	Forecast for the year ending March 2022* (Released May 7)	Revised forecast for the year ending March 2022* (Released Nov. 5)	Fluctuation	Six months ended September 2021	Consolidated Net Income Sensitivities for the year ending March 2022 [For crude oil and copper price, preliminary sensitivities at this time are shown for reference, since there is a possibility of significant revision due to changes in production levels, etc.]
Foreign Exchange (YEN/US\$)	108.00	109.91 (2 nd Half:110.00)	+1.91	109.81	Depreciation/appreciation of 1 yen per US\$1 has a 3.5 billion yen positive/negative impact on full-year earnings.
Crude Oil Price (Dubai) (US\$/BBL)	54	60	+6	52	A US\$1 rise/decline per barrel increases/reduces full-year earnings by 2.5 billion yen. To better account for the differences in fiscal year-ends of consolidated companies and the timing when crude oil price is actually reflected in LNG sales price, the average price for the preceding 6 month period (e.g. For the year ending March: average price from Oct. to Sep.) is utilized. In addition to changes in crude oil price, other factors could also affect crude oil-related earnings, such as dividend policy, foreign currency movements, and production/sales volume. Therefore, the impact on earnings cannot be determined by the crude oil price alone.
Copper Price (US\$/MT) [US ¢ /lb]	7,826 [355]	9,017 [409] (2 nd Half:[384])	+1,191 [+54]	9,531 [432]	A US\$100 rise/decline per MT increases/reduces full-year earnings by 1.3 billion yen (A US¢10 rise/decline per lb increases/reduces full-year earnings by 2.8 billion yen). In addition to changes in copper price, other variables affect earnings from copper mines, such as the grade of mined ore, the status of production operations, and reinvestment plans (capital expenditure). Therefore, the impact on earnings cannot be determined by the copper price alone.
YEN Interest TIBOR 3M (%)	0.10	0.09	(0.01)	0.06	The effect of rising interest rates is mostly offset by an increase in operating and investment profits. However, a rapid rise in interest rates could have a temporary negative effect.
US\$ Interest LIBOR 3M (%)	0.30	0.17	(0.13)	0.14	

* The annual average is shown for the forecast for the year.

Remarks

- BMA production in Jul-Sep 2021 decreased by 9% to 6.7mil. mt on a year on year basis.
- This decrease was due to planned wash plant maintenance at Goonyella and Peak Downs and planned dragline maintenance at Caval Ridge.

Metallurgical Coal Business Mineral Resources Group

Price Trend of Hard Coking Coal (January-September 2021)

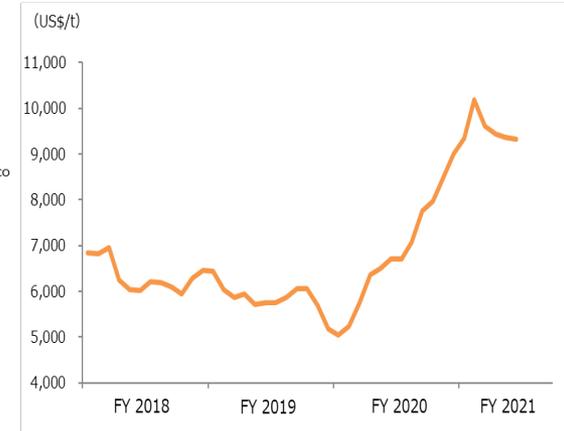

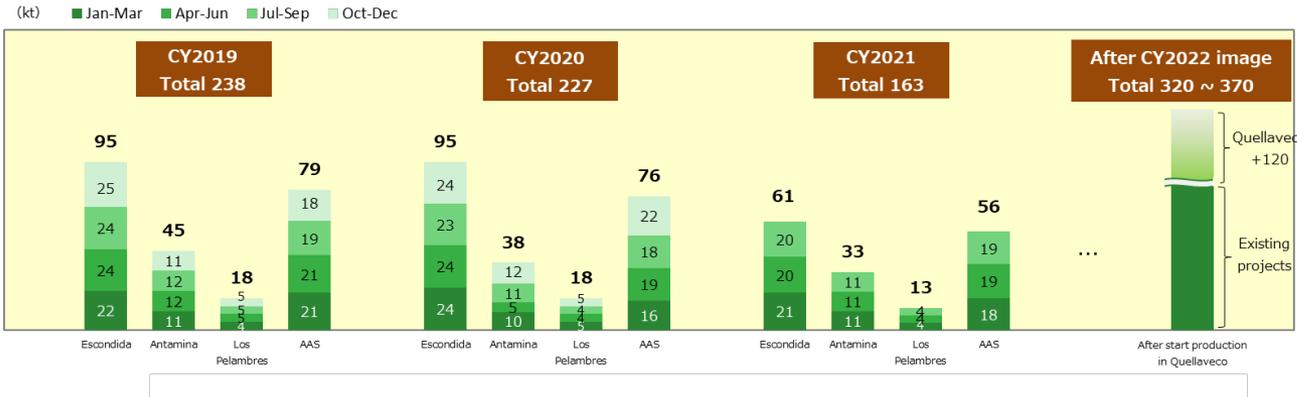

- The price of Chinese domestic coal remained high, due to restrictions on the supply of domestic coal and Mongolian coal. The CFR China price hiked, driven by the price of Chinese domestic coal.
- Demand / supply balance tightened in the seaborne trade, due to robust demand for metallurgical coal, reflecting the solid pricing of steel products in traditional markets (India, Southeast Asia, Japan, South Korea and Europe), and the supply restrictions in North America.
- The FOB Australia price also hiked, rising to above US\$400 in mid-September.

Note

Anglo American Sur (AAS)

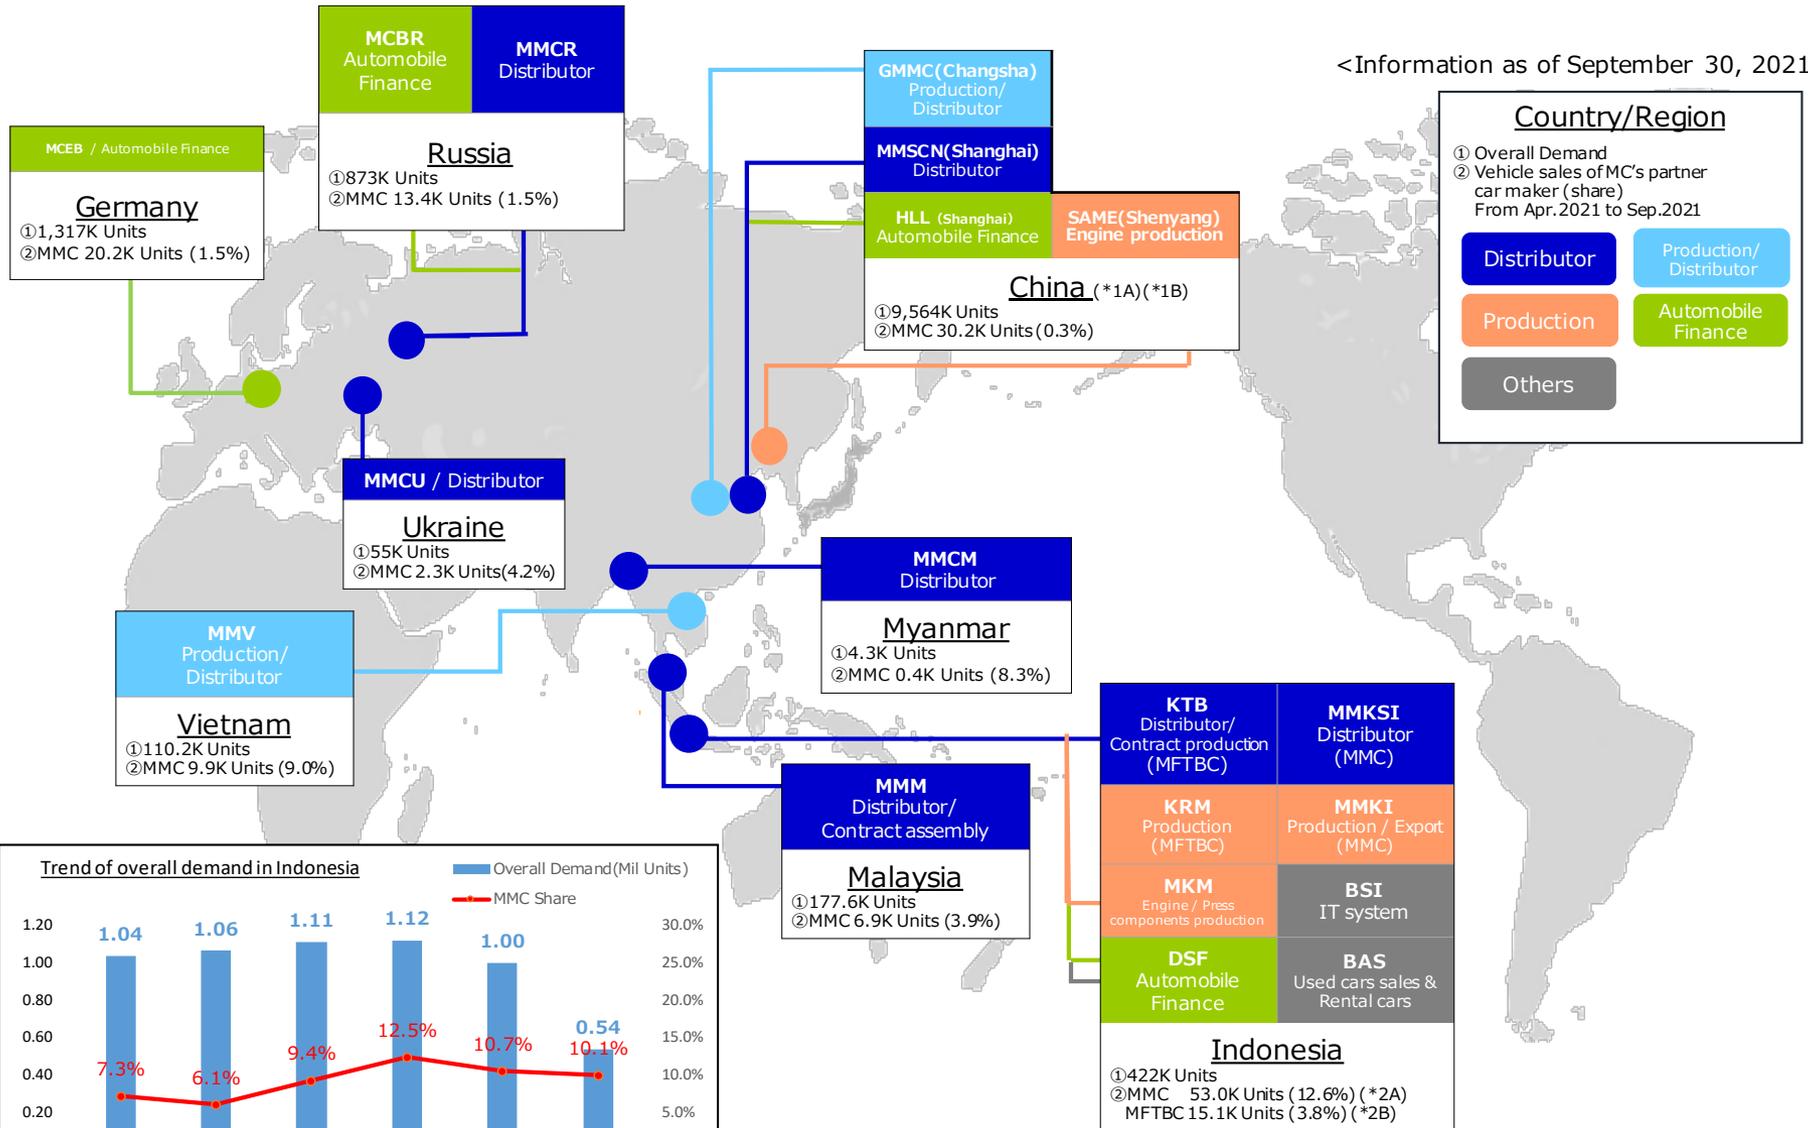

- Los Bronces production in Jul-Sep 2021 was flat on a year on year basis, as a result of increase in throughput which was offset by lower grades of ore processed and lower copper recovery.
- El Soldado production in Jul-Sep 2021 increased by 7% on a year on year basis, as a result of strong plant performance which exceeded the effect of lower ore grades.

Escondida Mine

- Escondida copper production in Jul-Sep 2021 decreased by 14% on a year on year basis to 244kt, mainly due to lower concentrate feed grade.
