*Mitsubishi Corporation will hold an earnings conference call for the nine months ended December 2016, inviting institutional investors and analysts to join.

The conference material can be accessed live in Japanese from our website (Investor Relations section) at the following URL:

<http://www.mitsubishicorp.com/jp/ja/ir/index.html>

Time and date of the earnings conference call:

From 16:45 to 17:45 on Thursday, February 2, 2017

1. Qualitative Information Concerning Consolidated Operating Results

(Profit for the period, as used hereinafter, refers to profit for the period attributable to owners of the Parent.)

(1) Qualitative Information Related to Consolidated Results of Operations

Summary of Results for the Nine Months Ended December 2016

In the first nine months of the year ending March 2017, the U.S. economy continued to experience firm growth, supported by consumer spending. In addition, the economies of certain emerging nations bottomed out, due in part to a recovery in resource prices. Although the overall policies of the new U.S. administration remain unclear, the expectation of expansionary policies energized international financial markets. Modest levels of economic growth continued in Japan, led by external demand.

Against this background, revenues for the first nine months of the year ending March 2017 were ¥4,689.0 billion, a decrease of ¥727.1 billion, or 13% year over year, due in part to price declines stemming from worsening market prices and decreased sales volumes.

Gross profit was ¥964.8 billion, an increase of ¥118.0 billion, or 14% year over year, mainly due to reduced production costs in the Australian coal business and the significant contribution of higher market prices, despite changes in consolidation of certain consolidated subsidiaries.

Selling, general and administrative expenses improved ¥67.3 billion, or 9% year over year, to ¥685.2 billion, due to changes in consolidation of certain consolidated subsidiaries and the impact of exchange rates.

Gains on investments increased ¥44.9 billion year over year, to ¥63.8 billion, mainly due to one-off gains associated with the management integration of related companies and a rebound from impairment losses recognized in the same period of the previous year.

Share of profit of investments accounted for using the equity method decreased ¥33.6 billion, or 26% year over year, to ¥96.4 billion, mainly due to worsening energy market prices.

As a result, profit before tax increased ¥228.9 billion, or 75% year over year, to ¥533.2 billion.

Accordingly, profit for the period grew ¥131.5 billion, or 55% year over year, to ¥371.5 billion.

Review of Operating Segments

1) Global Environmental & Infrastructure Business Group

The Global Environmental & Infrastructure Business Group conducts environmental and infrastructure projects, related trading operations and other activities in power generation, water, transportation and other fields that serve as a foundation for industry.

The segment recorded profit for the period of ¥23.3 billion, a decrease of ¥11.2 billion year over year.

The lower earnings mainly reflected a rebound from reversal of the provision for losses on guarantee obligations for the North Sea oil project recorded in the previous year.

2) Industrial Finance, Logistics & Development Group

The Industrial Finance, Logistics & Development Group develops an investment and operation business. These businesses include corporate investment, leasing, real estate development and logistics services.

The segment recorded profit for the period of ¥22.3 billion, a decrease of ¥7.2 billion year over year. This decrease mainly reflected lower earnings from aircraft-related businesses and an absence of evaluation gains in the fund-related business recorded in the previous year.

3) Energy Business Group

The Energy Business Group conducts a number of activities including oil and gas exploration, development and production (E&P) business; investment in natural gas liquefaction projects; trading of crude oil, petroleum products, carbon materials and products, liquefied natural gas (LNG), and liquefied petroleum gas (LPG); and planning and development of new energy business.

The segment recorded profit for the period of ¥58.7 billion, an increase of ¥9.0 billion year over year. The increase mainly reflected one-off gains of ¥16.4 billion on restructuring of the shale gas business reported mainly in other income (expense)-net and sales of investment in the Asia E&P business, although dividends and equity income from investments decreased due to lower market prices, as well as a decline in operating transactions

4) Metals Group

The Metals Group trades, develops business and invests in a range of fields. These include steel products such as steel sheets and thick plates, steel raw materials such as coking coal and iron ore, and non-ferrous raw materials and products such as copper and aluminum.

The segment recorded profit for the period of ¥130.3 billion, an increase of ¥153.6 billion year over year. The increase mainly reflected higher earnings in the Australian coal business due to reduced production costs, the significant contribution of higher market prices, increased dividends from investment (non-ferrous metals), and one-off gains associated with withdrawal from a nickel-related project.

5) Machinery Group

The Machinery Group handles sales, finance and logistics across many different sectors, in which it also invests. These fields include machine tools, agricultural machinery, construction machinery, mining machinery, elevators, escalators, ships, aerospace-related equipment and motor vehicles.

The segment recorded profit for the period of ¥20.8 billion, a decrease of ¥37.7 billion year over year. This decrease mainly reflected a decrease in earnings due to impairment losses in the ship-related business.

6) Chemicals Group

The Chemicals Group trades chemical products in a broad range of fields, in which it also develops business and invests. These fields extend from basic materials such as ethylene, methanol, and salt produced from crude oil, natural gas, minerals, plants, marine resources and so forth, to midstream and downstream products such as plastics, electronic materials, food ingredients, fertilizer and fine chemicals.

The segment recorded profit for the period of ¥23.5 billion, a decrease of ¥7.1 billion. Earnings fell mainly due to a decrease in equity income from the petrochemical-related business due to lower market prices and yen appreciation.

7) Living Essentials Group

The Living Essentials Group provides products and services, develops businesses and invests in various fields closely linked with people's lives, including food products and food, textiles, everyday products, healthcare, distribution and retail. These fields extend from the procurement of raw materials to the consumer market.

The segment recorded profit for the period of ¥85.0 billion, an increase of ¥31.0 billion. This increase mainly reflected higher earnings from the salmon farming business due to market price recovery and one-off gains associated with the management integration of related companies in the meat business.

(2) Qualitative Information Concerning Consolidated Financial Position

Changes in Assets, Liabilities and Equity

Total assets as of December 31, 2016 was ¥15,059.1 billion, an increase of ¥142.8 billion from March 31, 2016, mainly due to a rise in trade and other receivables because of higher transaction prices and an increase in transaction volumes.

Total liabilities was ¥9,962.1 billion, an increase of ¥63.4 billion from March 31, 2016, mainly due to a rise in trade and other payables accompanying higher transaction prices and an increase in transaction volumes.

Net interest-bearing liabilities, which is gross interest-bearing liabilities minus cash, cash equivalents and time deposits, decreased ¥365.9 billion from March 31, 2016 to ¥3,949.6 billion. The net debt-to-equity ratio, which is net interest-bearing liabilities divided by equity attributable to owners of the Parent, was 0.8.

Equity attributable to owners of the Parent was ¥4,655.1 billion, an increase of ¥62.6 billion from March 31, 2016. This increase was mainly due to the accumulation of profit for the period, despite the change of exchange differences on translating foreign operations.

Cash Flows

Cash and cash equivalents as of December 31, 2016 was ¥1,419.3 billion, down ¥81.7 billion from March 31, 2016.

(Operating activities)

Net cash provided by operating activities was ¥384.3 billion, mainly due to cash flows from operating transactions and dividend income, despite the payment of income taxes.

(Investing activities)

Net cash used in investing activities was ¥24.4 billion. The main use of cash was for capital expenditures in the resource business and new investments in the real estate-related business, which offset cash inflows from the collection of loans receivable and gains from sales of investments.

As a result, free cash flows, the sum of operating and investing cash flows, was positive ¥359.9 billion.

(Financing activities)

Net cash used in financing activities was ¥491.8 billion, mainly due to the repayment of borrowings, redemption of bonds, and the payment of dividends at the Parent, despite raising funds through the issuance of subordinated bonds (hybrid bonds), etc.

(3) Qualitative Information Concerning Consolidated Forecasts for the Year Ending March 2017

Due mainly to increases in resource prices, particularly coking coal, consolidated forecasts for the year ending March 2017 has been revised as follows.

Consolidated Forecasts for the Year Ending March 2017 (April 1, 2016 to March 31, 2017)

(Billions of Yen)

	Previous full-year forecasts (November 4, 2016) (A)	Current full-year forecasts (February 2, 2017) (B)	Change (B-A)	Change (%)
Profit attributable to owners of the Parent	330.0	440.0	110.0	33%

Note:

Earnings forecasts and other forward-looking statements in this release are based on data currently available to management and certain assumptions that management believes are reasonable. Therefore, they do not constitute a guarantee that they will be achieved. Actual results may differ materially from these statements for various reasons.

2. Summary Information (Notes)

(1) Significant Changes in Subsidiaries During the Nine Months Ended December 2016 (Changes in Specified Subsidiaries Causing Changes in Scope of Consolidation)

From the nine months ended December 2016, CORDOVA GAS RESOURCES LTD. is excluded from the scope of consolidation of Mitsubishi Corporation due to the divestiture of its shares to a third party.

(2) Changes in Accounting Policies and Changes in Accounting Estimates

The important accounting policies applied to the condensed consolidated financial statements for the nine months ended December 2016 are identical to the accounting policies applied to the consolidated financial statements for the previous fiscal year, except for the following:

New standards and interpretation guidelines applied

Standard and interpretation guideline	Outline
IFRS 11 Joint Arrangements (Amended)	Clarification of the accounting for acquisitions of interests in joint operations
IAS 16 Property, Plant and Equipment (Amended)	Accounting for a produce growing on bearer plants
IAS 41 Agriculture (Amended)	

The adoption of new standards including the above and interpretation guidelines had no significant impact on the condensed consolidated financial statements for the nine months ended December 2016.

Notes:

*1. "Other" represents the corporate departments which primarily provide services and operational support to the Company and Affiliated companies.

This column also includes certain revenues and expenses from business activities related to financing and human resource services that are not allocated to reportable operating segments.

Unallocated corporate assets categorized in "Other" consist primarily of cash, time deposits and securities for financial and investment activities.

*2. "Adjustments and Eliminations" includes certain income and expense items that are not allocated to reportable operating segments and intersegment eliminations.

*3. From the fiscal year ending March 31, 2017, the environment-related business of the Global Environmental & Infrastructure Business Group is determined as an operating segment in the same manner as the infrastructure-related business. In line with this change, although previously presented in "Other," the environment-related business is now included within the "Global Environmental & Infrastructure Business." Segment information for nine months ended December 31, 2015 has been reclassified accordingly.

(8) Notes Concerning Major Changes in Shareholders' Equity

Results for the nine months ended December 2016

- ✓ Earnings increased 131.5 billion yen year over year.
- ✓ Earnings in Resource increased 170.4 billion yen, mainly due to reduced production costs and higher market prices in the Australian coal business.
- ✓ Earnings in Non-resource decreased 40.0 billion yen, mainly due to the absence of one-off gains in addition to losses recorded in the ship-related business, although earnings increased in the salmon farming business.

Forecast for the year ending March 2017

- ✓ Based on the results for the nine months ended December 2016, the forecast has been revised to 440.0 billion yen.
- ✓ In consideration of the revised forecast, the annual dividend per share has been revised from 60 yen to 70 yen.

Year-over-Year Segment Net Income (Loss)

Note: Resource is defined as earnings related to natural gas and E&P in the Energy Business, and mineral resource in Metals. The environment-related business is included in the Global Environmental & Infrastructure Business.

[Resource]

■ Energy Business – Resource +58%

One-off gains on business restructuring of shale gas business and sales of investment in the Asia E&P business, although dividends and equity income from investments decreased due to lower market prices

■ Metals - Resource

Increased earnings in the Australian coal business due to reduced production costs and higher market prices, increased dividends from investment(non-ferrous metals), and one-off gains on withdrawal from a nickel-related project

■ Global Environmental & Infrastructure Business -32%

Rebound from reversal of the provision for losses on guarantee obligations for the North Sea oil project recorded in the previous year

■ Industrial Finance, Logistics & Development -24%

Decrease in earnings from aircraft-related businesses and an absence of evaluation gains in the fund-related business recorded in the previous year

■ Machinery -64%

Decrease in earnings due to impairment losses recorded in the ship-related business

■ Chemicals -23%

Decrease in equity income from the petrochemical-related business due to lower market prices and yen appreciation.

■ Living Essentials +57%

Increase in earnings from the salmon farming business due to market price recovery, and one-off gains on meat business restructuring

■ Energy Business – Non-resource

Decrease in earnings from the oil and LPG trading businesses

■ Metals – Non-resource +108%

Increase in earnings from the mineral resource trading business

[Non-resource]

[Foreign Exchange, Commodity Prices and Interest Rates]

	Forecast for the year ending March 2017 (Released Nov. 4, 2016)	Forecast for the year ending March 2017 (Released Feb. 2, 2017)	Changes	Nine months ended December 2016	Consolidated Net Income Sensitivities
Foreign Exchange (YEN/US\$)	102.63	108.76	+6.13	106.65	Depreciation/appreciation of 1 yen per US\$1 has a 2.5 billion yen positive/negative impact on a full-year basis.
Crude Oil Price (Dubai) (US\$/BBL)	44	46	+2	44.9	A US\$1 rise/decline per barrel increases/reduces full-year earnings by 2.0 billion yen. In addition to changes in crude oil prices, other factors could also affect crude oil-related earnings, such as differences in the fiscal year-ends of consolidated companies, timing of the reflection of the crude oil price in sales prices, dividend policy, foreign currency movements, and production/sales volume.
Copper (US\$/MT) [¢ / lb]	4,696 [213]	5,071 [230]	+375 [+17]	4,928 [224]	A US\$100 rise/decline per MT increases/reduces full-year earnings by 0.9 billion yen (A US¢10 rise/decline per lb increases/reduces full-year earnings by 1.9 billion yen). Besides copper price fluctuations, other variables affect earnings from copper mines, such as the grade of mined ore, the status of production operations, and reinvestment plans (capital expenditure). Therefore, the impact on earnings cannot be determined by the copper price alone.
YEN Interest TIBOR (%)	0.08	0.07	(0.01)	0.06	The effect of rising interest rates is mostly offset by an increase in operating and investment profits. However, a rapid rise in interest rates could have a temporary negative effect.
US\$ Interest LIBOR (%)	0.86	0.84	(0.02)	0.78
