year Ended March 31, 2020)
- Planned agenda items for the Governance, Nomination and Compensation Committee
- Enhancement of MC governance and further contribution to be provided by Outside Directors and Outside Audit & Supervisory Board Members
- Future issues based on evaluation of the effectiveness of the Board of Directors
Selection Criteria for Outside Directors

To make the function of Outside Directors and Outside Audit & Supervisory Board Members stronger and more transparent, MC has set forth Selection Criteria for Outside Directors and Outside Audit & Supervisory Board Members as follows, after deliberation by the Governance, Nomination and Compensation Committee, which is composed with a majority of Outside Directors and Outside Audit & Supervisory Board Members.

<table>
<thead>
<tr>
<th>Selection criteria for Outside Directors</th>
<th>1. Outside Directors are elected from among those individuals who have an eye for practicality founded on a wealth of experience as corporate Executive Officers, as well as an objective and specialist viewpoint based on extensive insight regarding global conditions and social and economic trends. Through their diverse perspectives, Outside Directors help ensure levels of decision-making and management oversight appropriate to the Board of Directors.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2. To enable Outside Directors to fulfill their appointed task, attention is given to maintain their independency; individuals incapable of preserving this independency in effect will not be selected to serve as Outside Directors.</td>
</tr>
<tr>
<td></td>
<td>3. MC’s operations span a broad range of business domains; hence there may be cases of conflict of interest stemming from business relationships with firms home to a corporate Executive Officer appointed as Outside Directors. MC appropriately copes with this potential issue through the procedural exclusion of the director in question from matters related to the conflict of interest, and by preserving a variety of viewpoints through the selection of numerous Outside Directors.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Selection criteria for Outside Audit &amp; Supervisory Board Members</th>
<th>1. Outside Audit &amp; Supervisory Board Members are selected from among individuals who possess a wealth of knowledge and experience across various fields that is helpful in performing audits. Neutral and objective auditing, in turn, will ensure sound management.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2. To enable Outside Audit &amp; Supervisory Board Members to fulfill their appointed task, attention is given to maintain their independency; individuals incapable of preserving this independency will not be selected to serve as Outside Audit &amp; Supervisory Board Members.</td>
</tr>
</tbody>
</table>

Note: Independency for the purpose of Selection Criteria for Outside Directors and Outside Audit & Supervisory Board Members

To make a judgment of independence, MC checks if the person concerned meets the conditions for Independent Directors and Independent Audit & Supervisory Board Members as specified by stock exchanges in Japan such as the Tokyo Stock Exchange, Inc., and whether the person concerned is currently any of the following items (1) to (7) and whether they have been at any time in the past three fiscal years.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1)</td>
<td>A major shareholder of MC (a person or entity directly or indirectly holding 10% or more of the voting rights), or a member of business personnel of such a shareholder.</td>
</tr>
<tr>
<td>(2)</td>
<td>A member of business personnel of a creditor of MC exceeding the threshold set by MC.</td>
</tr>
<tr>
<td>(3)</td>
<td>A member of business personnel of a supplier or a customer of MC exceeding the threshold set by MC.</td>
</tr>
<tr>
<td>(4)</td>
<td>A provider of professional services, such as a consultant, lawyer, or certified public accountant, receiving cash or other financial benefits from MC, other than Directors’ or Audit &amp; Supervisory Board Members’ remuneration, where the amount exceeds ¥10 million per fiscal year.</td>
</tr>
<tr>
<td>(5)</td>
<td>A representative or partner of MC’s independent auditor.</td>
</tr>
<tr>
<td>(6)</td>
<td>A person belonging to an organization that has received donations exceeding a certain amount from MC.</td>
</tr>
<tr>
<td>(7)</td>
<td>A person who has been appointed as an Outside Director or Outside Audit &amp; Supervisory Board Member of MC for more than eight years.</td>
</tr>
</tbody>
</table>

If a person is still judged to be effectively independent despite one or more of the above items (1) to (7) applying, MC will explain and disclose the reason at the time of their appointment as an Outside Director or Outside Audit & Supervisory Board Member.
Overview of Remuneration Package

**Basic Approach to the Package**

- Levels of remuneration are set based on the functions and roles of the Directors and Audit & Supervisory Board Members, MC’s performance level and other factors.
- Based on performance targets, MC makes remuneration levels globally competitive to foster a desire for growth among human resources who will be responsible for the next generation of management and to improve organizational vitality.

**Remuneration for Directors and Audit & Supervisory Board Members**

- Remuneration for Executive Directors (Directors for business execution, excluding Chairman of the Board and Outside Directors, hereinafter the same) is linked to medium- to long-term corporate value and shareholder value and designed for greater focus on increasing medium/long-term corporate value.
- The assurance of independence is necessary for the Chairman of the Board and Outside Directors, who undertake functions of management oversight, and Audit & Supervisory Board Members, who undertake audits, in order for them to appropriately perform their respective roles. For this reason, the Company will pay them only fixed monthly remuneration, and not remuneration that is linked with business results.
- The remuneration package and its provision are continually discussed and monitored by the Governance, Nomination and Compensation Committee, a majority of which is Outside Directors and Outside Audit & Supervisory Board Members.

### Remuneration Package for Directors and Audit & Supervisory Board Members

<table>
<thead>
<tr>

<td><strong>Base salary</strong></td>
<td>Fixed: about 20-30%</td>
<td>Cash</td>
<td>An amount determined according to position, paid monthly.</td>
<td>1</td>
<td>1</td>
<td>1</td>
<td>5</td>
</tr>
</tbody>
</table>
| **Annual deferral for retirement remuneration** | Fixed: about 20-30% | Cash | Fixed amount of annual deferral for retirement remuneration set aside each year; to be paid in full retirement.  
By resolution of the Board of Directors, non-payment or reduction of the accumulated amount is possible in the event of a serious violation of a delegation agreement, etc. | 1 | — | — | — |
| **Individual performance bonus** | Variable (single year) | Cash | Payment amount determined for each Executive Director based on performance assessments by the President.  
The assessment on the President’s performance is deliberated by the President’s Performance Evaluation Committee.  
Performance assessment results are reported to the Board of Directors. | 1 | — | — | — |
| **Consolidated net income** | Consistent interest (medium to long term) | Cash | The amount paid is determined in line with consolidated net income in the relevant fiscal year (average over the medium- to long-term period), based on formulas resolved by the Board of Directors following deliberation by the Governance, Nomination and Compensation Committee.  
The amount is adjusted in line with single-year performance (medium- to long-term performance) if consolidated net income (attributable to owners of MC) (average over the relevant fiscal year and subsequent two fiscal years) exceeds the level of earnings that leads to enhanced corporate value (consolidated capital cost) (average over the three years).  
No bonus is paid if consolidated net income (average over the three years) is below consolidated capital cost (average).  
The total amount to be paid is capped. | 2 | — | — | — |
| **Variable (medium to long term)** | Consistent interest (medium to long term) | Cash | Stock options as remuneration are granted from the perspective of aligning Directors’ interests with those of shareholders and providing incentives to enhance corporate value and to increase the Company’s share price over the medium to long term.  
All stock options allocated cannot be exercised for a three-year performance period. The number of stock options that can be exercised at the end of this period varies according to the share growth rate (calculated as Total Shareholder Return (TSR) divided by the TOPIX benchmark growth rate over the same period).  
The basic policy is that Directors are obliged to hold any shares including those acquired through the exercise of stock options while in office. Sales of such shares are restricted until their aggregate market value exceeds approximately 300% of the base salary of each position. | 4 | — | — | — |

1) to 5) in the table indicate the numbers of limits on remuneration that correspond to each remuneration item. Please refer to page 68 for more details.
Overview of Corporate Governance

*1 Approved at the general shareholder’s meeting in fiscal year ended March 2020.

*2 Please see page 69 to understand Directors’ and Audit & Supervisory Board Members’ remuneration.

Calculation Method for Performance-Linked Remuneration (fiscal year ending March 31, 2021)

(1) Upper limit on total payment

The upper limit will be the lower of i) ¥600 million or ii) the maximum total of individual payment amounts prescribed in (2) below.

(2) Individual payments

<table>
<thead>
<tr>
<th>Position</th>
<th>Maximum payment amount</th>
<th>Number of persons</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>President and CEO</td>
<td>(consolidated net income [attributable to owners of MC] in the fiscal year ending March 31, 2021 – ¥440 billion) × 0.025% + 0.35 (¥100 million)</td>
<td>1</td>
<td>¥175 million</td>
</tr>
<tr>
<td>Executive Vice President</td>
<td>(consolidated net income [attributable to owners of MC] in the fiscal year ending March 31, 2021 – ¥440 billion) × 0.0075% + 0.105 (¥100 million)</td>
<td>4</td>
<td>¥210 million</td>
</tr>
<tr>
<td>Total</td>
<td></td>
<td>5</td>
<td>¥385 million</td>
</tr>
</tbody>
</table>

Stock-Based Remuneration Linked to Medium- to Long-Term Share Performances

(1) Upper limit on total payment

The upper limit is ¥600 million.

The upper limit on total number of shares per year is 400,000 shares (4,000 stock options).

(2) Conditions for exercise of stock options

Some or all stock options may be exercised depending on the stock growth rate (market conditions*).

Number of stock acquisition rights that can be exercised by each position

Initial number of allocated stock acquisition rights for the position (based on position as of April 1, 2020) × vesting ratio

Stock options initially allocated by position

President and CEO: 127,700 shares (1,277 options)

Executive Vice President: 35,100 shares (351 options)

Vesting ratio

The vesting ratio varies, as shown right, depending on the growth rate in the Company’s shares over the three-year period from the allocation date.

Growth rate in the Company’s shares

Growth rate in the Company’s shares = \( \frac{\text{Company’s TSR (three years)}}{\text{TOPIX growth rate (three years)}} \)

Note: The payment amount will be zero if consolidated net income falls below the average consolidated capital cost for the relevant fiscal years.

Consolidated capital cost for the fiscal year ending March 2021 is ¥410 billion.

Maximum Payment and Total for Each Position

<table>
<thead>
<tr>
<th>Position</th>
<th>Maximum payment amount</th>
<th>Number of persons</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>

<td>4</td>
<td>¥210 million</td>
</tr>
<tr>
<td>Total</td>
<td></td>
<td>5</td>
<td>¥385 million</td>
</tr>
</tbody>
</table>

Note: The payment amount will be zero if consolidated net income is lower than the consolidated capital cost.

The total amount paid is capped.
The Process for Setting Remuneration for Directors and Audit & Supervisory Board Members

The Board of Directors and the Governance, Nomination and Compensation Committee deliberate and decide the policy for setting Directors’ remuneration and the remuneration amount (actual payment amount).

The total remuneration amount (actual payment amount) and individual payment amounts for Directors, excluding individual performance bonuses, are determined by a resolution of the Board of Directors within the upper limits for each type of remuneration decided by resolution of the Ordinary General Meeting of Shareholders held in 2019. The payment amounts of individual performance bonuses paid to Directors based on their individual performance assessment, including qualitative assessment, shall be determined and paid on an individual basis after the President’s yearly performance assessment of each Director for the relevant fiscal year (the Board of Directors delegated authority to the President for deciding the individual payment amounts). The assessment on the President’s performance is deliberated/decided by the President’s Performance Evaluation Committee, a subcommittee of the Governance, Nomination and Compensation Committee. The subcommittee is comprised of the Chairman, who also serves as the Chairman of the Governance, Nomination and Compensation Committee, and Outside Directors sitting on the committee. Results of the performance assessment are reported to the Board of Directors to ensure objectivity, fairness, and transparency.

The total remuneration amount and individual payment amounts for Audit & Supervisory Board Members are determined within the upper limits decided by resolution of the Ordinary General Meeting of Shareholders, held in 2019, subject to discussions by the Audit & Supervisory Board Members.

Notes:
1. The above figures include 3 Directors and 1 Audit & Supervisory Board Member who retired during the fiscal year ended March 31, 2020. Furthermore, there were 13 Directors (including 5 Outside Directors) and 5 Audit & Supervisory Board Members (including 3 Outside Audit & Supervisory Board Members) as of March 31, 2020.
2. The above amounts of individual performance bonuses represented the amounts provided for in the fiscal year ended March 31, 2020.
3. The above amounts of performance-linked bonus (short term) is determined based on consolidated net income of 535.4 billion yen for the fiscal year ended March 31, 2020, based on a formula confirmed in advance by the Governance, Nomination and Compensation Committee and resolved by the Board of Directors.
4. The above amounts of performance-linked bonus (medium to long-term) is paid on an average of the consolidated net income for the fiscal years ended March 31, 2021 to 2022, but as this cannot be decided currently, the amount shown is a rough estimate for the fiscal year ended March 31, 2020.
5. The above amounts for stock-based remuneration linked to medium- and long-term share performances (stock options with market conditions) is the amount recorded as an expense granted for the fiscal year ended March 31, 2020, in regard to stock-based remuneration linked to medium- and long-term share performances, the number of exercisable shares will be determined according to the growth rate in the company’s shares over three years from being granted, based on a formula confirmed in advance by the Governance, Nomination and Compensation Committee and resolved by the Board of Directors.
6. In addition to the above, Mitsubishi Corporation paid executive pensions to retired Directors and Audit & Supervisory Board Members. The amounts paid in the fiscal year ended March 31, 2020 were as follows:
   - The retirement bonus option, including executive pensions for Directors and Audit & Supervisory Board Members, was abolished at the close of the 2007 Ordinary General Meeting of Shareholders.
   - Mitsubishi Corporation paid 120 million yen to 70 Directors (Outside Directors were ineligible for payment).
   - Mitsubishi Corporation paid 310 million yen to 7 Directors (Outside Supervisory Board Members were ineligible for payment).

Demand for natural gas (LNG), which has a low impact on the environment, is increasing due to growing global interest in environmental initiatives as well as increasing energy demand created by population growth. Our goal is to achieve economical, societal, and environmental value through stable supply of natural gas and other energy resources by leveraging our 50 years of expertise in the LNG business.

### OUR VISION

In addition to strengthening the existing businesses and completing the projects under construction in a timely manner, we aim to expand earnings in the LNG business by participating in competitive new projects, strengthening sales capabilities, and developing new markets. We also recognize climate change as one of the Group’s most important issues, and will work to reduce CO₂ emissions while promoting a stable supply of environmentally low-impact LNG.

### Risks and Opportunities in Light of Changes in the External Environment

- Transition to renewable energy
- Deteriorating profitability due to the introduction of carbon taxes
- Exhaustion of fossil fuel sources including natural gas
- Increase in demand for natural gas due to the switching from coal and the need to compensate for the intermittent nature of renewable energy
- Increase in recoverable reserves due to innovations in technology

### Elements of the Midterm Corporate Strategy 2021

- Enhanced profitability in existing businesses by reduction of recurring costs.
- The Cameron LNG trains 1/2/3 started production in May/December 2019 and May 2020 respectively. Construction progressed at Indonesia Tangguh (Expansion) and LNG Canada projects with production beginning in 2020 and in the mid-2022s, respectively.
- In order to expand earnings in the LNG business, we conducted studies on participation in new projects, and development of emerging markets.

### Progress for the fiscal year ended March 31, 2020

- Enhanced profitability in existing businesses by reduction of recurring costs.

INDUSTRIAL MATERIALS

OUR VISION

Our Group aims to create a sustainable society through innovative transformation in the material industries.

Kotaro Tsukamoto
Executive Vice President
Group CEO, Industrial Materials Group

Industrial Materials Group Organization

Carbon Division
Trading and investment in the field of carbon materials and products

Steel Business Division
Sales, logistics, inventory, manufacturing, and processing business in the field of steel products through Metal One Corporation (MC’s stake 60%), a general steel trading company

Performance Materials Division
Trading and business investment in the field of silica sand, cement and ready-mixed concrete, polyvinyl chloride resin, and other products

Risks and Opportunities in Light of Changes in the External Environment

<table>
<thead>
<tr>
<th>Risks</th>
<th>Opportunities</th>
</tr>
</thead>
<tbody>
<tr>
<td>Decrease in demand and supply for steel products due to tighter regulations for industries that emit CO₂</td>
<td>Increase in demand for carbon products in conjunction with the spread of electric furnaces for steelmaking and electric vehicles (EV)</td>
</tr>
<tr>
<td></td>
<td>Innovation in the materials industry through the use of digital technologies</td>
</tr>
</tbody>
</table>

Against a backdrop of an increasingly competitive environment, diversifying material needs are likely to present new business opportunities. Our mission is to redefine the role MC can play in providing solutions to the industries in which it operates and focus resources in areas where it can leverage its strengths and capabilities, Automotive & Mobility, as well as Construction & Infrastructure. With 85% of our Group profits covering these sectors, we are taking advantage of the know-how and experience that we have built up through them to strengthen our profit base.

Elements of the Midterm Corporate Strategy 2021

Progress for the fiscal year ended March 31, 2020

As we move toward a business model that works across industries, we are shifting management resources to business fields that have independence and are expected to grow, as well as expanding MC’s stock of functions.

**PMC Tech Co., Ltd.**

PMC Tech is a joint venture of Posco Chemical, Mitsubishi Chemical Corporation, and MC for the manufacturing and sale of coal-based needle coke. The aim of this business is to capture the growth of revenue and the increased market for graphite electrode and lithium-ion batteries (LiB) together with the medium- to long-term trend toward the adoption of electric furnaces for steelmaking and EVs.

**Cape Flattery Silica Mines Pty., Ltd.**

Cape Flattery operates the world’s largest reserves of silica sand and manufactures as well as sells high-quality silica sand as a raw material for glass. In regard to annual shipment volume, Cape Flattery’s reserves have the top share of seaborne trade within Asia, which is the largest region. Looking toward the future, the company seeks to achieve business expansion in these markets with high growth potential while continuing to ensure safe operation.
Petrochemicals & Chemicals Group Organization

**Petroleum Division**
Trading of crude oil and naphtha; development of LPG and oil refining, distribution, and retail business (Asto-mos Energy Corporation, Mitsubishi Corporation Energy, etc.)

**Petrochemicals Division**
Upstream to downstream trading and business development in the field of petrochemicals, including olefins, polyester raw materials, and plastics

**Basic Chemicals Division**
Trading and business development in the field of basic chemicals, including industrial salt, chlor-alkali, methanol, and ammonia

**OUR VISION**

The transition to a low-carbon society and growing attention to environmental initiatives, which will affect the future business value in the petroleum and chemicals industries, are two of our most important challenges. Our Group aims to contribute to resolving these challenges by creating and growing businesses that generate triple-value growth simultaneously.

**Risks and Opportunities in Light of Changes in the External Environment**

<table>
<thead>
<tr>
<th>Risks</th>
<th>Opportunities</th>
</tr>
</thead>
<tbody>
<tr>
<td>* Higher environmental awareness concerning plastics</td>
<td></td>
</tr>
<tr>

</tr>
<tr>
<td>*Increase in demand for recycled plastics</td>
<td>*Adoption of next-generation energy</td>
</tr>
<tr>
<td></td>
<td>*Development of e-commerce/networking businesses that utilize service stations</td>
</tr>
</tbody>
</table>

*Connected, Autonomous, Shared/Service, and Electric

**Elements of the Midterm Corporate Strategy 2021**

In addition to the industry challenges of building low-carbon, recycle-oriented business models and responding to the adoption of next-generation energy, the four top priorities of the Group also include stronger businesses in downstream and service segments that help redefine the position of the Group, as well as value creation through digital transformation (DX). The transitioning and strengthening of core businesses and the creation of new businesses will enhance MC revenues in quantity and quality.

**Progress for the fiscal year ended March 31, 2020**

As an initiative to achieve low-carbon, recycling-oriented business models, MC joined a PET chemical recycling business in the polyester supply chain, which is a strength of the Group. In the future, MC will strengthen initiatives for procuring and supplying in a sustainable manner, which is one of the Key Sustainability Issues, by supporting the changing needs for plastic and creating and developing businesses with the aim of fostering triple-value growth. MC has also begun and is advancing support for the adoption of next-generation energy such as CO₂-free ammonia, which could become a part of next-generation energy.

**BUSINESS OVERVIEW OF THE PETROLEUM & CHEMICALS GROUP**

**PETROLEUM DIVISION**

Car Frontier Co., Ltd. (Automotive Maintenance E-commerce/Networking Business)

Car Frontier is a subsidiary of Mitsubishi Corporation Energy that plans, develops, and operates multiple e-commerce services to connect drivers with retailers, such as gas stations and auto shops, through web services. The company provides new services with a high level of convenience to drivers to realize a better lifestyle for car-owners. In the spring of 2020, the tire e-commerce service “TIREHOOD,” which provides users complete web services from purchasing tires to booking installations, split off as BEAD Inc. AUTOBACS SEVEN CO., LTD., also invested in and jointly operates this company. In the future, Car Frontier will build cross-industry maintenance platforms and expand its business, such as vehicle inspections and oil changes, centered on the “timy” car maintenance and booking service application.

**PETROCHEMICALS DIVISION**

Renewable Materials Business (PET Chemical Recycling Business)

MC acquired a third-party allotment of shares in Thai Shinkong Industry Corporation Ltd. (TSIC), which produces PET resins for beverage bottles in Thailand, and increased its subscription share to 34%. PET is a mono-material boasting excellent transparency, glossiness, and barrier properties. Highly recyclable due to well-established collection and recycling facilities, PET has a wide range of applications, including in both beverage and food containers as well as textiles used in clothing. With greater environmental awareness about plastics and pressure to transition to circular economies worldwide, TSIC is expanding PET production capacity and also plans to produce recycled PET resins by adopting chemical recycling technologies. MC deployed management executives to TSIC to contribute to its business management and to help realize a circular economy through sales of recycled PET resins that meet the growing needs of the market.

**BASIC CHEMICALS DIVISION**

CGCL (Methanol Production and Sales Business)

Caribbean Gas Chemical Limited (CGCL), established in 2013 in Trinidad and Tobago, completed construction in June 2020, and is set to start commercial operation in the third quarter of fiscal year 2020. The company has production capabilities with the ability to produce 1 million tons of methanol and 20 thousand tons of dimethyl ether each year, and uses the abundant natural gas reserves of Trinidad and Tobago as raw materials. Methanol is used for a wide range of applications, such as adhesives, agricultural chemicals, coatings, synthetic resins, and raw materials for synthetic fibers, and demand worldwide is growing. Dimethyl ether is also a next-generation clean energy gaining traction as a diesel fuel alternative for automobiles and power generation. The extensive plant construction and operation track record of MC partners are expected to provide stable operation and will solidify MC’s business dominance in methanol sales capabilities, which account for a 10% share of the global market.
Our Group has transformed its business model from trading to minority investment, and now to a businesses management model in accordance with changes in the external business environment. From now, as the next stage, we aim to become an influencer by moving our business toward the center of the industry.

Mineral Resources Group Organization

<table>
<thead>
<tr>
<th>Mineral Resources Investment Division</th>
<th>Mineral Resources Trading Division</th>
</tr>
</thead>
<tbody>
<tr>
<td>Management of mineral resources related assets such as metallurgical coal, copper, iron ore, and aluminum</td>
<td>Trading of mineral resources such as coal, iron ore, nickel, ferroalloy, copper, aluminum, and precious metals</td>
</tr>
</tbody>
</table>

Risks and Opportunities in Light of Changes in the External Environment

<table>
<thead>
<tr>
<th>Risks</th>
<th>Opportunities</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reduced demand for metallurgical coal due to a greater proportion of steel production coming from methods with low greenhouse gas emissions</td>
<td>Increased demand for copper associated with the expanding use of electric vehicles (EV) and the adoption of renewable energy generation facilities</td>
</tr>
</tbody>
</table>

With metallurgical coal and copper as our main pillars, our mission is to further enhance the competitive advantage as well as the quality of its world-class quality assets, while delivering long-term sustainability in ways which are good for the environment and for the supply chain. We will leverage the know-how we have built up to strengthen our competitiveness by improving the level of self-management in each business and become more relevant in project management to further upgrade our organizational competencies.

Elements of the Midterm Corporate Strategy 2021

- As a growth initiative, development is underway at the Quellaveco copper mine.
- To make the mineral resources investment portfolio more resilient, in the fiscal year ended March 31, 2020, we completed our withdrawal from the Clermont thermal coal mine, the Western Australian iron ore development project, and Hernic Ferrochrome Pty Ltd (Chrome ore mining/Ferrochrome production).
- Our degree of involvement at the management level in each joint venture is enhanced by reinforcing the management platform and functionality of Mitsubishi Development Pty Ltd (MDP) and M.C. Inversiones Limitada, which are main business companies of the mineral resources business.
One of the World’s Largest Suppliers of Metallurgical Coal

Mitsubishi Development Pty Ltd (MDP) jointly operates its metallurgical coal business through BMA, together with its partner. BMA produces about 65 million tons per year and has a market share of approximately 30% in the global seaborne market. BMA produces high-quality and cost competitive metallurgical coal at its seven operating mines, together with a rail network and port terminal.

As the world transitions to a low-carbon society, we foresee potential impact on metallurgical coal demand as a result of wider use of electric furnaces for steelmaking and the adoption of new technology. However, even for a business environment derived from the 2°C scenario*, we expect BMA will preserve its competitive edge. While staying aware of changes in the business environment, we seek to remain competitive through cost reductions and to maintain our dominant qualities. We are also taking actions to reduce greenhouse gas emissions and support related research.

*IEA Sustainable Development Scenario: In this scenario, the GHG emission volumes for each industry are calculated in order to satisfy the Paris Agreement’s target of “holding the increase in the global average temperature to well below 2°C above pre-industrial levels.”

A World-Class Copper Project

Quellaveco, which has an anticipated mine life of 30 years, is one of the world’s largest undeveloped copper deposits and has a high cost competitiveness. The mine contains approximately 7.5 million tons (content metal basis) of copper in ore reserves. Development of the project commenced in August 2018, with the estimated first copper production in 2022. When production starts at Quellaveco, we expect our copper production volume to reach approximately 320 to 370 thousand tons.
IndusTrIal InfraStrucTure
IndusTrIal infraStructure Group

Our vision

Our Group operates diverse business models based on strong ties with various partners in a wide range of industries. We aim to achieve sustainable growth together with customers by offering services and solutions, including those related to digitization and mitigation of environmental impact, to meet our customers’ needs in various industries.

IndusTrIal infraStructure Group Organization

Plant Engineering Division
Investment and plant construction in the field of industrial infrastructure and engineering, and ownership and operation in the fields of FPSO and energy infrastructure

Industrial Machinery Division
Development of rental business and distribution business for industrial machinery such as construction machinery, agricultural machinery, machine tools, and elevators

Ship & Aerospace Division
Trading and related businesses in the field of ships, marine machinery, aerospace equipment, and systems. Ship owning & chartering business in the field of bulk carriers and LNG carriers

<tr>
<td>· Necessity of innovation in existing businesses through the expansion of digital technologies</td>
<td>· Capturing customer needs from an abundant customer base with a broad area of direct contact in diverse industries</td>
</tr>
<tr>
<td></td>
<td>· Offering digital solutions based on a partnership strategy</td>
</tr>
</tbody>
</table>

In the fields of plant engineering, industrial machinery, and ship and aerospace, we will further grow our existing businesses while actively undertaking new business development in adjacent industries. We have set support for the revitalization of the Chiyoda Corporation as our greatest mission, and will back up the company in terms of execution skills through our risk management capabilities and our management professionals, which will contribute to its revitalization.

Elements of the Midterm Corporate Strategy 2021

Existing businesses:

· Plant Engineering Division: We have created new business while also dispatching MC professionals to steadily support the revitalization of Chiyoda Corporation by reinforcing its corporate and risk management structure.
· Industrial Machinery Division: In Japan and overseas, we have strengthened and upgraded the rental business and built up the distribution business for industrial machinery.
· Ship & Aerospace Division: We have stabilized the ship owning & chartering business.

New business: Leveraging contact points with diverse industries, we are launching initiatives for the facility management business, electric vessel business, and digital solutions business in response to a broad range of customer needs.

*From the fiscal year ended March 31, 2018, figures have been adjusted to include certain consolidated adjustments regarding significant transactions during the lag period which is reflected in individual financial results of the company for the fiscal year ended March 31, 2019.

BUSINESS OVERVIEW OF THE INDUSTRIAL INFRASTRUCTURE GROUP

Chiyoda Corporation

In 2008, we underwrote a capital increase through third-party allotment implemented by the Chiyoda Corporation, made the company an equity-method affiliate, and provided management support and sales support to the company. Subsequently, in May 2019, we made the decision to respond to Chiyoda Corporation’s request to strengthen its financial position by providing support for revitalization. Later that year in September, Chiyoda Corporation became a subsidiary in terms of financial accounting. We are advancing initiatives that solidify Chiyoda Corporation’s underlying revitalization and growth that include dispatching MC professionals to bolster the corporate and risk management structure, combining the business management model that is our strength with the technological capabilities of Chiyoda Corporation, and achieving steady progress and improved profitability on project-based work currently under execution.

Mitsubishi Corporation Technos

Establishment of the Tokyo Customer Experience Center

In October 2019, the Tokyo Customer Experience Center (Tokyo CEC), was opened by Mitsubishi Corporation Technos, a company that handles machine tools, plant equipment, and other industrial machinery that supports manufacturing in Japan and overseas.

Through an alliance with the US General Electric Company (GE), a company with a proven track record in 3D printers, Tokyo CEC offers sales and maintenance of metal 3D printers and contract manufacturing of metal dies and other components. Tokyo CEC was established as both a showroom for these products and a lab facility.

By leveraging a customer network of over 4,000 Japanese companies, Mitsubishi Corporation Technos is furthering the adoption of metal 3D printing in Japan in pursuit of a manufacturing revolution.

Floating Production Storage and Offloading (FPSO) Business in Brazil

In December 2019, MC entered into a joint venture with SBM Offshore N.V. (SBM), a global leader in the FPSO sector, for the charter, operation, and maintenance of an FPSO system that was ordered by Petroleo Brasileiro S.A., the Brazilian national oil company in June 2019 (shareholding ratio of the JV: SBM 64.5%, MC 20%, and NYK Line 15.5%). The FPSO project is scheduled to commence operations offshore Brazil in 2022.

The project will be MC’s fifth joint FPSO project with SBM and the first Brazil FPSO project in six years. MC plans to continue expanding its FPSO and other offshore business around the world.

*From the fiscal year ended March 31, 2018, figures have been adjusted to include certain consolidated adjustments regarding significant transactions during the lag period which is reflected in individual financial results of the company for the fiscal year ended March 31, 2019.
Our Group will take on challenges in the mobility service-related business by leveraging expertise and know-how in the automotive value chain business, as well as strengthening our business platform, and aiming to simultaneously generate economic value, societal value, and environmental value by addressing issues related to mobility such as traffic congestion, traffic accidents, an aging society, and a shortage of drivers.

**OUR VISION**

**Elements of the Midterm Corporate Strategy 2021**

**Progress for the fiscal year ended March 31, 2020**

- In anticipation of further growth centered on our key market, the ASEAN region, we will strengthen our value chain business, including areas such as production, distribution, automobile finance, and after-sales service, as well as focus on expanding our downstream business areas. Furthermore, we will utilize the business infrastructure we have developed and work toward solving people- and goods-related mobility issues faster and on a larger scale through the mobility service-related business.

- In the automobile value chain business, we strengthened our business in the key ASEAN market by expanding exports of the Mitsubishi Motors Corporation MPV Xpander from Indonesia, and by introducing the new Isuzu Motors D-MAX pickup truck into Thailand.

- In downstream areas, we expanded our business domains through capital participation in fleet management, after-sales service for multiple brands, and e-commerce business in locations including ASEAN countries, India, and Russia.

- In the mobility service-related business, we established a new division for strengthening our promotion framework, committed to capital participation in Maas Global, and began operation of KnowRoute, the AI-based on-demand bus system in the city of Fukuoka.
We began importing and selling Isuzu Motors vehicles in Thailand in 1957. In 1974, we established Tri Petch Isuzu Sales (TIS) as a distributor to handle overall sales of Isuzu Motors vehicles within Thailand. Exports of Isuzu vehicles produced in Thailand started in 2003, and today we export to over 100 countries worldwide. As a distributor, TIS forms the core of wide-ranging operations, including sales, automobile finance, and after-sales services, and has built Isuzu into a leading brand in the commercial vehicle market.

We began importing and selling Isuzu Motors vehicles in Thailand in 1957. In 1974, we established Tri Petch Isuzu Sales (TIS) as a distributor to handle overall sales of Isuzu Motors vehicles within Thailand. Exports of Isuzu vehicles produced in Thailand started in 2003, and today we export to over 100 countries worldwide. As a distributor, TIS forms the core of wide-ranging operations, including sales, automobile finance, and after-sales services, and has built Isuzu into a leading brand in the commercial vehicle market.

Sales of the All New Isuzu D-MAX, a new pickup truck and the first model change in Thailand in eight years, started in October 2019 through Tri Petch Isuzu Sales Co., Ltd., the sole distributor and importer for Isuzu Motors Limited in Thailand, and in which MC holds an 88.73% share. MC will continue to expand business in Thailand, where demand for pickups is projected to continue to be strong, and to contribute to Thailand’s economic development.
Norio Saigusa
Executive Vice President
Group CEO,
Food Industry Group

Our Group works to establish a stable and sustainable business model that contributes to the resolution of various societal challenges surrounding supply chains. From raw materials to processed foods, our stable business platform handles various products that fulfill consumers’ need, while we aim to ensure safety and security for consumers, and to create value that meets societal needs accordingly. We also set out to seize growth opportunities by expanding high-quality products and services into the global market.

Food Industry Group Organization

Food Sciences Division
Development, manufacturing, and sales in the field of food ingredients, seasonings, pharmaceuticals, agrochemicals, and cosmetic raw materials

Food Resources Division
Production, procurement, processing, and sales of grains, compound feed, and food raw materials

Fresh Food Products Division
Production, processing, and sales of fish, meat, rice, vegetables, dairy products, etc.

Consumer Products Division
Manufacturing and sales business related to consumer goods, like food products and daily necessities

Risks and Opportunities in Light of Changes in the External Environment

<table>
<thead>
<tr>
<th>Risks</th>
<th>Opportunities</th>
</tr>
</thead>
<tbody>
<tr>
<td>Decline in agricultural, livestock, and dairy production volume due to climate change in production areas and increase in natural disasters</td>
<td>Improvement of efficiency in the primary industry through the utilization of digital data</td>
</tr>
<tr>
<td>Impact on the aquaculture business (production volume decline, increased feed prices, damage to equipment, etc.) due to rising sea levels and ocean temperatures</td>
<td>Development of new aquaculture methods that are less affected by the environment (e.g. land-based farming)</td>
</tr>
<tr>
<td>Decrease of supply volumes and procurement difficulties due to depletion of natural resources and tightening of resource conservation regulations</td>
<td>Enhancement of a sustainable procurement network that takes the environment and society into consideration</td>
</tr>
<tr>
<td>Heightened need for building supply chains that take human rights and environmental issues into consideration</td>
<td>Diversified consumer needs, including heightened demand for ethical and certified products</td>
</tr>
</tbody>
</table>

We constantly innovate our supply chains, and offer products that fit consumers’ needs. We will specifically realize continuous growth while addressing sustainability and societal issues in the entire food industry. In addition to continuous improvement of profitability in existing businesses (e.g. salmon farming, food materials), we make a persistent effort to adapt properly to the diversification of food and people’s lifestyles through the integration of food resources and development capabilities within the Group.

Food Science Business: Maximization of Group companies’ strengths, such as establishment of new joint venture between Mitsubishi Corporation Life Sciences and ITOHAM FOODS Inc.
Salmon Farming Business: Promotion of initiatives to boost profitability through improvement of productivity, including obtaining approval for a proof-of-concept test of new aquaculture technology using image analysis to identify and manage fish specimens.
Food Materials Business: Start of initiatives to address diversification in food and changes in consumer lifestyles, such as the launch of a new food brand (details on the page opposite).
ENVIRONMENT AND SUSTAINABILITY INITIATIVES IN THE GROUP

Food Brand Business Built on Consideration for Sustainability: “imperfect” Business

We launched the food brand “imperfect” and opened its flagship store, “imperfect Omotesando”. This business will contribute to the resolution of societal issues related to food and agriculture by offering food created with consideration of supply chain sustainability issues.

We will use this “imperfect Omotesando” as a hub for communication about the background stories behind food products, such as support for farmers and consideration for environmental protection, while engaging in “Do well by doing good” activities for society with consumers.

Contributing to a Circular Society Through the Reuse of Food Waste: Feed Manufacturing Business

Livestock feed manufacturer Nosan Corporation seeks to contribute to the creation of a circular society through initiatives to make livestock feed from reused waste items (unsold food, by-products, etc.) generated during the commercial food distribution process in Japan.

In August 2019, in cooperation with LAWSON, Inc., Mitsubishi Shokuhin Co., Ltd and Nosan Corporation, we conducted a proof of concept trial in which we collected waste food from stores in LAWSON, Inc. and reprocessed it into feed. We are now considering the full-scale implementation of reprocessing into feed.

Providing Sustainable Food: Salmon Farming Business

The operations are environment friendly and have low CO2 emissions, and the salmon, which are high feed-efficiency fish, are a sustainable food item.

With the population of the globe expected to further increase, the Group will produce foods with high nutritional value to contribute to global stabilization of food supplies.
We will continue to work on important issues in the consumer society by building a “next-generation consumer platform,” and keep expanding its contact with consumers through the integration of the real and digital business models. We will establish a cyclical growth model by discovering New Seeds of Growth, as well as by strengthening our Core Businesses through the promotion of ESG management rooted in the creation of data value and of corporate management personnel.

**OUR VISION**

Yutaka Kyoya  
Executive Vice President  
Group CEO, Consumer Industry Group

**Elements of the Midterm Corporate Strategy 2021**

- In December 2019, we formed an agreement with KDDI CORPORATION, Loyalty Marketing, Inc. and Lawson, Inc. on an initiative aimed at creating a new consumption experience that fuses the Internet with the real world.
- We will tackle streamlining and optimization through digital transformation (DX) in the intermediary distribution business, including food distribution, as well as the creation of customer value (demand).

**Progress for the fiscal year ended March 31, 2020**
Data Marketing Business

We provide marketing services informed by insights into latent consumer needs made possible by analysis of data from Loyalty Marketing’s Ponta point service, which has more than 90 million members (as of March 2020).

As a result of the capital business partnership with KDDI formed in December 2019, au WALLET points issued by KDDI were integrated with Ponta points in May 2020. We will also be working to move ahead with partnerships in diverse industries and to develop research operations and support for marketing promotion by encouraging point use among an ever-expanding membership base.

We are also taking on the challenge of generating new demand through efforts such as the “cacicar” data analysis cloud service provided by MC Data Plus, storefront digital signage, and the CookpadTV app that provides popular recipes and cooking videos.

New Initiatives with Lawson

We are using technology to seek out customer convenience and solutions to societal issues while providing new consumer experience at offline points of contact in approximately 14,500 (as of July 2020) Lawson stores.

1. Implementation of SMARI services
   (product returns, shipping and receiving for individual transactions)
   SMARI services were adopted to reduce workloads for store staff, effectively utilize idle space in the existing distribution network, and increase consumer convenience through contactless deliveries. Currently in about 2,000 stores in the Tokyo metropolitan area, the services are scheduled for expansion to 3,000 stores in areas outside Tokyo as well.

2. Efforts with “nendo”
   We welcomed nendo, the worldwide design office funded with investment from the Tsukumo Fund (a venture company system within MC Group), as our creative partner to renew private branding of the store’s logo and packaging for merchandise offered under its private brand (700 items).

3. Introduction of self-checkout
   Introducing self-checkout systems as part of efforts to reduce workforce and workload through digital technology.
   By enabling customers to conduct cashless transactions on their own without making contact with store staff, these systems also serve as part of efforts to prevent the spread of COVID-19, and have been introduced at approximately 9,600 stores (as of July 2020).
The electricity that our Group deals with is the foundation of one of the most important infrastructures. Not only is our Group helping to secure stable energy supplies by combining renewables and other clean sources with digital technologies, but it is also playing its part to build sustainable societies and increase corporate value by providing added value, such as a function to balance supply and demand for our customers.

**OUR VISION**

Through the electricity used regularly by each household and customer, we aim to provide new services that fit the customer’s mindset while not limiting those services to sales of electric power. Moreover, in addition to the traditional offering of power generation and transmission (“supply side” of the business), we are engaged in downstream services (“demand side” of the business) including power storage, distributed power supply, and power trading, and seek to maximize our corporate value covering everything from upstream to downstream.

| Risks and Opportunities in Light of Changes in the External Environment |
|---|---|
| **Risks** | **Opportunities** |
| Changes in the regulations, measures, and loan policies for the electric power business in light of measures to address global warming | Growth in business opportunities in renewable energy and distributed power supply |
| Changes in regulations and policies in each country in regards to the power business | Adoption of battery storage and related services, along with the growing deployment of renewable energy |
| | Expanding use of next-generation energy sources, including hydrogen |
| | More opportunities for the power business in new domains due to changes in regulations and policies in each country |

**Elements of the Midterm Corporate Strategy 2021**

The following initiatives are undertaken for the entire electric power value chain from upstream (supply side) to downstream (demand side).

- On the supply side, we undertook stable business expansion of the domestic and overseas power generation businesses centered on renewable energy and an offshore transmission business to support offshore wind power.
- On the demand side, we acquired Eneco in the Netherlands, an integrated energy company, and made an equity investment in BBOXX Limited, which is expanding its distributed power supply business to off-grid areas mainly in Africa.

*3 The name of the business changed to DIAMOND SOLAR JAPAN KK in August 2015.

> BUSINESS MODEL OF THE POWER SOLUTION GROUP

Our Company’s traditional electric power business is on the supply side centered on generation and transmission. Now, however, through business expansion on the demand side, including a power trading business and a retail business with a customer base, we endeavor to lift corporate value across the entire value chain, including the supply side.

Without being held back by existing frameworks, we make use of digital technologies to supply new services combined with electric power.

(Unit: billions of yen)
Our mission is to establish high value-added, large-scale businesses by combining urban and infrastructure development, asset finance and other businesses to meet societal and environmental needs, such as urbanization and lower environmental impacts. We will create long-term community value through engagement in long-term town management, proactive participation in large-scale, multi-use area development and multi-phase development projects.

OUR VISION

Mitsumasa Icho
Executive Vice President
Group CEO, Urban Development Group

Urban Development Group Organization

Urban Infrastructure Division
Domestic and overseas water supply, railway, port terminal and airport operation, data center and digital infrastructure businesses

Urban Development Division
Domestic and overseas urban development, real estate development, real estate fund management, and other real estate-related businesses

Asset Finance Division
Private equity, and a domestic and overseas leasing service, including auto and aircraft leasing

<td>Coexistence with local communities</td>
<td>Shift to provide new services and contents through digital technologies</td>
</tr>
</tbody>
</table>

Going beyond conventional real estate development such as residential and commercial facilities, we will shift toward “area development” of large-scale, multi-use developments. In area development projects, we will develop transportation infrastructure such as railways and roads, and utilities such as electric power and sewer systems, while taking part in the initial stage of the master planning process to develop commercial facilities, offices, residences, and hospitals in order to create a highly functional and compelling urban community, mainly in the growing ASEAN countries and Japan.

- Commenced our first large-scale urban development project in Indonesia. MC continues to look into subsequent projects mainly in ASEAN countries and plans to make further investments in the urban development and infrastructure development sector during the term of the Midterm Corporate Strategy 2021.
- Engage in town management to enhance usability, comfort and safety to attract people and businesses, improving the appeal of the area, and establish a cycle to attract potential new customers to create sustainable growth in community value.

> **OVERVIEW OF URBAN DEVELOPMENT**

- **Concepts**
  - Large scale
  - Long term
  - Multi use
  - Multi-phase development

- **MC aims to develop high quality urban areas and enhance sustainable urban value.**
  - Promote and participate in highly functional and attractive urban development from the initial phase of development
  - Create sustainable value by taking a hands-on approach in developing and managing urban areas
  - Maximize use of extensive MC Group expertise and networks to enhance urban services and content

> **MAIN BUSINESSES**

- **Real Estate Development and Asset Management Business**
  - MC engages in various real estate development businesses for commercial complexes, logistics facilities, residential properties, and other uses in Japan, Asia, and North America. MC is also involved in real estate fund management businesses in Japan and North America.

- **Data Center Operation Business**
  - MC Digital Reality was established as a joint venture in 2017 with Digital Realty Trust, Inc., the world’s largest business operator of data centers. This company aims to leverage the demand for data centers in Japan to become one of the country’s top business operators for data centers.

- **Airport Operation Business**
  - MC has been participating in the business of airport operation since 2015, following the privatization trend of airport operations. Since airports are the entrances to countries and regions, participation in the operation of airports helps resolve issues directly faced by each region and contributes to economic and societal growth.

- **Leasing Business**
  - As leasing demand continues to grow globally, MC takes advantage of access and networks to a broad range of industrial fields unique to a general trading company through alliances and cooperation with influential partners to expand the leasing business.
MC leverages its global network, which it has developed over many years, to obtain an in-depth knowledge on a multifaceted range of macroeconomic, industrial and geopolitical trends not limited to generally available information. MC also builds upon this intelligence and expertise on a daily basis through its deep involvement in frontline businesses spanning virtually every industry worldwide. At the same time, it is crucial that the information accumulated at each location be shared laterally beyond each respective Business Group and region, and for it to be utilized to develop intellectual capital throughout the Group. MC’s offices and subsidiaries, both in Japan and overseas, play an important role in this lateral development of the MC Group.

Notes:
1. The US dollar amounts represent translations, for convenience, of yen amounts at the rate of ¥109.0=$1.00
2. Figures for the fiscal year ended March 31, 2011, have been adjusted retrospectively to reflect the impact of changes in the fiscal year end of consolidated subsidiaries.
3. The application of IFRS 16 “Leases” from the start of the fiscal year ended March 31, 2020, increased total assets due to an increase in right-of-use assets included in calculations. In addition, lease payments have been reclassified from net cash provided by operating activities to net cash provided by financing activities.
4. Net income (loss) attributable to owners of the parent corresponds to net income (loss) attributable to Mitsubishi Corporation under US GAAP; Borrowings (less current maturities) correspond to long-term debt, less current maturities under US GAAP; Equity attributable to owners of the parent corresponds to total Mitsubishi Corporation shareholders’ equity under US GAAP.
5. Working capital consists of all current assets and liabilities, including cash and short-term debt.
6. *Gross interest-bearing liabilities” (excluding lease liabilities) is defined as the total of debt and borrowings of current and fixed liabilities.
7. Net interest-bearing liabilities is defined as gross interest-bearing liabilities minus cash and cash equivalents and time deposits.
8. ROE = Net income (loss) attributable to owners of the parent / Average shareholders’ equity
9. ROA = Net income (loss) attributable to owners of the parent / Average total assets
10. Net DER = (Total assets - Current liabilities) / Net income (loss) attributable to owners of the parent
11. DOE = (Total assets - Current liabilities) / Shareholders’ equity
12. PER = Price / Earnings per share
13. PBR = Price / Book value per share

*6 The payout ratio was calculated based on net income attributable to owners of the parent for the fiscal year before reclassification (this includes the restatement of results for the fiscal years ended March 31, 2013 and March 31, 2014 due to the change from US GAAP to IFRS).

*7 Excluding treasury stock held by the Company.

*8 ROE is calculated by dividing net income (loss) attributable to owners of the parent by the average of equity attributable to owners of the parent at the beginning and end of the fiscal year.

*9 ROA is calculated by dividing net income (loss) attributable to owners of the parent by the average of total assets at the beginning and end of the fiscal year.

*10 Net DER is calculated by dividing net interest-bearing liabilities by equity attributable to owners of the parent at the end of the fiscal year.

*11 DOE is calculated by dividing cash dividends per share by equity per share attributable to owners of the parent at the beginning and end of the fiscal year.

*12 PER is calculated by dividing market capitalization, as determined by multiplying the average share price during the fiscal year by the number of shares issued at the fiscal year-end (including treasury stock held by the Company), by net income (loss) attributable to owners of the parent.

*13 PBR is calculated by dividing market capitalization, as determined by multiplying the average share price during the fiscal year by the number of shares issued at the fiscal year-end (including treasury stock held by the Company), by equity per share attributable to owners of the parent.

  - 2020/3: 0.49

*1 Effective from the fiscal year ended March 31, 2017, emissions from projects with high community, including power generation and heat generation (utility business), as well as joint operations (jointly managed projects), were included in the calculations. Furthermore, while emissions from franchises are generally not included in Scope 1 and 2 emissions, MC includes such emissions in cases where it is deemed appropriate for such emissions to be managed as part of MC’s emissions. Taking into account the relationship with the relevant company. While the results for the fiscal year ended March 31, 2020 were being compiled, the environmental data for the previous fiscal years was also adjusted.
*2 The following metrics were adopted as the basis for calculating greenhouse gas emissions.
  - Direct CO2 emissions from fuel consumption
  - Indirect CO2 emissions from electricity consumption, etc.
  - IEA CO2 Emissions from Fuel Combustion (2016 edition), CO2 emissions per kWh from electricity generation of the fiscal year ended March 31, 2014
*3 Data collected in compliance with the Act on Rational Use of Energy in Japan. Logistics figures cover domestic (Japan) transport where MC is the cargo owner.
*4 Copy paper (calculated as A4 size) consumption
*5 MC adopted a policy that aims to reduce greenhouse gas (GHG) emissions per total assets by 25% compared to fiscal year ended March 31, 2017 levels by 2030. The total assets used for this target represent the numerical values within the emissions reporting calculation range, which differ from the total assets reported in MC’s financial reports.
*6 As of April 1 of each calendar year
*7 The Global Trainees System is an overseas assignment system aimed at young employees in order to respond to the global development of MC’s business portfolio and strengthen the global competitiveness of MC’s human resources.
*8 As of June 1 of each calendar year
*9 The number of employees who began taking this type of leave during each fiscal year
*10 As of April 1 of each calendar year
*11 Employee awareness surveys are taken every three years. The last survey was taken in the fiscal year ended March 31, 2020 to obtain a snapshot of employee motivation and organizational vitality. The findings are used to improve management and other aspects of operations. Employee satisfaction figures represent the ratio of staff members responding positively to questions about employee engagement (Do you work with enthusiasm and take pride in/admire your company?) in the survey.
*12 Calculated based on standards set by the Ministry of Health, Labour and Welfare of Japan. Employees at the Head Office and domestic branches (excluding corporate advisors and contract employees)
