# 1. Qualitative Information

(Profit for the period, as used hereinafter, refers to profit for the period attributable to owners of the Parent.)

## (1) Results of Operations

Revenues was ¥1,796.7 billion, an increase of ¥268.9 billion, or 18% year over year, mainly due to increases attributed by Lawson, Inc. (hereinafter "Lawson") becoming a subsidiary.

Gross profit was ¥442.1 billion, an increase of ¥178.9 billion, or 68% year over year, mainly due to increases attributed by Lawson becoming a subsidiary and higher market prices in the Australian coal business.

Selling, general and administrative expenses rose ¥114.1 billion, or 51% year over year, to ¥338.3 billion, mainly due to increases attributed by Lawson becoming a subsidiary.

Gains on investments decreased \$22.8 billion year over year, to \$6.5 billion, mainly due to the rebound of one-off gains accompanied by the business merger among associate companies in the previous year.

Impairment losses on property, plant and equipment and others amounted to \$37.1 billion, an increased loss of \$34.9 billion year over year, mainly due to impairments of resource-related assets in the current year.

Share of profit of investments accounted for using the equity method increased ¥11.5 billion, or 31% year over year, to ¥48.8 billion, mainly due to higher resource-related market prices.

As a result, profit before tax increased ¥26.2 billion, or 19% year over year, to ¥167.0 billion.

Accordingly, profit for the period grew ¥17.0 billion, or 17% year over year, to ¥117.8 billion.

# (2) Financial Position

Total assets as of June 30, 2017 was \$15,507.8 billion, a decrease of \$245.8 billion from March 31, 2017. The decrease was mainly due to lower cash and cash equivalents, owing to the repayment of bonds and borrowings, and to lower trade and other receivables stemming from lower transaction volumes.

Total liabilities was \$9,603.4 billion, a decrease of \$361.1 billion from March 31, 2017. This decline was attributable to lower trade and other payables, in line with a decrease in transaction volumes, as well as to the repayment of bonds and borrowings.

Net interest-bearing liabilities, which is gross interest-bearing liabilities minus cash, cash equivalents and time deposits, decreased ¥45.7 billion from March 31, 2017, to ¥3,945.8 billion.

Equity attributable to owners of the Parent was  $\frac{4,995.1}{1000}$  billion, an increase of  $\frac{477.9}{1000}$  billion from March 31, 2017. This increase was mainly due to the accumulation of profit for the period.

# (3) Cash Flows

Cash and cash equivalents as of June 30, 2017 was ¥1,044.9 billion, down ¥100.6 billion from March 31, 2017.

# (Operating activities)

Net cash provided by operating activities was \$165.9 billion, mainly due to cash flows from operating transactions and dividend income, despite the payment of income taxes.

# (Investing activities)

Net cash used in investing activities was ¥46.1 billion. The main use of cash was for capital expenditures, despite cash provided by the sale of listed stocks and sale of shares in the real estate business.

As a result, free cash flows, the sum of operating and investing cash flows, was positive \$119.8 billion.

# (Financing activities)

Net cash used in financing activities was ¥227.4 billion, mainly due to the repayment of borrowings, redemption of bonds, and the payment of dividends at the Parent.

# (4) Forecasts for the Year Ending March 2018

There has been no change to the forecasts for the year ending March 2018 announced on May 9, 2017.

Note:

Earnings forecasts and other forward-looking statements in this release are based on data currently available to management and certain assumptions that management believes are reasonable. Therefore, they do not constitute a guarantee that they will be achieved. Actual results may differ materially from these statements for various reasons.

Market-related sector*	19.2	34.3	15.1	97.0	35%

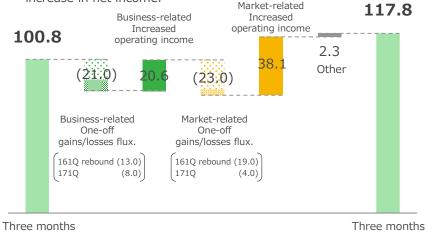

\* Market-related sector includes North American shale gas and E&P in the Energy Business segment, Mineral resources in the Metals segment, and Ships (commercial vessels) in the Machinery segment.

ended June 2016

- <u>Earnings increased 17.0 billion yen year-over-year</u> mainly due to higher market prices in the Australian coal business.
- Steady progress of 26% against the forecast for the year ending March 2018.

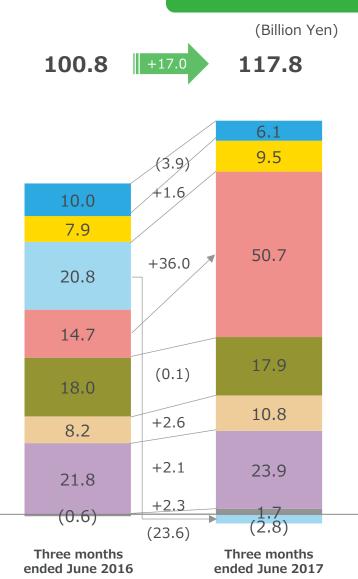

- In the <u>Business-related sector</u>, amid the rebound of one-off gains from the meat business restructuring etc., solid accumulation of operating income resulted in basically maintaining the income level year-over-year.
- In the <u>Market-related sector</u>, amid the one-off losses from resourcerelated asset replacements in addition to the rebound of one-off gains from the shale gas business restructuring, increased operating income in the Australian coal business due to higher market prices led to an increase in net income.

# [Foreign Exchange, Commodity Prices and Interest Rates]

	Three months ended June 2017	Forecast for the year ending March 2018 (Released on May 9)	Variance	Consolidated Net Income Sensitivities
Foreign Exchange (YEN/US\$)	111.09	110.00	+1.09	Depreciation/appreciation of 1 yen per US\$1 has a 2.5 billion yen positive/negative impact on a full-year basis.
Crude Oil Price (Dubai) (US\$/BBL)	50	50	±0	A US\$1 rise/decline per barrel increases/reduces full-year earnings by 2.0 billion yen. In addition to changes in crude oil prices, other factors could also affect crude oil-related earnings, such as differences in the fiscal year-ends of consolidated companies, timing of the reflection of the crude oil price in sales prices, dividend policy, foreign currency movements, and production/sales volume.
Copper (US\$/MT) [¢/lb]	5,662 [ 257 ]	5,512 [ 250 ]	+150 [ +7 ]	A US\$100 rise/decline per MT increases/reduces full-year earnings by 1.3 billion yen (A US\$10 rise/decline per lb increases/reduces full-year earnings by 2.9 billion yen). Besides copper price fluctuations, other variables affect earnings from copper mines, such as the grade of mined ore, the status of production operations, and reinvestment plans (capital expenditure). Therefore, the impact on earnings cannot be determined by the copper price alone.
YEN Interest TIBOR (%)	0.06	0.10	(0.04)	The effect of rising interest rates is mostly offset by an increase in operating and investment profits. However, a rapid rise in interest
US\$ Interest LIBOR (%)	1.21	1.40	(0.19)	rates could have a temporary negative effect.
