Mitsubishi Corporation

Mitsubishi Corporation
FY2026 Q2 Earnings Presentation
Six months ended September 30, 2026

November 4, 2026

Forward-Looking Statements

- This release contains forward-looking statements regarding Mitsubishi Corporation's ("MC", the "Company" or "Parent") future plans, strategies, beliefs and performance that are not historical facts. Such statements are based on the Company's assumptions and beliefs as a result of competitive, financial and economic data currently available, and are subject to a number of risks, uncertainties and assumptions that, without limitation, relate to world economic conditions, exchange rates and commodity prices.
- Accordingly, Mitsubishi Corporation cautions readers that actual results may differ materially from those projected in this release and that Mitsubishi Corporation bears no responsibility for any negative impact arising from the use of this release.

Notes Regarding This Earnings Release

- "Consolidated net income" refers to "Profit (loss) for the year attributable to owners of the Parent" which excludes non-controlling interests.
- "Equity" refers to "Equity attributable to owners of the Parent" which excludes non-controlling interests.
- Mitsubishi Corporation's fiscal year ends March 31.

1 Corporate Strategy 2027 Update

- Executive Summary
- Profit Growth Outlook Through FY2027
- FY2026 Shareholder Returns
- FY2026 Q2 Summary Results
- Cash Flow Allocation & Leverage
- Summary Results by Segment
- Corporate Strategy 2027
  - Progress of “Enhance,” “Reshape,” and “Create”
  - Plans and Progress under “Enhance” and “Reshape”
  - Key “Enhance,” “Reshape,” and “Create” Initiatives in FY2026
  - Key Investment Projects Announced
  - Capital Recycling Track Record and Enhanced Portfolio Oversight
  - Shareholder Return Policy

1 Executive Summary

Mitsubishi Corporation

FY2026 Q2 Highlights

- FY2026 Q2 results remained solid, with underlying operating CF of **¥728.1 billion** (53% of the revised full-year forecast) and consolidated net income of **¥619.7 billion** (52%), supported by favorable market conditions and steady execution of capital recycling.
- We have raised the FY2026 full-year forecasts for underlying operating CF to **¥1,380 billion (+¥130 billion)** and consolidated net income to **¥1,200 billion (+¥100 billion)**, with **both expected to reach record highs**.

Corporate Strategy 2027 Update

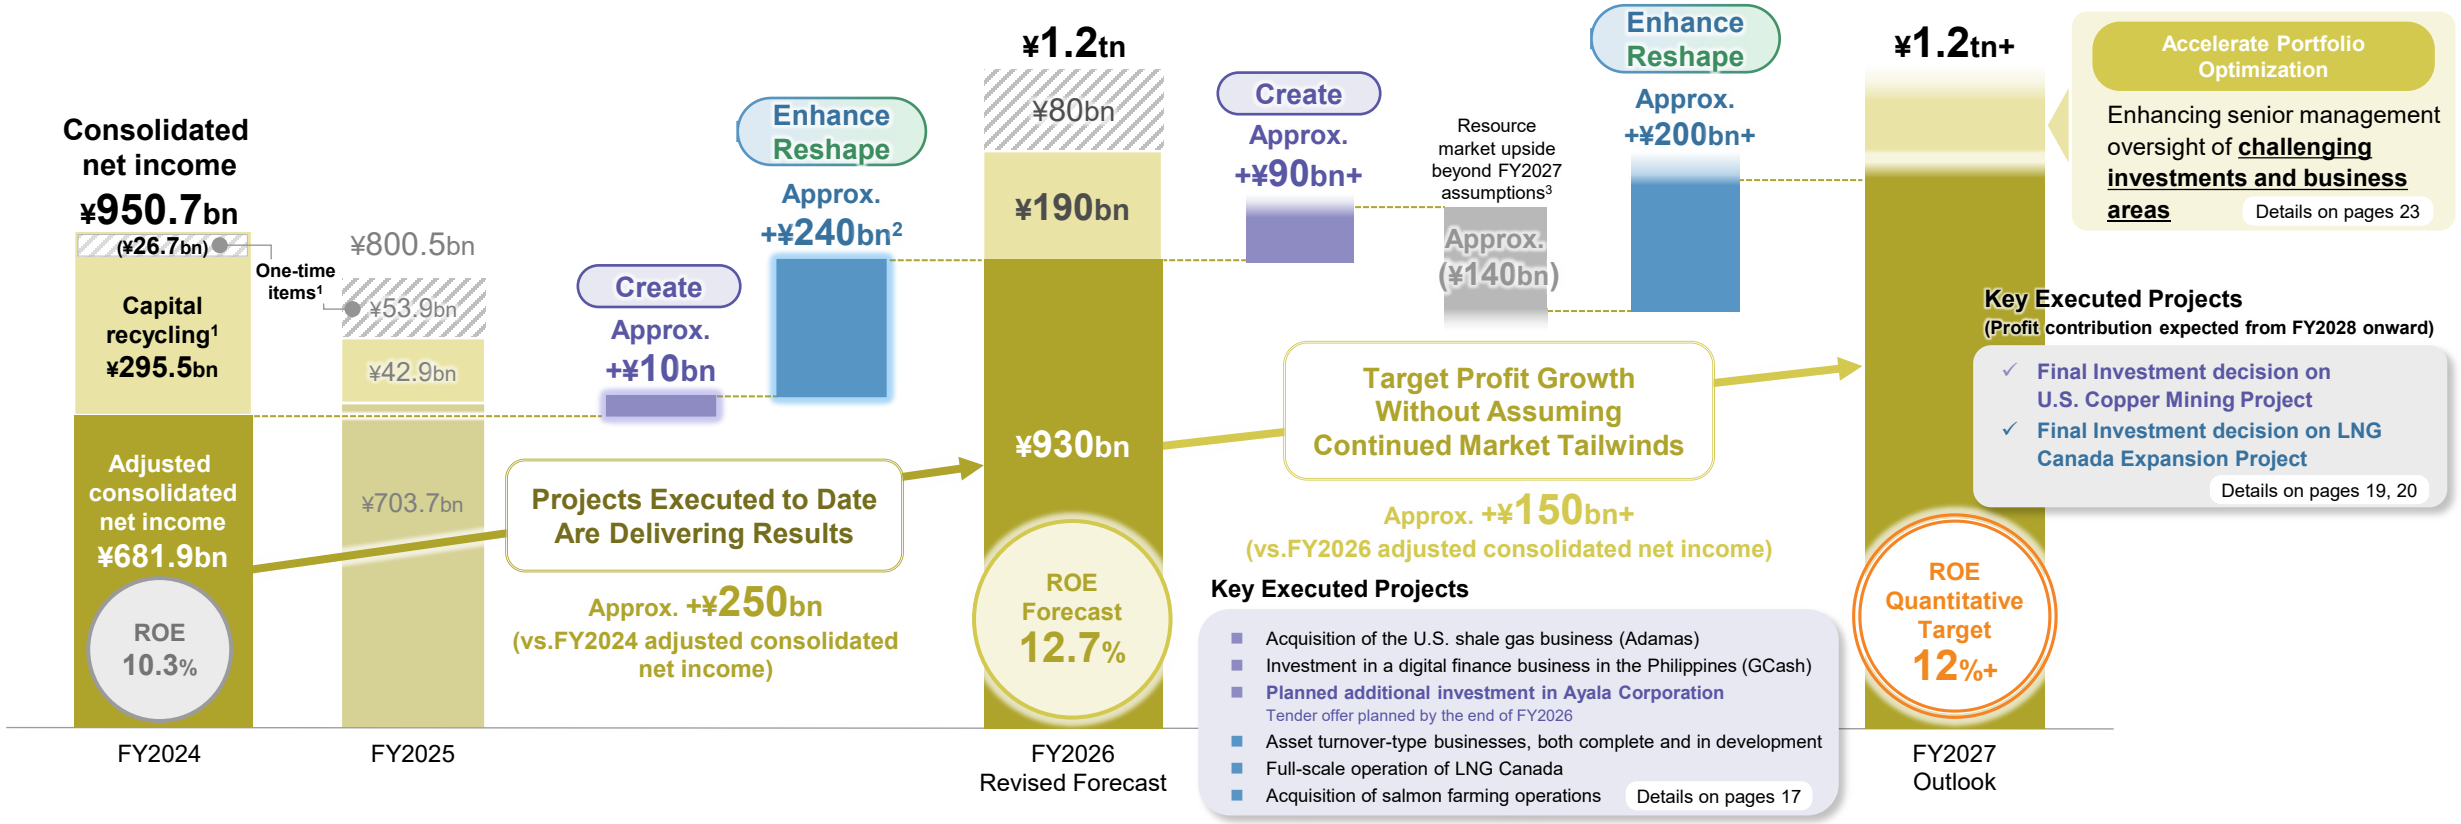

- We are making progress toward achieving the profit growth plan **without assuming continued resource market tailwinds**, with multiple projects now executed that are expected to **contribute to earnings from FY2028 onward**.
- We are **enhancing senior management oversight** of challenging investments and business areas **to accelerate portfolio optimization**.
- We have revised our cash flow allocation plan, **approving ¥1 trillion in share buybacks,** with future unallocated cash capacity to be directed primarily toward **growth investments**.

1 Profit Growth Outlook Through FY2027

Mitsubishi Corporation

- FY2026 profit growth is gaining momentum, supported by “Enhance,” “Reshape,” and “Create” initiatives through FY2025, as well as favorable resource market conditions.
- Looking ahead to FY2027, we will build on this momentum through these initiatives, without assuming continued market tailwinds.
- To accelerate portfolio optimization, we are broadening the scope of individual business reviews and conducting additional strategic reviews across business areas.

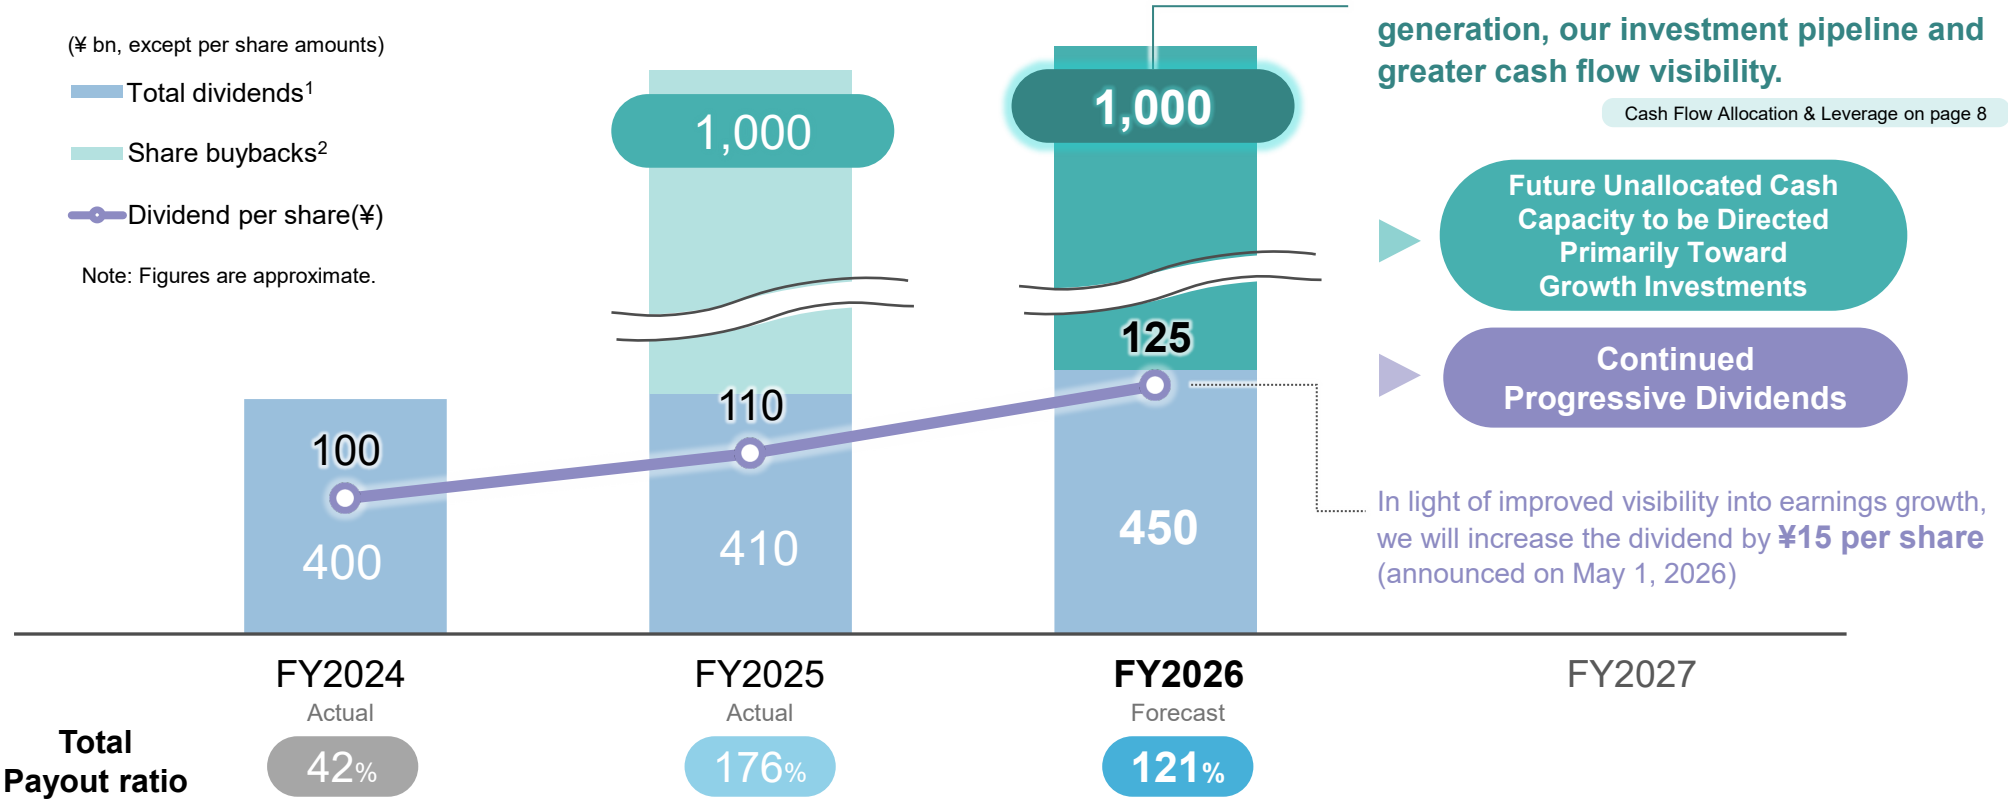

[1] Excluding asset turnover-type businesses such as certain real estate and power businesses. For further detail, please refer to Net Income Detail.
[2] Represents the difference (approx. ¥250 billion) between the FY2026 adjusted consolidated net income forecast of approx. ¥930 billion and the FY2024 adjusted consolidated net income result of approx. ¥680 billion, excluding the expected FY2026 profit contribution from “Create” initiatives of approx. ¥10 billion.
[3] Estimated based on sensitivities to changes in exchange rate and commodity price assumptions between the revised FY2026 forecast and FY2027 (excluding the impact of Henry Hub prices)

1 FY2026 Shareholder Returns

Mitsubishi Corporation

- Greater visibility into our cash flow outlook has enabled timely and disciplined capital allocation decisions, including ¥1 trillion in share buybacks.
- We continue to have ample investment capacity and intend to direct future unallocated cash capacity primarily toward growth investments.

We made a timely, disciplined capital allocation decision based on solid cash generation, our investment pipeline and greater cash flow visibility.

Cash Flow Allocation & Leverage on page 8

Future Unallocated Cash Capacity to be Directed Primarily Toward Growth Investments

Continued Progressive Dividends

In light of improved visibility into earnings growth, we will increase the dividend by **¥15 per share** (announced on May 1, 2026)

[1] Total dividend amounts represent the aggregate of interim and year-end dividends for each fiscal year (including forecasts) and differ from the amounts actually paid during the respective fiscal years.
[2] Share buyback amounts represent the maximum amounts authorized and announced for each fiscal year and differ from the amounts actually repurchased during the respective fiscal years.

1 FY2026 Q2 Summary Results

Mitsubishi Corporation

- Full-year forecasts have been revised upward, reflecting solid earnings progress supported by favorable market conditions and enhanced cash-generating capacity.
- We have approved ¥1 trillion in share buybacks following a rigorous review of our investment pipeline and greater cash flow visibility.
- We expect to achieve the Corporate Strategy 2027 ROE target of 12% or higher ahead of schedule through a combination of earnings growth and flexible capital management.

(¥ bn, except per share amounts)	FY2025 Q2	FY2026 Q2	Change[3]	Previous FY2026 Forecast[5]	Revised FY2026 Forecast	Progress
Underlying operating CF[1]	**446.3**	**728.1**	**+281.8**	**1,250.0**	**1,380.0**	***53%***
Consolidated net income[2]	**355.8**	**619.7**	**+263.9**	**1,100.0**	**1,200.0**	***52%***
Adjusted consolidated net income	314.8	539.1	+224.3	820.0	930.0	*58%*

Cash Flow Allocation & Leverage – Outlook

Mitsubishi Corporation

- We have revised our cash flow allocation plan, reflecting the upward revision to our FY2026 underlying operating CF forecast, further acceleration of portfolio optimization, solid investment progress, and additional shareholder returns.
- We plan to direct future unallocated cash capacity primarily toward growth investments, while maintaining investment discipline.

	CS 2027 FY2025 - FY2027 CF Allocation		Previous Plan (May 1, 2026)	Revised Plan	Details
Cash In	Underlying Operating CF		¥3.6 trillion+	¥3.7 trillion+	Reflects the upward revision to the FY2026 forecast.
	Divestitures		¥2.1 trillion+	¥2.6 trillion+	Includes the partial sale of our interest in the LNG Canada liquefaction infrastructure holding company, expected proceeds from accelerated capital recycling and other initiatives.
	Debt Financing		We will strategically use leverage while preserving financial soundness, capping our net D/E ratio at approximately 0.6x.		
Cash Out	Investments	Sustaining CAPEX	¥1.3 trillion+	¥1.3 trillion+	-
		New & Expansion Investments	Enhance Reshape ¥2.0 trillion+ Create ¥1.3 trillion+	Enhance Reshape ¥2.0 trillion+ Create ¥1.5 trillion+	“Create” investment plan revised upward, reflecting solid progress and the investment pipeline.
	Shareholder Returns	Share Buybacks	¥1.0 trillion+	¥2.0 trillion+	Includes ¥1 trillion in share buybacks announced after considering the investment pipeline and future cash flow visibility.
		Dividends	¥1.5 trillion+	¥1.5 trillion+

1 Cash Flow Allocation & Leverage

Mitsubishi Corporation

- We generated solid underlying operating CF and realized proceeds from several divestitures, including the sale of our shares in Toyo Tire.
- Cash flow allocation remained broadly in line with the revised plan.

	CS 2027 FY2025 - FY2027 CF Allocation (Released Nov 4, 2026)	FY2025 Q4	FY2026 Q2	Details
Cash In	**Underlying Operating CF** ¥3.7 trillion+	**¥1.0 trillion /** ¥1,048.1 billion	**¥0.7 trillion /** ¥728.1 billion	• Solid progress across our businesses. • FY2026 full-year outlook: ¥1.38 trillion.
Cash In	**Divestitures**[1] ¥2.6 trillion+	**¥0.5 trillion /** ¥496.0 billion	**¥0.5 trillion /** ¥519.3 billion	**FY2026 Key Projects** • Sale of Toyo Tire shares. • Redemption of preferred shares in Chiyoda Corporation. • Sale of Ryohin Keikaku shares. • Collection of deferred payment related to the divestiture of two Australian steelmaking coal mines.
Cash In	**Debt Financing**	We will strategically use leverage while preserving financial soundness, capping our net D/E ratio at approximately 0.6x during CS 2027.		
Cash Out	**Investments**[1] ¥4.8 trillion+	**¥1.2 trillion /** ¥1,162.0 billion	**¥1.1 trillion /** ¥1,148.3 billion	**Investment Progress** (FY2025 / FY2026 / Plan) Sustaining CAPEX: 0.3 / 0.3 / ¥1.3 trillion+ — Eneco, U.S. shale gas business; Australian steelmaking coal business Enhance Reshape: 0.6 / 0.1 / ¥2.0 trillion+ — - Create: 0.2 / 0.8 / ¥1.5 trillion+ — U.S. shale gas business
Cash Out	**Shareholder Returns** ¥3.5 trillion+	**¥1.5 trillion /** ¥1,466.2 billion	**FY2026 forecast** (as announced) **¥1.5 trillion**	• Includes ¥1 trillion[2] in share buybacks and cash dividends paid to non-controlling interests. • Forecast dividend: **¥125 per share**.

Leverage as at September 30, 2026

Note: In calculating the net D/E ratio, 50% of the hybrid financing balance is deducted from net interest-bearing debt (numerator) and added to equity attributable to owners of the parent (denominator).

[1] Cash flow from investing activities + equity transactions with non-controlling interests − surplus fund management (changes in time deposits or acquisitions / disposals of short-term investments) − adjustments of cash balance associated with business acquisitions / disposals

[2] Share buyback amounts represent the maximum amounts authorized and announced for each fiscal year and differ from the amounts actually repurchased during the respective fiscal years.

1 Update for ongoing developments in the Middle East

Mitsubishi Corporation

- As the situation remains fluid, we have maintained our assumption that current conditions will persist through fiscal year-end.
- The revised full-year forecasts incorporate the latest developments in each segment, with the contingency buffers previously included in the “Other” segment released accordingly.
- While higher costs and accelerating inflation are expected to weigh on earnings, favorable market momentum is expected to provide an offset, keeping the overall impact within our initial assumptions of (¥30 billion) in consolidated net income and (¥23 billion) in underlying operating CF.

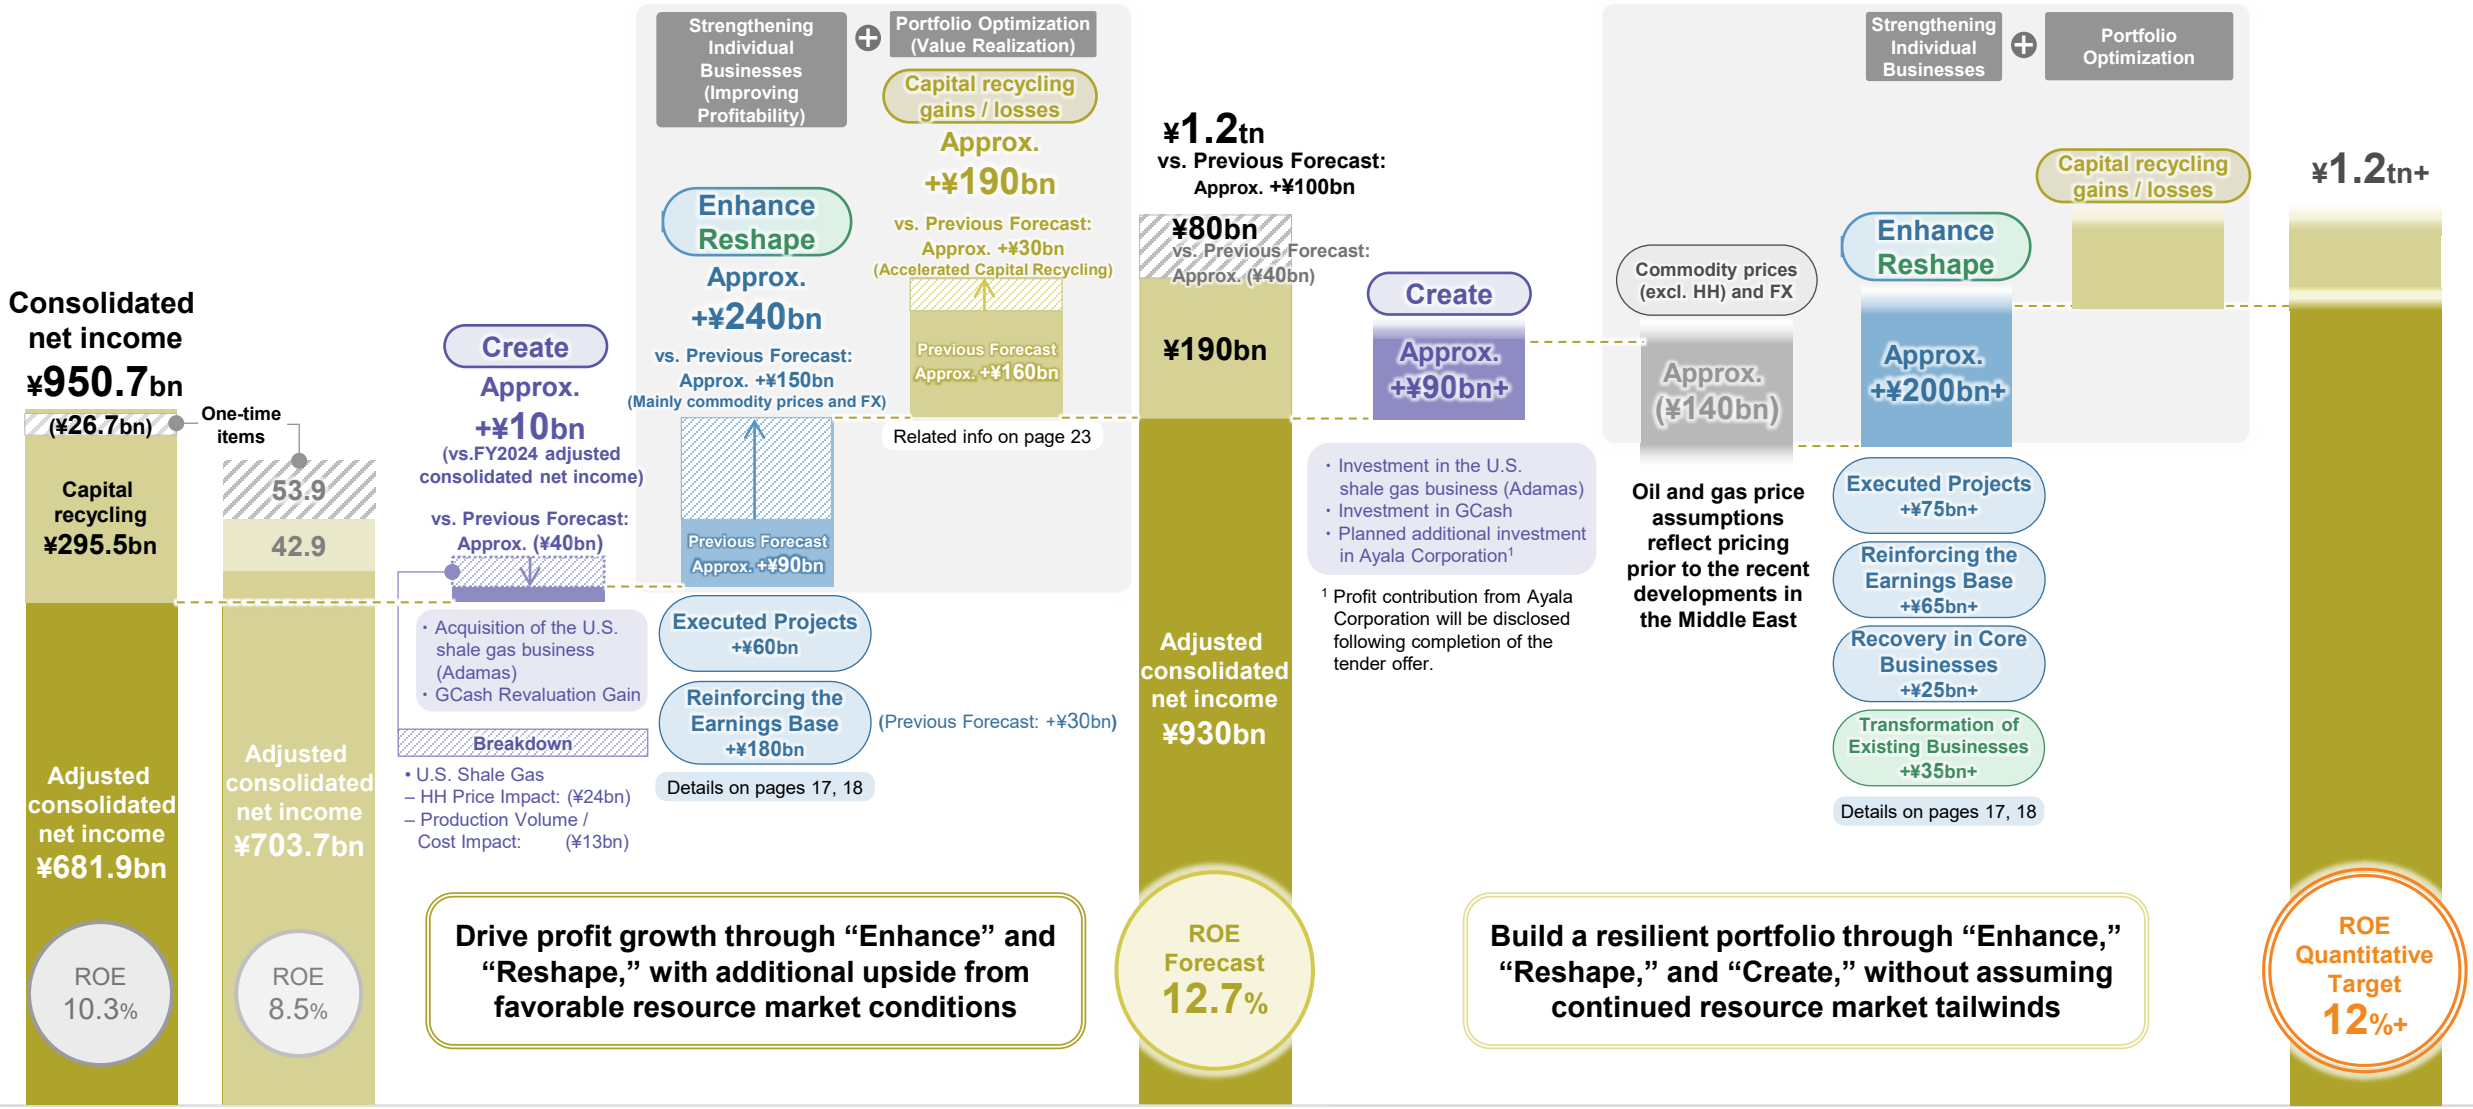

Major impacts by segment (excludes potential upside of higher oil prices)[1] **Blue: Not included in Q1**	**Realized in FY2026 Q2**	**Expected to be realized in FY2026 Q3 onward**
Energy & Power Solution	[+] **Increase in profit in the LPG business due to higher market prices.** [+] **Improved transaction profitability in the petroleum business.**	[−] **Decline in profitability in the LPG business due to lower market prices.**
Materials Solution	[+] Increase in profit driven by higher market prices in the basic chemicals business. [+] Increase in profit driven by higher market prices in the trading business. [−] Decrease in net income due to lower shipment volumes at SPDC.	[+] Increase in profit driven by high market prices in the basic chemicals business. [−] Opportunity losses and decline in profitability in the trading business due to lower shipment volumes and higher charter rates. [−] Decrease in net income due to lower shipment volumes at SPDC.
Mineral Resources	[−] Decline in profitability in the Australian steelmaking coal business due to higher fuel costs. Plans and Progress under “Enhance” and “Reshape”

Mitsubishi Corporation

- While recovery in some businesses will require an improvement in the external environment, particularly market conditions, we continue to strengthen the earnings base across all businesses.

Category		Examples of Key Initiatives	FY2027 Progress and Outlook	Forecasted Growth in Adjusted Consolidated Net Income (vs. FY2024)
Executed Projects	Resource Businesses	▫ Profit contribution from the start-up and stable operations of LNG Canada. ▫ Profit contribution from the re-entry into the Malaysia LNG Tiga project.	■ LNG Canada has begun contributing to profit growth in FY2026, with full contribution anticipated in FY2027. ■ The Malaysia Tiga project is contributing to profits.	
	Non-Resource Businesses	▫ Profit generation from executed and in-development asset turnover-type businesses. ▫ Profit contribution from the acquisition of salmon farming operations. ▫ Industry consolidation through M&A and capital actions ahead of changes in the business environment.	■ The North American real estate business continues to recover, resulting in improved earnings. ■ The salmon farming business continues to face weak market conditions, while integration of the acquired operations is progressing steadily, with **synergies expected to be realized broadly in line with plan**. ■ The full consolidation of Mitsubishi Shokuhin and the capital restructuring of the Indonesian automotive business have been completed, with full-scale profit contribution expected in FY2026. ■ Efforts continue to further enhance earnings from executed projects, while multiple potential projects remain under consideration.	
Recovery in Core Businesses	Salmon Farming[1,2]	▫ Increased production enabled by the acquisition of additional licenses in Norway during MCS 2024. ▫ Productivity improvement across all regions. ▫ Expansion of value-added processing to enhance profitability and strengthen resilience to market conditions.	■ **Production continues to grow in line with plan**, supported by disease control measures across all regions and increased production from licenses previously acquired in Norway. ■ FY2026 earnings are expected to fall below initial expectations due to weak market conditions and higher feed costs, including the impact of El Niño. **Earnings are expected to recover toward FY2027, supported by further productivity improvements and a recovery in market conditions**. ■ Processing capacity is also being expanded through capacity additions and automation at the facility in Chile, as well as the development of a new value-added processing facility in the U.S.	
	ASEAN (Thailand / Indonesia) Automotive[2]	▫ Launch products that meet market needs through market-driven product planning. ▫ Enhance customer experience and operational efficiency through the use of AI and digital technologies. ▫ Expand export sales to new markets.	■ Launch of a new mid-size SUV and a hybrid model of a compact SUV in Indonesia. ■ Despite challenging market conditions amid ongoing developments in the Middle East, aim to restore performance by FY2027 by using AI to integrate and analyze customer data and deliver products and services tailored to individual customer needs. ■ Launch a pickup truck in Mexico.	Note: Figures are approximate.

[1] Excludes profit contribution from the acquisition of salmon farming operations.
[2] Business activities and expected profit growth of investees (unlisted companies) disclosed as major affiliates and related companies.

1 Plans and Progress under “Enhance” and “Reshape” (cont’d)

Mitsubishi Corporation

Reinforcing the Earnings Base

(Select businesses expected to deliver strong profit growth)

Category	Examples of Key Initiatives	FY2027 Progress and Outlook	Forecasted Growth in Adjusted Consolidated Net Income (vs. FY2024)
Americas and European Power[1]	▫ Enhancing the value of power generation assets by capturing growing electricity demand in the Americas. ▫ Improving supply–demand balance in Europe through battery storage and AI and DX utilization.	▪ Progress is being made toward early implementation in the Americas. ▪ In Europe, accelerated battery storage development and AI-enabled power supply–demand forecasting are underway. These initiatives are showing tangible results, **including contributions to profit growth in FY2025**. **Trading continues to perform well in FY2026** by capturing market fluctuations.	
Retail and Food Distribution & Logistics[1]	▫ Improving Lawson’s average daily sales through AI-driven demand forecasting, as well as strengthened promotional collaboration with KDDI. ▫ Enhancing Mitsubishi Shokuhin’s product development and sales promotion capabilities through effective use of data.	▪ At Lawson, AI-driven product optimization and “Ponta Pass” initiatives contributed to **record-high H1 profit for the fourth consecutive year in FY2026**. ▪ **Mitsubishi Shokuhin achieved a record-high profit in FY2026 H1, supported by its “Enhance” initiatives** and one-time gains. Efforts are also underway to strengthen collaboration with retailers and manufacturers through data-driven in-store proposals and supply chain optimization.	
Farm, Dairy & Meat Products[1]	▫ Strengthening earnings power through productivity gains, cost reductions, and value-add enhancements in Japan. ▫ Capturing growing overseas demand by strengthening manufacturing operations and value-add processing overseas.	▪ **The domestic business continues to make steady progress**, supported by favorable chicken market conditions and ongoing productivity improvements. ▪ In the U.S., consumption has temporarily slowed due to factors such as inflation. Efforts will **continue to expand earnings overseas** through operational improvements to enhance cost competitiveness and growth investments to strengthen businesses.	
Food & Wellness[1]	▫ Increasing production and sales in the food ingredients business through capacity-expansion investments made in prior years. ▫ Expansion of food and health ingredient sales and growing the blended seasonings business overseas.	▪ **Key plants in the food ingredients business have begun operations following capacity expansion**, while sales continue to grow. Higher fuel costs and other impacts from developments in the Middle East are expected. ▪ In FY2026 Q2, **a major affiliate fully consolidated an Indonesian sweetener manufacturer** and is working to further strengthen the business. ▪ Looking toward FY2027, efforts will continue to expand earnings through growth investments, including M&A, in higher value-added business areas and the strengthening of core businesses.	
Industrial Machinery[1]	▫ Profit improvement in the construction machinery rental business through cost reductions and enhanced asset efficiency by leveraging DX measures. ▫ Expansion of project earnings in the plant and infrastructure-related import and export business, including spare parts.	▪ In FY2025, steady progress was achieved through improved operating efficiency and enhanced customer value, supported by initiatives such as online rentals. Looking toward FY2027, **efforts are underway to optimize the product portfolio through data visualization**. ▪ In the plant and infrastructure-related import and export business, **profits are expected to decline temporarily through FY2026 due to gaps between projects, but a return to profit growth is anticipated in FY2027**.	
Resource Businesses	▫ Stabilization of operations and recovery of production volumes in the steelmaking coal business. ▫ Continued productivity improvements and enhanced cost competitiveness.	▪ To restore production to 43–45 million tons in FY2028–FY2029, **stripping and the build-up of raw coal inventory are progressing in line with plan**. ▪ In addition, continued productivity improvements, enhanced cost competitiveness, and favorable resource market conditions are anticipated.	

[1] Business activities and expected profit growth of investees (unlisted companies) disclosed as major affiliates and related companies.

1 Key “Enhance,” “Reshape,” and “Create” Initiatives in FY2026

Mitsubishi Corporation

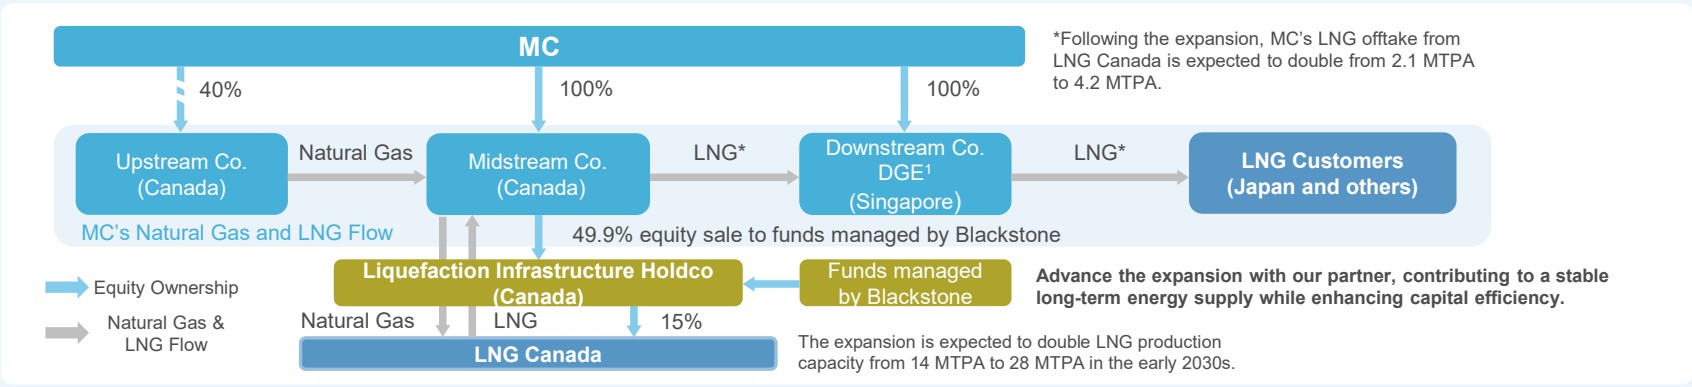

- At LNG Canada, we made the final investment decision to proceed with the expansion project and introduced a financial investor as a partner in the liquefaction infrastructure holding company.
- In doing so, we aim to maximize value through LNG marketing and sales and enhance capital efficiency, supporting sustainable growth.

Enhance Reshape

Final Investment Decision on LNG Canada Expansion Project and Introduction of a Partner to Liquefaction Infrastructure Holding Company

- On September 29, 2026, MC announced it had reached a final investment decision on the expansion of LNG Canada’s liquefaction infrastructure, in which it holds a 15% equity interest.
- The total cost of the expansion project is expected to be approximately ¥500 billion on an equity basis, with production scheduled to commence in the early 2030s. MC plans to offtake 2.1 MTPA of LNG, equivalent to its 15% equity share, and sell it primarily in Japan through DGE[1]. Once fully ramped up, the expansion is expected to further strengthen MC’s earnings base.
- LNG Canada is well positioned to provide a stable, long-term energy supply, given its proximity to key LNG demand centers in Asia and shipping routes that avoid major maritime chokepoints. The use of existing pipeline and other infrastructure also provides cost and schedule advantages.
- On November 2, MC announced the sale of a 49.9% interest in the liquefaction infrastructure holding company for approximately ¥250 billion to funds managed by Blackstone. MC will retain its governance role in LNG Canada and maintain its LNG volumes across the value chain, from upstream gas through sales, while leveraging the funds’ capital to advance the expansion, further enhance the value of the business and improve capital efficiency.
- Under Corporate Strategy 2027, MC will continue to pursue sustainable growth and greater efficiency, while developing new approaches to value creation by combining its capabilities with the expertise and capital of financial investors.

Project Overview

1 Key “Enhance,” “Reshape,” and “Create” Initiatives in FY2026

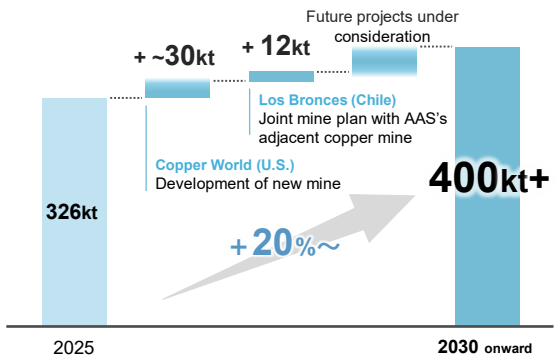

Mitsubishi Corporation

- Under “Create,” we will advance key growth initiatives, including the final investment decision for the U.S. copper mining project and the planned additional investment in a major conglomerate in the Philippines.

Create Final Investment Decision on Copper World (U.S.)

- In August 2025, MC agreed with Hudbay to acquire a 30% interest in Copper World and completed the acquisition in January 2026. Following completion of the definitive feasibility study, a final investment decision was made on October 20, 2026.
- Located in Arizona, U.S., the project is expected to commence production in late 2029, with average annual copper production of approximately 100kt. Its significant mineral resources and access to infrastructure, and competitive development and operating costs position Copper World as a promising new source of U.S. copper supply, where long-term demand growth is expected.
- Copper World is strategically important to MC’s goal of increasing annual equity copper production to more than 400kt from FY2030 onward. Phase 1 is expected to have a mine life of 15 years, with the potential for an approximately 25-year extension, subject to federal permitting.

MC’s Equity Copper Production: Historical Trend and Target

Pursue growth by strengthening and expanding existing copper assets, while acquiring high-quality assets.

Key Metrics

Production Volume	Approx. 100kt / year
Production Start	Late 2029
Mine life	Phase 1: 15 years (Phase 2: additional 25 years)
Capex	US$2.07bn
Opex	¢170/lb

Create Planned Additional Investment in Ayala Corporation (Philippines)*

- On September 21, 2026, MC announced plans to increase its stake in Ayala Corporation (AC) from 4.7% to 15% (20% on a voting rights basis), for total expected consideration of approximately ¥120 billion. Closing is expected within FY2026 following completion of AC’s tender offer.
- Founded in 1834, AC is one of the Philippines’ largest and most respected conglomerates, with a diversified portfolio spanning real estate, financial services, telecommunications, energy, infrastructure, healthcare, and other sectors. Over its long history, AC has played a significant role in the country’s economic growth and infrastructure development.
- Through a strengthened strategic alliance with AC, MC will deepen collaboration across a broad range of C2B businesses, including financial services, telecommunications, and retail, to enhance consumers’ daily lives in the Philippines, while expanding collaboration in AC’s core businesses, including real estate and energy.

*Subject to completion of the tender offer

Ayala Corporation Group Overview

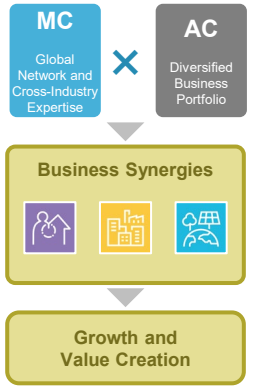

FY2025 Results
PHP 1 = ¥2.6 (CY2025 average)

Revenue	Net Income
PHP 337.0bn (approx. ¥880.0bn)	PHP 61.0bn (approx. ¥160.0bn)

Key Businesses

Real Estate AyalaLand	• One of the Philippines’ largest real estate developers, with operations nationwide and a strong presence in large-scale urban development.
Energy ACEN	• Develops renewable energy projects in the Philippines and overseas, with operations across markets including Vietnam, Australia and India.
Financial Services BPI	• One of the Philippines’ largest commercial banks. • Strong retail banking franchise serving affluent customers.
Telecom Globe	• One of the Philippines’ largest telecommunications companies. • Owns Mynt, the operator of GCash, the Philippines’ number one finance super app.

1 Capital Recycling Track Record and Enhanced Portfolio Oversight

- Under Corporate Strategy 2027, we are continuously assessing all businesses, including from a best-owner perspective, to determine the need for portfolio optimization.
- In FY2026, we have further enhanced our review process. Senior management conducts (1) targeted reviews of all businesses with identified financial performance issues to determine appropriate improvement measures and whether further strategic action is required; and (2) strategic reviews of selected business areas.

Capital Recycling Track Record

FY2026: Enhanced Business Reviews for Portfolio Optimization

1 Enhanced Oversight of Individual Businesses

Regular Review

- Scope: Businesses with a significant impact on overall performance
- Focus: Progress against business plans and further growth potential

Targeted Review

- Scope: Businesses with identified quantitative performance issues (e.g., below required returns, loss-making, or requiring downward revisions to business plans)
- Focus: Effectiveness of recovery measures and whether the business should remain in the portfolio

Expanded Scope of Senior Management Oversight in FY2026

Businesses Requiring Priority Review

- Of which, 25 businesses below required returns
  - Invested Capital: Approx. ¥0.3tn
  - Earnings Shortfall[2]: Approx. ¥36bn
- Businesses identified for Divestment[3] Approx. 40 (¥0.4tn)
- Businesses under Regular Review Approx. 120 (¥5.5tn)
- Of which, businesses requiring downward revisions to business plans
- Underperforming / Loss-Making Businesses Approx. 80 (¥4.2tn)
  - Earnings Shortfall[2]: ¥0.3tn

Businesses under Senior Management Oversight Approx. 240
(Invested Capital: Approx. ¥10tn)

*Figures are as of FY2025 year-end

2 Additional Strategic Reviews by Business Area

From an overall portfolio management perspective, senior management conducts reviews of key businesses across selected areas, including those subject to regular review, assessing the business environment, MC's ability to add value, and financial performance, and reassess strategies and ownership approaches to maximize business value and cash returns.

[1] Excludes asset turnover-type businesses such as certain real estate and power businesses.
[2] Represents the difference between actual returns generated by investees and the required earnings, calculated by applying MC's required rate of return.
[3] Businesses identified for divestment as of FY2025 year-end, regardless of whether the divestment is planned during the Corporate Strategy 2027 period.

1 Corporate Strategy 2027 Shareholder Return Policy

Mitsubishi Corporation

CS 2027: Maintain progressive dividends and flexible share buybacks.

- **Dividends:** We will continue to implement progressive dividends based on the dividend per share. Any further dividend increases will be determined after assessing earnings performance and improvements in underlying operating CF. In FY2025, we increased the dividend per share from ¥100 to ¥110, and in FY2026, we will further increase it to ¥125.
- **Share buybacks:** We have announced ¥1 trillion in share buybacks with future unallocated cash capacity to be directed primarily toward growth investments.
- **Total payout ratio:** While we have not set a specific target, the total payout ratio over the CS 2027 period is expected to significantly exceed 40%.

[1] Total dividend amounts represent the aggregate of interim and year-end dividends for each fiscal year (including forecasts) and differ from the amounts actually paid during the respective fiscal years.
[2] Share buyback amounts represent the maximum amounts authorized and announced for each fiscal year and differ from the amounts actually repurchased during the respective fiscal years.
[3] Dividend per share has been retroactively adjusted in line with the January 1, 2024 stock split (three-for-one; pre-split dividend x 1/3; rounded to the nearest whole number).

Consolidated net income detail for six months ended Sep 30, 2026

Comments (YoY change)

[+] Increase in transactions due to the start-up of North American LNG / Equity LNG marketing business. Increase in dividend income from the Asia-Pacific LNG business.

Assumptions[1]

Crude Oil (Brent)	
Prices	US$87/BBL
Sensitivities	¥2.4 billion
Natural Gas (Henry Hub)	
Prices	US$3.1/MMBtu
Sensitivities	¥3.4 billion

Comments (Progress)

[+] North American LNG / Equity LNG marketing business benefited from a concentration of spot sales in H1. Dividend income from Asia-Pacific LNG business is weighted towards H1.

[−] Restructuring of the U.S. shale gas business is expected in H2.

Note: For further detail, please refer to Cash Flow Items by Segment, Income Statement Items by Segment, Net Income Detail One-Time Items, Net Income Detail Capital Recycling Gains / Losses.

[1] Forecast uses average prices over the period. Sensitivity (crude oil: US$1/BBL, natural gas: US¢10/MMBtu) refers to the estimated impact on full-year net income forecast.

Segment Detail
Materials Solution: Business Overview

Mitsubishi Corporation

Essential Materials

Building supply chains around upstream essential materials

Main Products

- Silica sand
- Cement, ready-mix concrete
- Salt
- Ethanol
- Carbon materials (needle coke, etc.)

Major Subsidiaries & Affiliates

Cape Flattery	Australia: Mining and sale of silica sand
MCC / MCCD	U.S.: Production and sale of cement and ready-mixed concrete
POSCO MC Materials	South Korea: Production and sale of needle coke

Steel Products

Optimizing steel distribution through Metal One's global network of over 100 locations and investments

Main Products

- Steel products

Major Subsidiaries & Affiliates

Metal One	Distribution, processing, and Sale of steel products
Major affiliates	Automotive businesses (Japan, U.S., Mexico, Thailand, etc.)
	Construction machinery businesses (India, Brazil, etc.)
	Energy businesses (Canada and Italy)
	Construction businesses (Japan)

Performance Materials

Developing specialized performance materials for each industry / region

Main Products

- Full range of performance and resin materials

Major Subsidiaries & Affiliates

TOYOBO MC	Japan: Production and sale of various functional materials
Riken Americas	U.S.: Production and sale of resin compounds
Amfine	U.S.: Production and sale of resin additives
North American plastic building materials business	U.S.: Production and sale of plastic building materials

Basic Materials

Establishing an industry presence based on chemicals trading

Main Products

- Petrochemicals (petroleum-based raw materials such as plastics and polyester)
- Basic chemicals (primary raw materials for natural-gas based products and materials)

Major Subsidiaries & Affiliates

Diamond Petrochemicals	Canada: Production of synthetic rubber raw materials
SPDC (SHARQ)	Saudi Arabia: Petrochemicals

Mineral Resources: Steelmaking Coal Operation

Mitsubishi Corporation

BMA Annual Production and Sales Volume[1] (50% Equity Basis)

[1] Quarterly figures may not necessarily add up to total annual figures due to rounding.
[2] Annual production and sales including contribution from the Blackwater and Daunia mines, divested on April 2, 2024.
[3] The above exchange rates differ from the effective rates applied to MDP's transactions.

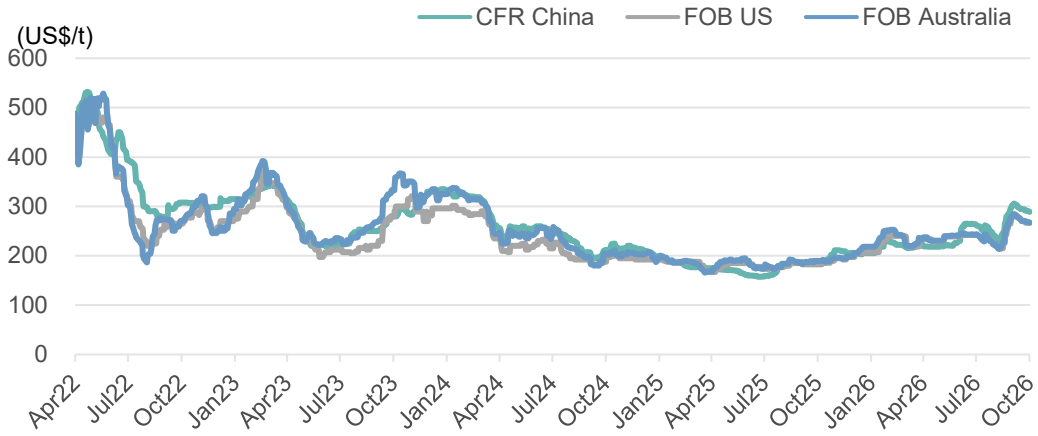

- BMA production from July to September 2026 increased by 1% year-on-year to 4.9 Mt.
- Production increased reflecting strong operational performance. BMA continues to focus on building raw coal inventory levels and undertaking pre-stripping to support medium-term operational stability.
- Operations at all mines were suspended following the fatality of a team member, with mining suspended for one week at Peak Downs and 24 hours across other operations. Investigations are ongoing.
- A longwall move at Broadmeadow is scheduled for the latter half of Q3 FY26.

Price Trends of Seaborne Steelmaking Coal

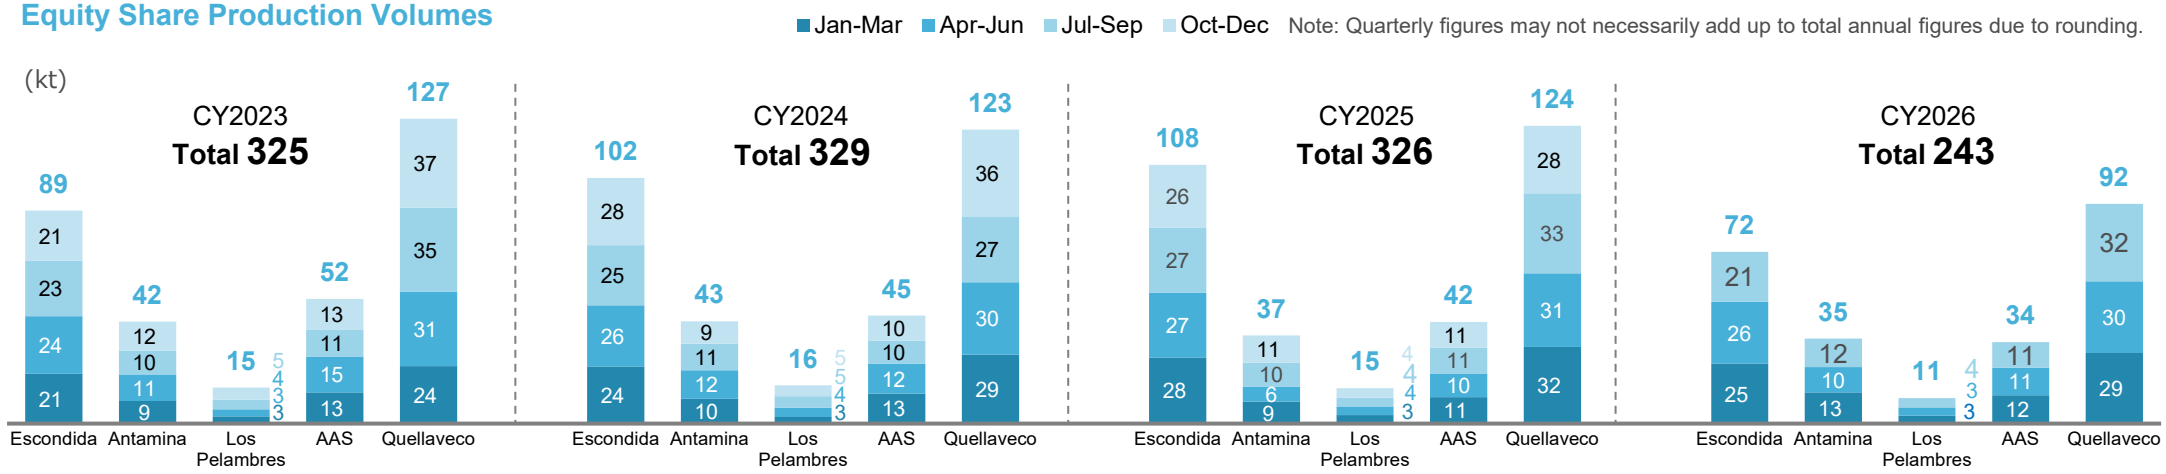

- During July-September 2026, premium hard coking coal (FOB Australia) prices averaged US$248/t, up from the previous quarter, supported by supply constraints in China.
- After softening from July amid seasonally weaker demand in China and India, prices rebounded sharply as concerns over Chinese domestic coal and Mongolian coal imports to China intensified, briefly exceeding US$280/t in early September. Prices subsequently declined as Chinese buyers slowed their purchase from the seaborne market, trading in the mid-US$260s/t toward late October.
- In India, steelmaking coal demand continues to grow, supported by the start of new blast furnaces. However, with Chinese steel exports remaining at elevated levels, a fundamental recovery in the steelmaking coal market is likely to take time.

Mineral Resources: Copper Business

Mitsubishi Corporation

Equity Share Production Volumes

LME Copper Price (Monthly Average)

Summary*

Anglo American Sur (AAS)

- Los Bronces copper production increased by 2% to 43kt in July to September 2026 on a year-over-year basis, with the benefit of the restart of the second plant and higher recovery, partially offset by lower throughput and mining rates following record snowfall.
- El Soldado copper production decreased by 12% to 10kt in July to September 2026 on a year-over-year basis, reflecting lower throughput and the planned lower ore grade.

Quellaveco (AAQ)

- Quellaveco copper production decreased by 3% to 81kt in July to September 2026 on a year-over-year basis, primarily due to the anticipated lower ore grades despite higher recovery.

Escondida

- Escondida copper production decreased by 23% to 253kt in July to September 2026 on a year-over-year basis, mainly due to planned lower feed grades and scheduled maintenance, with additional impacts from the temporary suspension of mining activities following a fatal incident in September and severe weather in July and August, which constrained operational logistics and truck fleet utilization.

* Production volumes are stated on a 100% basis for each project.

Food Industry: Global Portfolio - Salmon Farming Business

European Market / Fish Pool Index

- European market prices gradually recovered through August. From September, increased supply from Norway due to favorable growing conditions put downward pressure on prices. However, tight supply of larger fish supported prices, which ended September at NOK 68.8/kg.
- U.S. salmon fillet prices rose from July, supported by limited raw material supply in key producing regions. The market remained firm thereafter, with prices ending September at USD 6.9/lb.

Net D/E ratio[3]	0.38	0.42	0.04
Equity per share / BPS (¥)[1]	2,578	2,674	96
Interest-bearing debt (¥ bn)	**as at Mar 31**	**as at Sep 30**	
Interest-bearing debt (Gross: excluding lease liabilities)	5,746.9	6,042.6 **	295.7
Interest-bearing debt (Net: excluding lease liabilities)	3,888.2	4,431.8	543.6
Reference: Lease liabilities	760.9	805.6 **	44.7
Cash flow (¥ bn)	**Six months ended Sep 30**	**Six months ended Sep 30**	
Dividends from equity method affiliates	181.8	222.9	41.1
Foreign exchange rates (period end)	**as at Mar 31**	**as at Sep 30**	
JPY / USD	159.88	157.35	(2.53)
JPY / AUD	109.68	109.96	0.28
JPY / EUR	183.41	178.34	(5.07)
Foreign exchange rates (average)	**Six months ended Sep 30**	**Six months ended Sep 30**	
JPY / USD	146.02	159.49	13.47
JPY / AUD	94.52	112.81	18.29
JPY / EUR	168.06	184.35	16.29

[1] Consolidated net income and equity are based on amounts attributable to owners of the parent.
[2] Ratings agencies equate 50% of the hybrid financing balance with equity.
[3] In calculating the Net D/E ratio, 50% of the hybrid financing balance is deducted from net interest-bearing debt (numerator) and added to equity attributable to owners of the parent (denominator).
* ROE is calculated based on certain assumptions regarding the amounts expected to be repurchased during each fiscal year.
** Gross interest-bearing debt and lease liabilities for our automobile sales financing and construction equipment rental businesses are ¥491.6 billion and ¥42.1 billion respectively.

3 Assumptions and Sensitivities

Mitsubishi Corporation

		FY2026 Forecast[1] (announced May 1, 2026)	Revised Forecast[1] (as of Nov 4, 2026)	Change	Six months ended Sep 30, 2026	FY2026 Consolidated Net Income Sensitivities[8] (announced May 1, 2026)
Foreign Exchange	(JPY / USD)	150.00	157.25 (H2:155.00)	7.25	159.49	¥5.0 billion (JPY / USD)[2]
Crude Oil[3]	Brent (USD / BBL)	78 (Apr to Dec: 81)	87 (H2:95)	9	79	¥2.4 billion (USD / BBL)[4]
Natural Gas	Henry Hub (USD / MMBtu)	3.90	3.10 (H2:3.29)	(0.80)	2.91	¥3.4 billion (US¢10 / MMBtu)[5]
Copper	LME (USD / MT) [US¢ / lb]	11,883 [539]	13,693 [621] (H2:[620])	1,810 [82]	13,729 [623]	¥2.6 billion (USD100 / MT)[6] [¥5.6 billion (US¢10 / lb)]
Steelmaking Coal	FOB Australia (USD / MT)	Undisclosed			243	Undisclosed
Iron Ore[7]	CFR China (USD / MT)	105 (Apr to Dec:105)	103 (H2:99)	(2)	108	¥0.74 billion (USD / MT)

Notes:
[1] Annual average.
[2] Increase or decrease in earnings assuming the April to March average of JPY / USD depreciates or appreciates by ¥1, respectively. Actual results are also affected by factors such as differences in consolidated company fiscal year-ends and cross rates between other currencies.
[3] To account for differences in consolidated company fiscal year-ends and the timing of when crude oil prices are reflected in LNG sales prices, we use an average of (a) the 12-month average price from six months prior (e.g. for the year ending March 31: average price from October to September) and (b) the 12-month average price from three months prior (e.g. for the year ending March 31: average price from January to December).
[4] The impact on actual results is also affected by factors such as foreign currency movements and production/sales volume. Because “Dividend income (after tax)” in the LNG Business is impacted by affiliates’ dividend payout ratios and the timing of their dividend resolutions, etc., the direct impact on this item by crude oil price fluctuations is currently limited. Accordingly, this item has been excluded from the calculation of consolidated net income sensitivities for the full fiscal year.
[5] The impact on actual results is also affected by factors such as foreign currency movements and production/sales volume.
[6] Actual results are also affected by factors such as the grade of mined ore, the status of production/operations and reinvestment plans (capital expenditure).
[7] To account for differences in consolidated company fiscal year-ends, we use the 12-month average price from three months prior (e.g. for the year ending March 31 we use the average price from January to December). Actual results are also affected by factors such as the grade of iron ore and the status of production/operations.
[8] Following the acquisition of the U.S. shale gas business (Adamas), natural gas price sensitivity has been revised from ¥2.7 billion to ¥3.4 billion.

3 Overview of Major Subsidiaries and Affiliates

Mitsubishi Corporation

(Icons link to “Segment Detail”)

Business Classification	Company / Business (Country / Region)	Description
Energy & Power Solution	**Natural Gas, LNG (Asia-Pacific)**	Business in Asia	Production and sale of natural gas and LNG in Asia
		Business in Pacific	Production and sale of natural gas and LNG in Pacific
		Dividend income from business in Asia-Pacific	Consolidated dividend income from affiliates and subsidiaries of LNG business in Asia-Pacific
	Natural Gas, LNG (North America)	Business in North America / Equity LNG Marketing	Production and sale of natural gas and LNG in North America and LNG marketing, trading and optimization
		U.S. Shale Gas	Production and sales of natural gas in the U.S.
	Petroleum-related business	Astomos Energy Corporation (Japan)	Import, trading, domestic distribution and sale of LPG
		Mitsubishi Corporation Energy Co., Ltd. (Japan)	Domestic sale and trade (import / export) of petroleum products
	Power-related business	N.V. Eneco (Netherlands)	Integrated power business in Europe
		Diamond Generating Corporation (U.S.)	Development and operation of electric power business in North America
		Diamond Generating Asia, Limited (Hong Kong)	Development and operation of power generation business in Asia, Oceania and the Middle East
		Mitsubishi Corporation Energy Solutions Ltd. (Japan)	Development and operation of power generation business in Japan
Materials Solution	**Essential Materials**	Cape Flattery Silica Mines Pty, Ltd. (Australia)	Mining and sale of silica sand
	Steel Products	Metal One Corporation (Japan)	Steel products operations
	Performance Materials	Performance materials-related business companies	Manufacture and sale of performance materials
	Basic Materials	SPDC Ltd. (Japan)	Investment in petroleum and petrochemicals-related businesses
		Mitsubishi Shoji Chemical Corporation (Japan)	Marketing of solvents, paints, coating resins and silicones
		Mitsubishi Corporation Plastics Ltd. (Japan)	Marketing of synthetic raw materials and plastics
		Overseas chemical trading businesses	Sale of commodity chemicals
		Basic chemicals-related business companies	Manufacture and sale of basic chemicals
