1. Qualitative Information Concerning Consolidated Operating Results

(Consolidated net income, as used hereinafter, refers to net income attributable to owners of the Parent.)

(1) Qualitative Information Related to Consolidated Results of Operations

Summary of Results for the Nine Months Ended December 2014

In the first nine months of the year ending March 2015, the U.S. economy continued to experience a solid recovery, driven by consumer spending. In Europe, there were continuing signs of an upturn in overall economic conditions, albeit at a gradual pace of recovery. Certain emerging nations experienced a slowdown in economic growth. The Japanese economy followed a moderate recovery path, despite a pull-back from last-minute demand ahead of the increase in the consumption tax rate. In the latter half of 2014, resource prices such as crude oil prices decreased, while the yen depreciated further.

Against this backdrop, revenues for the first nine months of the year ending March 2015 increased 118.7 billion yen, or 2% year over year, to 5,844.1 billion yen. This increase was mainly due to higher transaction volumes and foreign currency factors.

Gross profit was 882.1 billion yen, mostly unchanged year on year.

Selling, general and administrative expenses increased 37.3 billion yen, or 5%, to 732.9 billion yen, due mainly to the impact of business expansion (new consolidations).

In other P/L items, impairment losses on long-lived assets increased mainly due to the recording of impairment losses in the gas and oil development business in North America and Europe, while other (expense) income-net

and finance income increased mainly due to an improvement in foreign exchange gains and losses, as well as to higher dividend income from resource-related investees.

Income from investments accounted for using the equity method increased 10.6 billion yen, or 6%, to 177.8 billion yen.

As a result, consolidated net income attributable to owners of the Parent for the nine months ended December 2014 decreased 19.1 billion yen, or 6%, to 315.3 billion yen.

Review of Operating Segments

1) Global Environmental & Infrastructure Business Group

The Global Environmental & Infrastructure Business Group conducts infrastructure projects, related trading operations and other activities in power generation, water, transportation and other infrastructure fields that serve as a foundation for industry.

The segment recorded consolidated net income of 23.1 billion yen, an increase of 4.8 billion yen year over year.

The higher earnings mainly reflect increased earnings from the FPSO (Floating Production Storage & Offloading System) chartering business and the North American power generation business, despite the absence of gains accompanying the sale of part of a power generation business subsidiary recorded in the previous fiscal year.

2) Industrial Finance, Logistics & Development Group

The Industrial Finance, Logistics & Development Group is developing shosha-type industrial finance business. These businesses range from asset management, infrastructure investment, and buyout investment to leasing,

real estate development and logistics services.

The segment recorded consolidated net income of 36.5 billion yen, an increase of 11.6 billion yen year over year.

The higher earnings mainly reflected increased earnings in the fund investment business and the sale of real estate held for sale.

3) Energy Business Group

The Energy Business Group conducts a number of activities including oil and gas exploration, development and production (E&P) business; investment in natural gas liquefaction projects; trading of crude oil, petroleum products, carbon materials and products, LNG (Liquefied Natural Gas), and LPG (Liquefied Petroleum Gas); and planning and development of new energy business.

The segment recorded consolidated net income of 80.3 billion yen, a decrease of 26.2 billion yen year over year.

This decrease mainly reflected the recording of impairment losses in the gas and oil development business in North America and Europe in line with a decrease in oil prices and changes in the business environment.

4) Metals Group

The Metals Group trades, develops business and invests in a range of fields. These include steel products such as steel sheets and thick plates, steel raw materials such as coking coal and iron ore, and non-ferrous raw materials and products such as copper and aluminum.

The segment recorded consolidated net income of 25.7 billion yen, a decrease of a 1.3 billion yen year over year.

The decrease reflects mainly lower sales prices in the Australian coal business.

5) Machinery Group

The Machinery Group handles sales, finance and logistics across many different sectors, in which it also invests. These fields include machine tools, agricultural machinery, construction machinery, mining machinery, elevating machinery, ships, aerospace-related equipment and motor vehicles.

The segment recorded consolidated net income of 68.5 billion yen, a decrease of 9.5 billion yen year over year.

This decrease mainly reflects lower sales in Asian automobile operations and the rebound of a one-off gain associated with the revaluation of assets recorded in the previous fiscal year.

6) Chemicals Group

The Chemicals Group trades chemical products in a broad range of fields, in which it also develops business and invests. These fields extend from basic materials such as ethylene, methanol, and salt produced from crude oil, natural gas, minerals, plants, marine resources and so forth, to midstream and downstream products such as plastics, electronic materials, food ingredients, fertilizer and fine chemicals.

The segment recorded consolidated net income of 21.4 billion yen, a decrease of 1.6 billion yen year over year.

Earnings decreased mainly due to lower earnings on transactions at a petrochemical business-related company.

7) Living Essentials Group

The Living Essentials Group provides products and services, develops businesses and invests in various fields closely linked with people's lives, including food products and food, textiles, essential supplies, healthcare, distribution and retail. These fields extend from the procurement of raw materials to the consumer market.

The segment recorded consolidated net income of 56.0 billion yen, an increase of 11.7 billion yen year over year.

Earnings increased mainly due to higher sales prices in the livestock business.

(2) Qualitative Information Concerning Consolidated Financial Position

Changes in Assets, Liabilities and Equity

Total assets at December 31, 2014 were 17,148.4 billion yen, an increase of 1,247.3 billion yen from March 31, 2014. Total assets rose mainly because of an increase in investments accounted for using the equity method due to the impact of the yen's depreciation and new and additional investments, an increase in trade receivables and other receivables mainly due to increased sales volume, as well as increases in various asset items associated with the acquisition of new subsidiaries.

Total liabilities were 11,193.1 billion yen, an increase of 831.3 billion yen. This mainly reflected an increase in long-term debt due to the impact of the yen's depreciation, the procurement of funds for making new and additional investments, and an increase in trade payables and other payables mainly due to a higher number of transactions, as well as an increase in short-term debt reflecting the procurement of funds in line with an increase in working capital at subsidiaries.

Interest-bearing liabilities (net), which are interest-bearing liabilities (gross) minus cash and cash equivalents and time deposits, increased 441.4 billion yen from March 31, 2014 to 5,042.5 billion yen. The net debt-to-equity ratio, which is net interest-bearing liabilities divided by equity attributable to owners of the Parent, was 0.9.

Equity attributable to owners of the Parent increased 397.5 billion yen to 5,465.2 billion yen. This increase was mainly due to an increase in retained earnings because of the consolidated net income, as well as an increase in exchange differences on translating foreign operations in line with the yen's depreciation, which were partly offset by the payment of dividends at the Parent.

Cash Flows

Cash and cash equivalents at December 31, 2014 were 1,342.5 billion yen, an increase of 10.5 billion yen from March 31, 2014.

(Operating activities)

Net cash provided by operating activities was 357.7 billion yen, mainly due to cash flows from operating transactions and dividend income.

(Investing activities)

Net cash used in investing activities was 274.8 billion yen. Investing activities used net cash mainly due to an investment in a salmon farming company and capital expenditures in the Australian coal business, despite cash provided by the sale of aircraft and the collection of loans receivable at subsidiaries.

As a result, free cash flow, the sum of operating and investing cash flows, was a positive 82.9 billion yen.

(Financing activities)

Net cash used in financing activities was 131.6 billion yen. Financing activities used net cash mainly due to the purchase of treasury stock and the payment of dividends at the Parent.

(3) Qualitative Information Concerning Consolidated Forecasts for the Year Ending March 2015

There has been no change to the consolidated earnings forecasts for the year ending March 2015 announced on May 8, 2014. Please note that the basic assumptions for the earnings forecasts have been revised, as follows.

Note:

Earnings forecasts and other forward-looking statements in this release are based on data currently available to management and certain assumptions that management believes are reasonable. Therefore, they do not constitute a guarantee that they will be achieved. Actual results may differ materially from these statements for various reasons.

2. Summary Information (Notes)

(1) Significant Changes in Subsidiaries During the Nine Months Ended December 2014 (Changes in Specified Subsidiaries Causing Changes in Scope of Consolidation)

From the nine months ended December 2014, MCX GULF OF MEXICO, LLC is excluded from the scope of consolidation due to its extinguishment following the execution of an absorption-type merger in which MCX EXPLORATION (USA), LLC, a group company of Mitsubishi International Corporation (U.S.A.), was the surviving company and MCX GULF OF MEXICO, LLC was the extinguished company. Mitsubishi International Corporation (U.S.A.) is a U.S. subsidiary of Mitsubishi Corporation.

(2) Changes in Accounting Policies and Changes in Accounting Estimates

The important accounting policies applied to the condensed consolidated financial statements for the nine months ended December 2014 are identical to the accounting policies applied to the consolidated financial statements for the previous fiscal year, except for the following:

New standards and interpretation guidelines applied

Standard and interpretation guideline	Outline
IFRIC 21 Levies	Accounting treatment of liabilities related to levies
IAS 36 Impairment of Assets (Amended)	Disclosure requirements for the recoverable amount of impaired assets

The adoption of the above standards and interpretation guidelines had no impact on the condensed consolidated financial statements for the nine months ended December 2014.

	Initial forecast	Revised forecast			Consolidated Net Income Sensitivities
	Forecast for year ending March 2015 (Announced May 8, 2014)	Nine months ended Dec. 2014 (Apr.-Dec.)	Three months ending March 2015 (Jan.-Mar.)	Forecast for year ending March 2015 (Updated)	
Foreign Exchange (yen/US\$)	100	106.7	115	108.8	Depreciation (appreciation) of 1 yen per US\$1 has a 2.5 billion yen positive (negative) impact on a full-year basis.
Yen Interest (%) TIBOR	0.25	0.20	0.20	0.20	The effect of rising interest rates is mostly offset by an increase in operating and investments profits. However, a rapid rise in interest rates can cause a temporary effect.
US\$ Interest (%) LIBOR	0.40	0.23	0.30	0.25	
Crude Oil Prices (US\$/BBL) (Dubai)	100	94	50	83	A US\$1 rise (decline) per barrel increases (reduces) full-year earnings by 1.0 billion yen. Other variables could affect crude oil-related earnings, such as different closing dates in affiliates, timing of the reflection of the crude oil price in sales prices, dividend policy and sales volume as well as crude oil price fluctuations. Therefore, the impact on earnings cannot be determined by the crude oil price alone.
Copper (US\$/MT) [¢ /lb]	7,496 [340]	6,803 [309]	6,504 [295]	6,727 [305]	A US\$100 rise (decline) per MT increases (reduces) full-year earnings by 1.3 billion yen. Other variables could affect copper mines, such as grade of mined ore, condition of production operations, and capital expenditure as well as copper price fluctuations. Therefore, the impact on earnings cannot be determined by the copper price alone.
